Valve-Regulated Lead-Acid Batteries Patrick T. Moseley,Jürgen Garche,C.D. Parker,D.A.J. Rand,2004-02-24 For many decades the lead acid battery has been the most widely used energy storage device for medium and large scale applications approximately 100Wh and above In recent years the traditional flooded design of the battery has begun to be replaced by an alternative design This version the valve regulated lead acid VRLA battery requires no replenishment of the water content of the electrolyte solution does not spill liquids and can be used in any desired orientation Since the VRLA battery operates in a somewhat different manner from its flooded counterpart considerable technological development has been necessary to meet the exacting performance requirements of the full range of applications in which rechargeable batteries are used The valve regulated design is now well established in the industrial battery sector and also appears set to be adopted widely for automotive duty This book provides a comprehensive account of VRLA technology and its uses In the future all industrial processes including the manufacture of batteries will be required to conform to the conventions of sustainability Accordingly the crucial areas of the environmental impact associated with the production and use of VRLA batteries and the recycling of spent units are also treated thoroughly Valve Regulated Lead Acid Batteries gives an essential insight into the science that underlies the development and operation of VRLA batteries and is a comprehensive reference source for those involved in the practical use of the technology in key energy storage applications Covers all major advances in the field Provides a comprehensive account of VRLA technology and its uses First book dedicated to this technology Energy Research Abstracts ,1988 Semiannual with semiannual and annual indexes References to all scientific and technical literature coming from DOE its laboratories energy centers and contractors Includes all works deriving from DOE other related government sponsored information and foreign nonnuclear information Arranged under 39 categories e g Biomedical sciences basic studies Biomedical sciences applied studies Health and safety and Fusion energy Entry gives bibliographical information and abstract Corporate author subject report number indexes U.S. Government Research & Development Reports ,1970
