Crisler,2021-06-18 *An Intertextual Commentary on Romans* is an exhaustive treatment of the hundreds of Old Testament citations allusions and echoes embedded in Paul s most famous epistle As many scholars have acknowledged to understand Paul s engagement with Israel s Scriptures is to understand Romans Despite this acknowledgment there is a dearth of reference works in which the primary focus is how the Old Testament impacts Paul s argument from Romans 1 1 to 16 27 This four volume commentary aims to provide just such a reference The interplay between Romans and its vast sea of Old Testament pre texts produces unstated points of resonance that illuminate Paul s rhetorical argument from the letter s opening to its closing doxology Volume 1 examines the Old Testament pre texts in Romans 1 1 4 25 Although the citations of Habakkuk 2 4 and Genesis 15 6 in this section of the letter often dominate intertextual discussions several other Old Testament pre texts though often overlooked support the intertextual subtext of the letter and thereby illuminate various features of Paul s argument In this commentary each of these pre texts is examined from a variety of perspectives The overarching aim of the commentary is to

Religion and the Demise of Liberal Rationalism J. Judd

Owen,2001-07 If liberalism is premised on inclusion pluralism and religious neutrality can the separation of church and state be said to have a unitary and rational foundation If we accept that there are no self evident principles of morality or politics then doesn t any belief in a rational society become a sort of faith And how can liberalism mediate impartially between various faiths as it aims to do if liberalism itself is one of the competing faiths J Judd Owen answers these questions with a remarkable critical analysis of four twentieth century liberal and postliberal thinkers John Dewey John Rawls and most extensively Richard Rorty and Stanley Fish His unique readings of these theorists and their approaches to religion lead him to conclusions that are meticulously constructed and surprising arguing against the perception of liberalism as simple moral or religious neutrality calling into question the prevailing justifications for separation of church and state and challenging the way we think about the very basis of constitutional government

Lived Fictions John Grant,2018-03-15

The idea of political unity or belonging contains its own opposite because a political community can never guarantee the equal status of all its members The price of belonging is an entrenched social stratification and hierarchy within the political unit itself Lived Fictions explores how the notion of political unity generates a collective commitment to imagining the structure of Canadian society These political imaginaries the citizen state the market economy and so forth are lived fictions They orient our national identity and shape our understanding of political legitimacy responsibility and action John Grant persuasively details why the project of political unity fails it distorts our lived experiences and allows inequality and

domination to take root Canada promises unity through democratic politics reconciliation with Indigenous peoples a welfare state that protects the vulnerable and a multicultural approach to cultural relations This book documents the historical failure of these promises and elaborates the kinds of radical institutional and intellectual changes needed to overcome our lived fictions *The Palgrave Handbook of Development Economics* Machiko Nissanke, José Antonio Ocampo, 2019-08-12 This Handbook responds to the needs and aspirations of current and future generations of development economists by providing critical reference material alongside or in relation to mainstream propositions Despite the potential of globalisation in accelerating growth and development in low and middle income countries through the spread of technology knowledge and information its current practice in many parts of the world has led to processes that are socially economically and politically and ecologically unsustainable It is critical for development economists to engage with the pivotal question of how to change the nature and course of globalisation to make it work for inclusive and sustainable development Applying a critical and pluralistic approach the chapters in this Handbook examine economics of development paths under globalisation focusing on sustainable development in social environmental institutional and political economy dimensions It aims at advancing the frontier of development economics in these key aspects and generating more refined policy perspectives It is critically reflective in examining effects of globalisation on development paths to date and in terms of methodological and analytical approaches as well as forward thinking in policy perspectives with a view to laying a foundation for sustainable development **The Saturday Evening Post**, 1924 **Classics of International Relations** Henrik Bliddal, Casper Sylvest, Peter Wilson, 2013-07-24 *Classics of International Relations* introduces contextualises and assesses 24 of the most important works on international relations of the last 100 years Providing an indispensable guide for all students of IR theory from advanced undergraduates to academic specialists it asks why are these works considered classics Is their status deserved Will it endure It takes as its starting point Norman Angell's best selling *The Great Illusion* 1909 and concludes with Daniel Deudney's award winning *Bounding Power* 2006 The volume does not ignore established classics such as Morgenthau's *Politics Among Nations* and Waltz's *Theory of International Politics* but seeks to expand the IR canon beyond its core realist and liberal texts It thus considers emerging classics such as Linklater's critical sociology of moral boundaries *Men and Citizens in the Theory of International Relations* and Enloe's pioneering gender analysis *Bananas Beaches and Bases* It also innovatively considers certain alternative format classics such as Kubrick's satire on the nuclear arms race *Dr Strangelove* and Errol Morris's powerful documentary on war and US foreign policy *The Fog of War* With an international cast of contributors many of them leading authorities on their subject *Classics of International Relations* will become a standard reference for all those wishing to make sense of a rapidly developing and diversifying field *Classics of International Relations* is designed to become a standard reference text for advanced undergraduates post graduates and lecturers in the field of IR **Energy Resource Conflict** Adrah N. Parafiniuk, Zachary A. Smith, 2025-01-23 Delve into the history of energy resource

conflicts their present status and the potential effects of today's energy production decisions on the future of humanity This book examines international and sometimes intranational conflicts over energy resources including ancient empires 20th century wars over oil and the explosive growth of renewable energy The volume begins with a series of chapters tracing the evolution and future implications of energy production and clashes over these vital resources Next readers will discover a collection of essays addressing fascinating yet sometimes contentious facets of the subject including the current limits of renewable energy sources and the role nuclear power should play A collection of 50 encyclopedic entries round out the book providing readers with concise explanations of key concepts and terms Energy resource conflicts have shaped the world we live in After humans settled across the planet growing empires began to compete for resources First they competed for wood then steel and coal The ability to mine these resources and turn them into trains ships and weapons decided which countries would dominate the world Oil became the most important international resource by the turn of the 20th century and has remained so until the present day But as the authors argue humans have the technology to transition from fossil fuels to renewable energy for the vast majority of their energy needs despite corporate fossil fuel interests Using advanced statistics on the use and growth of all major energy sources this book is an excellent source of information on the predicted growth of various forms of energy as well as the inevitable yet not necessarily peaceful transition toward renewable and carbon free energy sources

The Cross in Contexts Raheb, Mitri, Henderson, Suzanne Watts, 2017-04-20 Why did Jesus die And in what ways did his crucifixion offer redemption to the world Those questions which lie at the heart of Christian faith remain a pressing concern for theological reflection What sets this work apart is that the authors a Palestinian theologian from Bethlehem and a New Testament scholar from the United States explore the meaning of the cross in light of both first and twenty first century Palestinian contexts Together their insights coalesce around themes that expose the divine power of the cross both for Jesus first followers and for contemporary readers alike
