The Therapy Relationship Richard Hallam, 2018-05-08 This book proposes that the age old rules and virtues of friendship lie at the heart of all forms of psychotherapy and counselling It explains the philosophical technical political and ethical aspects of three different approaches to therapy *Transforming Enterprise?* Andrew Yancey, 2020-03-25 How does Christian faith integrate with capitalism This question has been at the heart of Christian ethics for more than three hundred years but rarely as complex and important as now The polarizing influence of consumer capitalism has extended into virtually every domain of human life On the one hand capitalism has contributed to increases in standards of living and life expectancy especially among those in extreme poverty On the other it has exacerbated income inequality environmental damages and social displacement For contemporary American evangelical theology this is problematic It has long been on a quest to show that Christian faith harmonizes with capitalistic enterprise But can faith harness the transformational power of consumer capitalism without being affected by its excesses For many the election of Donald Trump as president has revealed a great divide within American evangelicalism about the links between Christianity economic power and moral character Working from the field of academic practical theology in interdisciplinary dialogue with business management ethics *Transforming Enterprise* shows why and how a reframing of the relationship between Christian faith and capitalistic enterprise is needed in the contemporary postsecular milieu Innovations in Psychosocial Interventions for Psychosis Alan Meaden, Andrew Fox, 2015-03-24 Despite the steady acceptance of psychological interventions for people with psychosis in routine practice

many people continue to experience problems in their recovery The need to develop new approaches particularly for those who are more difficult to engage and have significant co morbidities is therefore important Innovations in Psychosocial Interventions for Psychosis positions psychological formulation as a key organising principle for the delivery of care within multidisciplinary teams The interventions described all have the common theme of supporting recovery and achieving goals that are of primary importance to the service user which targets interventions on broader obstacles to recovery Along with their experienced contributors Alan Meaden and Andrew Fox introduce new developments in psychological interventions for people affected by psychosis who are hard to reach working in a variety of settings with people at various stages of recovery The book is divided into three parts In part one brief interventions and approaches aimed at promoting engagement are described as interventions in their own right Part two is focused on longer term interventions with individuals Some of these highlight new developments in the evidence base whilst others draw on work applied less frequently to psychosis drawing from the broader psychological therapy practice based evidence field In part three attention is given to innovations in group settings and those aimed at promoting greater multidisciplinary working in settings where a whole team approach is needed Each chapter describes the theory underpinning a different approach its development key strategies principles and stages and contain case examples that illustrate the use of the approach in a clinical setting Innovations in Psychosocial Interventions for Psychosis will be an invaluable resource to professionals working with this client group including clinical and counselling psychologists psychiatrists and other allied health professionals

Embracing Disillusionment Frank Gruba-McCallister, 2020-06-19. *Embracing Disillusionment: Achieving Liberation Through the Demystification of Suffering* employs a multidisciplinary examination of the relationship between oppression and suffering. Written for professionals as well as the general public, a framework is provided for understanding the causes and forms of oppression and why these constitute injustice, the dynamics of self-deception and how ideology utilizes these to portray the social causes of suffering as individual and intrapsychic maladies and the ways in which illusions spun by the powerful stifle awareness and undermine opposition and dissent. Having provided this foundation, a path for openly facing and accepting the suffering inflicted by oppression is provided. Exposing toxic illusions can be a wake-up call that brings with it pain, fear and anger. However, these responses can be transformed into powerful forces for personal and collective liberation. Working hand in hand with those whose minds and hearts have been opened to the costs of social injustices due to neoliberalism, a different and more compassionate way of being that promotes the optimal well-being of all is possible.
