

Power And Policy In China

Pasquale De Marco

Power And Policy In China:

Power and Policy in China Parris H. Chang, 1990 China's Big Power Ambition under Xi Jinping Suisheng Zhao, 2021-12-14 Instead of emphasizing China as a developing country Chinese President Xi Jinping has identified China as a big power and accentuated China's big power status This book explores the narratives and driving forces behind China's big power ambition Three narratives rooted in Sino centralism are examined One is China's demands for the reform of global governance to reflect the values and interests of China as a rising power Another is China's Belt and Road Initiative to construct a nascent China centred world order The third is the China model and self image promotion in the developing countries There are many forces that have driven or constrained China's big power ambition This collection focuses on two sets of forces One is China's domestic politics and economic incentives and disincentives The other is China's geo political and geo economic interests These forces have both motivated and constrained China's big power ambition The chapters in this book were originally published in the Journal of Contemporary China **Interpreting China as a Regional and Global Power** B. Dessein, 2014-11-25 This collection discusses China's contemporary national and international identity as evidenced in its geopolitical impact on the countries in its direct periphery and its functioning in organizations of global governance This contemporary identity is assessed against the background of the country's Confucian and nationalist history

China's Power and Asian Security Mingjiang Li, Kalyan M. Kemburi, 2014-11-27 One of the most significant factors for contemporary international relations is the growth of China's economic military and political power Indeed few analysts would dispute the observation that China's power has strongly influenced the structure of the international system major power strategic relations international security the patterns of trans border economic activities and most importantly the political and security dynamics in Asia in the twenty first century This book maps the growth of China's political economic and military capabilities and its impact on the security order in Asia over the coming decades While updating the emerging power dimensions and prevailing discourse it provides a nuanced analysis of whether the growth of Chinese power is resulting in Beijing becoming more assertive or even aggressive in its behavior and pursuit of national interests It also examines how the key Asian countries perceive and react to the growth of China's power and how US rebalancing would play out in the context of Beijing's political economic and military power China's Power and Asian Security will be of huge interest to student and scholars of Asian politics Chinese politics security studies and international security and international relations more generally **Strategies of Sustainable Development in China's Wind Power Industry** Jiachun Li, Dexin He, 2020-01-11 This book reviews the status quo and visions for the future in the wind energy industry in China and around the globe focusing on its roles in optimizing energy structure alleviating environmental pollution and coping with climate change Providing a blueprint of wind power development till 2050 it suggests a series of further measures in the context of policies regulations laws and marketing in order to overcome the existing bottlenecks Moreover it proposes a number of

potential innovative technologies related to IT and advanced manufacturing including integrated distributed power and micro grid systems multi energy complement green and intelligent manufacturing reliability design blade design manufacturing and maintenance drive train systems and offshore wind farms This book offers researchers and engineers insights into sustainable development in the wind power industry

Why Is The China Model Losing Its Power? - Challenges And Opportunities Of The Second Global Competition Jinghao Zhou, 2020-07-23 History has proved that communism failed at many levels during the first global competition between the capitalist and socialist camps during the Cold War As a result the socialist camp was dissolved China is one of the few communist countries to survive in the twenty first century The Chinese economy was on the verge of collapse in the 1970s but began to take off in the early 1980s guided by the China model China became the world s second largest economy in 2010 and has quickly expanded its enormous global market and political influence The second global competition between the capitalist countries and China has started The second global competition is in fact between the China model and the Washington Consensus Will Western hegemonies end as the result of the second global competition Will China be able to rewrite the international rules Will the Chinese communist political system collapse during the competition What should the West do to the China model This book will explore the implications of the China model in the context of the second global competition and argues that the downturn of the China model and China s global expansion are the two sides of the same coin The China model is losing its power but not broken China would be able to become even stronger if it could reshape the philosophical foundation of the China model The future of Western hegemony will depend on how the West understands the China model and deals with it This book addresses these aspects and more

Power and Restraint in China's Rise Chin-Hao Huang, 2022-07-05 Honorable Mention 2024 T V Paul Best Book in Global International Relations Global International Relations Section International Studies Association Conventional wisdom holds that China s rise is disrupting the global balance of power in unpredictable ways However China has often deferred to the consensus of smaller neighboring countries on regional security rather than running roughshod over them Why and when does China exercise restraint and how does this aspect of Chinese statecraft challenge the assumptions of international relations theory In *Power and Restraint in China's Rise* Chin Hao Huang argues that a rising power s aspirations for acceptance provide a key rationale for refraining from coercive measures He analyzes Chinese foreign policy conduct in the South China Sea showing how complying with regional norms and accepting constraints improves external perceptions of China and advances other states recognition of China as a legitimate power Huang details how member states of the Association of Southeast Asian Nations have taken a collective approach to defusing tension in maritime disputes incentivizing China to support regional security initiatives that it had previously resisted Drawing on this empirical analysis Huang develops new theoretical perspectives on why great powers eschew coercion in favor of restraint when they seek legitimacy His framework explains why a dominant state with rising ambitions takes the views and interests of small states

into account as well as how collective action can induce change in a major power's behavior. Offering new insight into the causes and consequences of change in recent Chinese foreign policy, this book has significant implications for the future of engagement with China. **Power of Bonding and Non-Western Soft Power Strategy in Iran** Md. Nazmul

Islam, 2022-12-09 This book comparatively assesses the China and India's soft power strategy in Iran. By employing Joseph S. Nye's Soft Power theory and forming the new concept of Power of Bonding, this book formulated China and India's soft power narratives and applied it through the empirical analysis in Iran. Based on this theory, this book seeks explanations for the question of how China and India respectively strategically and comparatively use the soft power strategy in Iran. To reach the end, this book compares the understanding, resources, strategies, influences, and uses of China and India's soft power in Iran under three thematic areas including power of bonding through cultural attractions and attributions, political and diplomatic engagement, and economic partnerships. By analysing China and India's soft power strategy in Iran, this book seeks to contribute to the soft power literature through a theoretical replication based on non-Western soft power strategy, the concept, and its empirical application in China and India. *China, the United States, and 21st-Century Sea Power* Andrew S.

Erickson, Lyle J. Goldstein, Nan Li, 2010-12-01 China's reaction to the United States' new maritime strategy will significantly impact its success, according to three Naval War College professors. Based on the premise that preventing wars is as important as winning wars, this new U.S. strategy they explain embodies a historic reassessment of the international system and how the United States can best pursue its interests in cooperation with other nations. The authors contend that despite recent turbulence in U.S.-China military relations, substantial shared interests could enable extensive U.S.-China maritime security cooperation as they attempt to reach an understanding of competitive coexistence. But for professionals to structure cooperation, they warn, Washington and Beijing must create sufficient political and institutional space. *China's Soft Power and International Relations* Hongyi Lai, Yiyi Lu, 2012 This book provides a comprehensive overview of China's use of soft power and assesses the impact this is having on the world and on the process of international relations. **China and**

International Governance in the 21st Century: A New Power in the Global Economy Pasquale De Marco, 2025-03-08 *China and International Governance in the 21st Century* provides a comprehensive overview of China's growing role in the global economy and its implications for international governance. The book examines China's participation in key international economic institutions such as the International Monetary Fund (IMF), the World Bank, and the World Trade Organization (WTO), as well as its role in regional economic cooperation. The book also explores the challenges and opportunities that China's rise presents for the global economy. On the one hand, China's economic growth has helped to lift millions of people out of poverty and has contributed to global economic growth. On the other hand, China's growing economic power has also led to increased inequality and environmental degradation. The book also examines the complex and evolving relationship between China and the United States, the world's two largest economies. The two countries have a long history of

economic cooperation but they have also been involved in a number of trade disputes The future of China US relations will have a major impact on the global economy China and International Governance in the 21st Century is a timely and essential resource for anyone who wants to understand China s role in the global economy and its implications for international governance The book is written in a clear and accessible style making it ideal for students policymakers and business leaders alike Key Features Provides a comprehensive overview of China s growing role in the global economy Examines China s participation in key international economic institutions Explores the challenges and opportunities that China s rise presents for the global economy Analyzes the complex and evolving relationship between China and the United States Written in a clear and accessible style making it ideal for students policymakers and business leaders alike If you like this book write a review China's Growth as a Regional Economic Power U.S.-China Economic and Security Review Commission,2003 Contains testimony and prepared statements by various experts as well as remarks by members of the Commission

Nationalism and Power Politics in Japan's Relations with China Yew Meng Lai,2013-08-22 Despite flourishing economic interactions and deepening interdependence the current political and diplomatic relationship between Japan and China remains lukewarm at best Indeed bilateral relations reached an unprecedented nadir during the spring of 2005 and again more recently in autumn 2012 as massive anti Japanese demonstrations across Chinese cities elicited corresponding incidents of popular anti Chinese reprisal in Japan This book systematically explores the complex dynamics that shape contemporary Japanese Chinese relations In particular it analyses the so called revival of nationalism in post Cold War Japan its causality in redefining Japan s external policy orientations and its impact on the atmosphere of the bilateral relationship Further by adopting a neoclassical realist model of state behaviour and preferences Lai Yew Meng examines two highly visible bilateral case studies the Japanese Chinese debacle over prime ministerial visits to Yasukuni Shrine and the multi dimensional dispute in the East China Sea which comprises the Senkaku Diaoyudao territorial row alleged Chinese maritime incursions and bilateral competition for energy resources Through these examples this book explores whether nationalism really matters when and under what circumstances nationalism becomes most salient and the extent to which the emotional dimensions of nationalism manifest most profoundly in Japanese state elites policy decision making This timely book will be of great interest to students and scholars of both Japanese and Chinese politics as well as those interested in international relations nationalism foreign policy and security studies more broadly

Soft Power and Diplomatic Strategies in Asia and the Middle East Zreik, Mohamad,2024-04-01 In a world witnessing the transformative rise of China the intricate dynamics of its soft power diplomacy have become a focal point of global attention As geopolitical landscapes shift the need to understand how China crafts its foreign policy especially through the strategic use of soft power becomes imperative Soft Power and Diplomatic Strategies in Asia and the Middle East is a crucial resource to unraveling these complexities The book addresses the post COVID 19 changes in China s soft power application providing an in depth comparative analysis of its

diplomatic endeavors in the Middle East and East Asia By exploring cultural exchanges economic collaborations and religious engagements the book offers nuanced insights into China's strategies making it an indispensable tool for academics policymakers diplomats and those intrigued by contemporary geopolitics This book aims to dissect the multifaceted approaches China employs to achieve its diplomatic objectives From cultural initiatives to economic partnerships and religious engagements the book unravels the adaptability and complexity of China's foreign policy mechanisms Its primary objective is to provide a comparative framework for studying China's soft power diplomacy filling a notable gap in existing scholarship The interdisciplinary approach ensures rich diverse analyses fostering dialogues across international relations Asian studies and political science By offering new theories methodologies and empirical data the book not only challenges existing notions but also sparks further academic inquiry into the strategic use of soft power in foreign policy Soft Power

Mingjiang Li, 2009-08-15 Soft power has become a very popular concept in international affairs appearing in government policy papers academic discussions and the popular media In China soft power has become one of the most frequently used phrases among political leaders leading academics and journalists Defined against hard power which often involves threat and coercion soft power applies attraction persuasion and cooperation finding its sources in culture political values and foreign policies China rich in culture and traditional philosophy boasts abundant sources of soft power Soft Power attempts to analyze the domestic and international views of China's soft power the main strengths and weaknesses of China's soft power and the application of soft power in China's international politics It provides a comprehensive exploration of the soft power dimension in China's foreign relations by integrating views from various disciplines such as history education culture political economy comparative politics and philosophy The book argues that soft power has become a very popular concept in China that China is contemplating and exploring an innovative strategy in its rise and international politics and that there have been quite a few notable elements of this in China's diplomatic practice including softer rhetoric promotion of the Chinese culture abroad economic diplomacy and image building The book also argues that the limitations of China's soft power primarily stem from political values and China's own transitions and reflects the reality that views and opinions regarding China's soft power are fairly diverse both in China and in the international arena Soft power is a useful and important perspective by which to understand Chinese foreign policy and the future evolution of China's role in international politics This study is a pioneering work providing a new perspective for the study of Chinese foreign policy and the rise of China that will appeal to scholars of Chinese foreign policy **China's Emergence as a Defense Technological Power**

Tai Ming Cheung, 2013-10-31 China is flexing its growing military and strategic clout in the pursuit of broadening national security interests At the same time the country's economic and technology policies have also become more nationalistic state centered and ambitious China's defense economy has set its sights on catching up with the West by the beginning of the 2020s and is making steady progress in building up its innovation capabilities although this is presently in the form of

incremental and sustaining types of activities More high end disruptive forms of innovation that would lead to major breakthroughs are likely to be beyond China's reach in the near to medium term This volume provides a wide ranging and detailed assessment of the present state of the Chinese defense economy at a time of rapid change and accelerating advancement in its innovation capabilities and performance This collection of articles has three main goals 1 to locate China's defense innovation dynamics within broader historical technological and methodological frameworks of analysis 2 to assess the performance of the Chinese defense economy's six principal subsectors and 3 to compare China's approach to defense industrialization with major counterparts in the Asia Pacific region This book was originally published as a special issue of the Journal of Strategic Studies

China as an emerging regional and technology power U.S.-China Economic and Security Review Commission, 2004

Electric Power for China's Modernization, 1980 Electric Power for China's Modernization National Foreign Assessment Center (U.S.), 1980

China's Maritime Power And Strategy: History, National Security And Geopolitics Hailong Ju, 2015-04-08 This book conducts a comprehensive study on China's maritime strategy It discusses the lessons of maritime power history that must be learnt by Chinese today the relations between China's maritime strategy and domestic developing problems of China the status and influence of maritime strategy from China's overall development strategy perspective and the geopolitical targets of Chinese navy in 2050 China's maritime strategy is one of the most important academic and realistic subjects in the present and future This book is the first book to discuss China's maritime strategy comprehensively in and outside China It will give readers a better sense of why China has to develop its sea power why it lays so much emphasis on Taiwan and the South China sea why the country can make friends with India but not Japan and why China's maritime strategy will never challenge America but has to face the pressure from America's maritime hegemony and so on
