Power Over People:

Power over Peoples Daniel R. Headrick, 2012-06-28 A major history of technology and Western conquest For six hundred years the nations of Europe and North America have periodically attempted to coerce invade or conquer other societies They have relied on their superior technology to do so yet these technologies have not always guaranteed success Power over Peoples examines Western imperialism s complex relationship with technology from the first Portuguese ships that ventured down the coast of Africa in the 1430s to America s conflicts in the Middle East today Why did the sailing vessels that gave the Portuguese a century long advantage in the Indian Ocean fail to overcome Muslim galleys in the Red Sea Why were the same weapons and methods that the Spanish used to conquer Mexico and Peru ineffective in Chile and Africa Why didn t America s overwhelming air power assure success in Iraq and Afghanistan In Power over Peoples Daniel Headrick traces the evolution of Western technologies from muskets and galleons to jet planes and smart bombs and sheds light on the environmental and social factors that have brought victory in some cases and unforeseen defeat in others He shows how superior technology translates into greater power over nature and sometimes even other peoples yet how technological superiority is no guarantee of success in imperialist ventures because the technology only delivers results in a specific environment or because the society being attacked responds in unexpected ways Breathtaking in scope Power over Peoples is a revealing history of technological innovation its promise and limitations and its central role in the rise and fall of empire Some images inside the book are unavailable due to digital copyright restrictions *The Game of Politics: Pursuit of Power over People, Game Manual* , **Nature, Choice and Social Power** Erica Schoenberger, 2014-08-21 We are at an environmental impasse Many blame our personal choices about the things we consume and the way we live This is only part of the problem Different forms of social power political economic and ideological structure the choices we have available This book analyses how we make social and environmental history and why we end up where we do Using case studies from different environmental domains earth and water air and fire Nature Choice and Social Power examines the form that social power takes and how it can harm the environment and hinder our efforts to act in our own best interests The case studies challenge conventional wisdoms about why gold is valuable why the internal combustion engine triumphed and when and why suburbs sprawled The book shows how the power of individuals the power of classes the power of the market and the power of the state at different times and in different ways were critical to setting us on a path to environmental degradation It also challenges conventional wisdoms about what we need to do now Rather than reducing consumption and shrinking from outcomes we don t want it proposes growing towards outcomes we do want We invested massive resources in creating our problems it will take equally large investments to fix them Written in a clear and engaging style the book is underpinned with a political economy framework and addresses how we should understand our responsibility to the environment and to each other as individuals within a large and impersonal system *Introduction to Leadership* Peter G. Northouse, 2020-01-07 New chapter on

Integrating Indigenous and Western Education in Science Curricula Eun-Ji Amy Kim, 2022-01-04 This book explores diverse relationships at play in integrating Indigenous knowledges and Western Science in curricula The readers will unravel ways in which history policy and relationships with local Indigenous communities play a role in developing and implementing cross cultural science curricula in schools Incorporating stories from multiple individuals involved in curriculum development and implementation university professors a ministry consultant

a First Nations and Métis Education coordinator and most importantly classroom teachers this book offers suggestions for education stakeholders at different levels Focusing on the importance of understanding relationships at play this book also shows the author's journey in research wherein she grapples with both Indigenous and Western research frameworks Featuring a candid account of this journey from research preparation to writing this book also offers insights on the relationships at play in doing research that respects Indigenous ways of coming to know More Beautiful and More Terrible Imani Perry, 2011-02-28 Perry argues that racism in America has moved into a new phase post intentional For a nation that often optimistically claims to be post racial we are still mired in the practices of racial inequality that plays out in law policy and in our local communities One of two explanations is often given for this persistent phenomenon On the one hand we might be hypocritical saying one thing and doing or believing another on the other it might have little to do with us individually but rather be inherent to the structure of American society More Beautiful and More Terrible compels us to think beyond this insufficient dichotomy in order to see how racial inequality is perpetuated Imani Perry asserts that the U S is in a new and distinct phase of racism that is post intentional neither based on the intentional discrimination of the past nor drawing upon biological concepts of race Drawing upon the insights and tools of critical race theory social policy law sociology and cultural studies she demonstrates how post intentional racism works and maintains that it cannot be addressed solely through the kinds of structural solutions of the Left or the values arguments of the Right Rather the author identifies a place in the middle a space of righteous hope and articulates a notion of ethics and human agency that will allow us to expand and amplify that hope To paraphrase James Baldwin when talking about race it is both more terrible than most think but also more beautiful than most can imagine with limitless and open ended possibility Perry leads readers down the path of imagining the possible and points to the way forward Research Handbook on Property, Law and Theory Chris Bevan, 2024-08-06 This comprehensive Research Handbook interrogates and offers historical as well as contemporary understandings of property property law and property theory Chapters locate the role of property in key theoretical debates and examine property's place in significant social contexts covering topics such as Indigenous property artificial intelligence cryptoassets property and the art world environmentalism and climate change Commonsense and the Theory of International Politics John C. Garnett, 1984-01-01 International politics is not a cumulative subject in which the latest book makes all the others obsolete The assumption underlying these pages is that our understanding of international politics is more likely to be improved by reflecting upon and reworking what we already know about the subject than by topping up our knowledge with either more detailed research or more contemporary analysis Each of the chapters deals with a different aspect of international theory A discerning reader may become aware of certain unifying threads running through and linking all of the chapters They have all been written out of a conviction that explanation and not prescription is the only proper role of the political scientist and they all reflect my skepticism about the scientific nature of international politics John C Garnett

In a refreshing and clear analysis Dr Garnett looks at the nature of international theory and the problems associated with its development Drawing from many disciplines he examines fundamental questions in a new way giving a measure of commonsense to a subject which has become complicated and esoteric His use of analogies and quotations bring his subject alive in a study that will be of interest to those involved in both the social sciences and politics **The International Journal of Indian Psychology, Volume 7, Issue 1, Version 2** Suresh Makvana,Ankit Patel,2019-03-21 Cognitive Capitalism Yann Moulier-Boutang,2011 This book argues that we are undergoing a transition from industrial capitalism to a new form of capitalism what the author calls cognitive capitalism rsquo *Hobbes's 'Leviathan'* Laurie M. In the Company of Scholars Julius Getman, 2010-07-22 I began this book to articulate my sense of disappointment and alienation from the status I had fought so hard to achieve A remarkable admission from an alumnus of Harvard Law School who has held tenured professorships in the law schools of Yale and Stanford and has taught in the law schools of Harvard and Chicago In this personal reflection on the status of higher education Julius Getman probes the tensions between status and meaning elitism and egalitarianism that challenge the academy and academics today He shows how higher education creates a shared intellectual community among people of varied races and classes while simultaneously dividing people on the basis of education and status In the course of his explorations Getman touches on many of the most current issues in higher education today including the conflict between teaching and research challenges to academic freedom the struggle over multiculturalism and the impact of minority and feminist activism Getman presents these issues through relevant often humorous anecdotes using his own and others experiences in coping with the constantly changing academic landscape Written from a liberal perspective the book offers another side of the story told in such works as Allan Bloom's *The Closing of the American Mind* and Roger Kimball's *Tenured Radicals*

Refugee Displacement, Disability and Human Rights Philippa Duell-Piening, 2025-02-25 This book presents a timely and innovative exploration of one of the first human rights articles about data production and processing the Convention on the Rights of Persons with Disabilities article 31 Statistics and data collection The study provides detailed explorations of the legal and practical demands of article 31 how these have been interpreted and the practice of human rights research with marginalised communities It describes the history of the article's drafting in detail uncovering the tensions at its heart today This analysis provides the foundations for an alternative doctrinal reading of the obligations in article 31 and an exploration of a potential group right The book's detailed analysis is assisted by a new conceptual framework that illustrates the relationship between visibility and power The work demonstrates that data is not inert but

powerful and may be used in ways that are helpful and harmful to rights holders Through closely examining disability human rights data practices in refugee contexts it concludes that human rights protections are being ignored in the urgency to create more data to identify and address inequality The author identifies immediate actions that may be taken to remediate current practices The book will be an invaluable resource for academics researchers and policy makers working in disability studies human rights law refugee and migration studies technology and society

Levine, 2022-06-22 There is today a crisis in psychiatry Even the former director of the National Institute of Mental Health Thomas Insel has said Whatever we've been doing for five decades it ain't working The field requires a completely fresh look and clinical psychologist Bruce Levine a man often at odds with his profession enlists the early Enlightenment philosopher Baruch de Spinoza to help work through the problem Readers unfamiliar with Spinoza will be intrigued by the modern relevance of his radical philosophical psychological and political ideas Levine compares the radical moderate divide among Enlightenment thinkers to a similar divergence between contemporary critics of psychiatry siding historically with Spinoza in order to bring an equivalent intellectual force to bear upon our modern crisis and calling for new forms of free and enlightened thinking
