Power And The Promise Of School Reform:

Power and the Promise of School Reform William J. Reese, 2002 This book examines how grass roots movements operated during the early twentieth century to shape urban education in the United States *Power and the Promise of School Reform* William J. Reese, 2002 This book examines how grass roots movements operated during the early twentieth century to shape urban education in the United States **Power and Method** Andrew Gitlin, 2014-04-04 Power and Method demonstrates that political activism can and should be infused into the research process Contesting the traditional assumptions that have dominated thinking about the nature and meaning of research validity objectivity and the researcher subject relationship the volume showcases alternative methods enabling scholars to make a difference in the lives of classed gendered and raced subjects and grapple honestly and openly with the way power is woven into the research process Committed to the notion that the challenge to redefine the research process faces not only educational researchers Power and Method includes contributions from scholars in the allied social sciences and the humanities Responses from researchers working women s studies anthropology sociology and literature conclude each section and highlight common and alternative perspectives on the central themes that run throughout the volume *Leonard Covello and the Making of Benjamin Franklin High School* Michael C. Johanek, John L. Puckett, 2007 What is the mission of American public education As a nation are we still committed to educating students to be both workers and citizens as we have long proclaimed or have we lost sight of the second goal of encouraging students to be contributing members of a democratic society In this enlightening book John Puckett and Michael Johanek describe one of America s most notable experiments in community education In the process they offer a richly contextualized history of twentieth century efforts to educate students as community minded citizens Although student test scores now serve to measure schools achievements the authors argue compellingly that the democratic goals of citizen centered community schools can be reconciled with the academic performance demands of contemporary school reform movements Using the twenty year history of community centered schooling at Benjamin Franklin High School in East Harlem as a case study and reminding us of the pioneering vision of its founder Leonard Covello they suggest new approaches for educating today s students to be better public citizens **School, Society, and State** Tracy L. Steffes, 2011-04-01 Democracy has to be born anew every generation and education is its midwife wrote John Dewey in his classic work *The School and Society* In *School Society and State* Tracy Steffes places that idea at the center of her exploration of the connections between public school reform in the early twentieth century and American political development from 1890 to 1940 American public schooling Steffes shows was not merely another reform project of the Progressive Era but a central one She addresses why Americans invested in public education and explains how an array of reformers subtly transformed schooling into a tool of social governance to address the consequences of industrialization and urbanization By extending the reach of schools broadening their mandate and expanding their authority over the well being

of children the state assumed a defining role in the education and in the lives of American families In *School Society and State* Steffes returns the state to the study of the history of education and brings the schools back into our discussion of state power during a pivotal moment in American political development

The Americanization of West Virginia John C. Hennen, 2021-12-14

Local teachers and ministers extolling the virtues of hard work and loyalty to God and country Veterans groups and women's clubs promoting the military fighting radicalism and equating business and patriotism Industrial leaders gaining legal as well as moral influence over national domestic policy Such scenes might seem to be lifted from a Sinclair Lewis novel or a Contract with America publicity video But as John C Hennen shows in this piercing analysis of early twentieth century American political culture from 1916 to 1925 Americanization became the theme indeed the script not only of West Virginia but of the entire nation Hennen's interdisciplinary work examines a formative period in West Virginia's modern history that has been largely neglected beyond the traditional focus on the coal industry Hennen looks at education reform and industrial relations in the state in the context of war mobilization postwar instability and national economic expansion The First World War he says consolidated the dominant positions of professionals business people and political capitalists as arbiters of national values These leaders emerged from the war determined to make free market business principles synonymous with patriotic citizenship Americanization therefore refers less to the assimilation of immigrants into the national mainstream than to the attempt to encode values that would guarantee a literate loyal and obedient producing class To ensure that the state fulfilled its designated role as a resource zone for the perceived greater good of national strength corporate leaders employed public relations tactics that the Wilson administration had refined to gain public support for the war Alarmed by widespread labor activism and threatened by fears of communism the American Constitutional Association in West Virginia one of dozens of similar organizations nationwide articulated principles that identified the well being of business with the well being of the country With easy access to teacher training and classroom programs antiunion forces had by 1923 rolled back the wartime gains of the United Mine Workers of America Middle class voluntary organizations like the American Legion and the West Virginia Federation of Women's Clubs helped implant mandated loyalty in schoolchildren Far from being isolated during America's transformation into a world power West Virginia was squarely in the mainstream The state's people and natural resources were manipulated into serving crucial functions as producers and fuel for the postwar economy Hennen's study therefore is a study less of the power or force of ideas than of the importance of access to the means to transmit ideas The winner of the 1995 Appalachian Studies Award is a significant contribution to regional studies as well as to our understanding of American culture during and after World War I
