Power Of Human Rights:

The Power of Human Rights/The Human Rights of Power Louiza Odysseos, Anna Selmeczi, 2018-10-11 The contributions to this volume eschew the long held approach of either dismissing human rights as politically compromised or glorifying them as a priori progressive in enabling resistance Drawing on plural social theoretic and philosophical literatures and a multiplicity of empirical domains they illuminate the multi layered and intricate relationship of human rights and power They highlight human rights incitement of new subjects and modes of political action marked by an often unnoticed duality and indeterminacy Epistemologically distancing themselves from purely deductive theory driven approaches the contributors explore these linkages through historically specific rights struggles This in turn substantiates the commitment to avoid reifying the Third World as merely the terrain of fieldwork proposing it instead as a legitimate and necessary site of theorising This book was originally published as a special issue of Third World Quarterly *The Power of Human Rights* Thomas Risse, Stephen C. Ropp, Kathryn Sikkink, 1999-08-05 This book celebrated the 50th anniversary of the Universal Declaration of Human Rights by showing how global human rights norms have influenced national government practices in eleven different countries around the world Had the principles articulated in the Declaration had any effect on the behavior of states towards their citizens What are the conditions under which international human rights norms are internalized in domestic practices And what can we learn from this case about why how and under what conditions international norms in general influence the actions of states This book draws on the work of social constructivists to examine these important issues The contributors examine eleven countries representing five different world regions Northern Africa Sub Saharan Africa Southeast Asia Latin America and Eastern Europe drawing practical lessons for activists and policy makers concerned with preserving and extending the human rights gains made during the past fifty years Corporate Power and Human Rights Manette Kaisershot, Nicholas Connolly, 2018-02-02 There is ample evidence about the negative effects business activity of all types can have on the provision of human rights Equally there can be little doubt economic development usually driven through business activity and trade is necessary for any state to provide the institutions and infrastructure necessary to secure and provide human rights for their citizens The United Nations and businesses recognise this tension and are collaborating to effect change in business behaviours through voluntary initiatives such as the Global Compact and John Ruggie s Guiding Principles Yet voluntary approaches are evidently failing to prevent human rights violations and there are few alternatives in law for affected communities to seek justice This book seeks to robustly challenge the current status quo of business approaches to human rights in order to develop meaningful alternatives in an attempt to breach the gap between the realities of business and human rights and its discourse This book was previously published as a special issue of the International Journal of Human Rights *Human Rights, Power and Civic Action* Bård A. Andreassen, Gordon Crawford, 2013-07-18 Human Rights Power and Civic Action examines the interrelationship between struggles for human

rights and the dynamics of power focusing on situations of poverty and oppression in developing countries It is argued that the concept of power is a relatively neglected one in the study of rights based approaches to development especially the ways in which structures and relations of power can limit human rights advocacy Therefore this book focuses on how local and national struggles for rights have been constrained by power relations and structural inequalities as well as the extent to which civic action has been able to challenge alter or transform such power structures and simultaneously to enhance protection of people s basic human rights Contributors examine and compare struggles to advance human rights by non governmental actors in Cambodia China Ghana Kenya South Africa and Zimbabwe The country case studies analyse structures of power responsible for the negation and denial of human rights as well as how rights promoting organisations challenge such structures Utilising a comparative approach the book provides empirically grounded studies leading to new theoretical understanding of the interrelationships between human rights struggles power and poverty reduction Human Rights Power and Civic Action will be of interest to students and scholars of human rights politics power development and governance

Human Rights and the Body Annabelle Mooney,2016-05-13 Human Rights and the Body is a response to the crisis in human rights to the very real concern that without a secure foundation for the concept of human rights their very existence is threatened While there has been consideration of the discourses of human rights and the way in which the body is written upon research in linguistics has not yet been fully brought to bear on either human rights or the body Drawing on legal concepts and aspects of the law of human rights Mooney aims to provide a universally defensible set of human rights and a foundation or rather a frame for them She argues that the proper frames for human rights are firstly the human body seen as an index reliant on the natural world secondly the globe and finally language These three frames generate rights to food water sleep and shelter environmental protection and a right against dehumanization This book is essential reading for researchers and graduate students in the fields of human rights and semiotics of law

Business and Human Rights César Rodríguez-Garavito,2017-09-21 The regulation of business in the global economy poses one of the main challenges for governance as illustrated by the dynamic scholarly and policy debates about the UN Guiding Principles on Business and Human Rights and a possible international treaty on the matter This book takes on the conceptual and legal underpinnings of global governance approaches to business and human rights with an emphasis on the Guiding Principles GPs and attention to the current treaty process Analyses of the GPs have tended to focus on their static dimension such as the standards they include rather than on their capacity to change to push the development of new norms and practices that might go beyond the initial content of the GPs and improve corporate compliance with human rights This book engages both the static and dynamic dimensions of the GPs and considers the issue through the eyes of scholars and practitioners from different parts of the world

International Studies Scott Straus,Barry Driscoll,2018-09-10 The challenge of teaching international studies is to help you think coherently about the multiple causes and effects of global problems In International

Studies Global Forces Interactions and Tensions award winning scholars Scott Straus and Barry Driscoll give you a clear framework that pinpoints how key factors forces interactions and tensions contribute to world events with both global and local consequences The authors first show you how to look for common patterns in global issues by introducing four world shaping forces global markets shifting centers of power information and communications technologies and global governance They systematically trace how these forces prompt interactions among world actors and thus give rise to a set of tensions that spur key challenges The framework enables you to ask and answer for yourself Who is interacting Where did such interactions develop What policies or institutions govern them Why are they getting certain global and local reactions You are then apply the framework to the global problems that matter most to you human rights abuses economic inequality terrorism forced migration pandemics and global health responses climate change food security and more International Studies raises the bar for the Introduction to IS course moving beyond interdisciplinary and into the realm of critical analysis to increase student relevancy and motivation

Lethal Force, the Right to Life and the ECHR Stephen Skinner,2019-08-22 In its case law on the use of lethal and potentially lethal force the European Court of Human Rights declares a fundamental connection between the right to life in Article 2 of the European Convention on Human Rights and democratic society This book discusses how that connection can be understood by using narrative theory to explore Article 2 law s specificities and its deeper historical social and political significance Focusing on the domestic policing and law enforcement context the book draws on an extensive analysis of case law from 1995 to 2017 It shows how the connection with democratic society in Article 2 s substantive and procedural dimensions underlines the right to life s problematic duality as an expression of a basic value demanding a high level of protection and a contextually limited provision allowing states leeway in the use of force

Emphasising the need to identify clear standards in the interpretation and application of the right to life the book argues that Article 2 law s narrative dimensions bring to light its core purposes and values These are to extract meaning from pain and death ground democratic society s foundational distinction between acceptable force and unacceptable violence and indicate democratic society s essential attributes as a restrained responsible and reflective system Reform and Development of Powers and Functions of China's Criminal Proceedings Weidong Chen,2020-10-15 This book addresses the basic theory of criminal procedure in China together with recent reforms Balancing the powers of public security and judicial organs with the rights of individual citizens it assesses the nature of Chinese criminal proceedings In the basic theoretical research section the author drawing on the latest findings from the legal community systematically and comprehensively presents the current trends main research topics and the main problems that should be explored in future research into criminal procedure law in China further the author explains the basic thinking behind the revision of criminal procedure law and the allocation of judicial resources in criminal procedure and criminal justice The policy basic theory and operation problems of judicial power procuratorial power police power defense power and judicial reform are subsequently explained and evaluated The general writing style used is intentionally straightforward making the book easily accessible for the readers Based on the author s substantial working experience in the area of criminal law it offers a highly intuitive reading experience **Foreign**

Australia's Human Rights Scrutiny Regime Adam Fletcher, 2018-09-17 In 2010 the Australian Government decided that it would not propose a Human Rights Act despite the relevant recommendation of the 2008 09 National Human Rights Consultation Instead it introduced a Human Rights Framework comprising several measures to enhance human rights protection including the Human Rights Parliamentary Scrutiny Act 2011 The scrutiny regime under that Act was designed to ensure rights would be given due consideration before Commonwealth legislation was passed The Act created a unique bipartite dialogue system involving a formal interchange on rights compatibility between the executive and Parliament while excluding the courts This set the Commonwealth apart from jurisdictions such as the ACT Victoria New Zealand and the UK which have statutory rights instruments administered by their courts The book presents a detailed study of all aspects of the scrutiny regime and compares the regime with its closest counterparts overseas In assessing the regime's impact it argues that a system in which the executive and Parliament are

responsible both for protecting rights and for remedying rights breaches is neither more legitimate nor more effective than one involving all three branches of government Accordingly it calls for strengthening reforms
