Toons That Teach Steven Case, 2009-08-30. That's NOT All Folks! Cartoons feature fun characters, catchy music, and hilarious stories, but if that's all you think they're good for, you're missing out. Behind the wacky dramas and laugh-out-loud gags, cartoons can teach viewers a little something about life about themselves, even about God. Author Steven Case explores the world of cartoons for subtle spiritual principles. He gives these modern fables the respect they're due by calling attention to important topics such as Friendship, Integrity, Motivation, Prayer. Open the door to serious discussion by breaking the ice with laughter. As Paul writes, there is a basic holiness that permeates all things. *Toons That Teach* shows us how to look for the presence of the Holy Spirit in the most unlikely of places. By providing tools and lessons on how to connect the sacred and the animated, students will learn to recognize biblical principles anywhere and everywhere.

Teaching Media in Primary Schools Cary Bazalgette, 2010-09-21. Children growing up in the 21st century need to understand the full range of media available to them, both as sources of information and entertainment, and as a means of communicating and sharing ideas. Embedded in the primary curriculum, media education enables children to become more fully literate for the digital age. Grounded in best classroom practice, this book aims to help you think about the role of media in children's lives and to teach about media effectively in your classroom. Three dimensions of media education for the 3-11 age range are highlighted: children's own cultural experiences, the development of critical awareness, and opportunities for creative expression. The chapters are written by literacy advisors, leading academics, teacher trainers, and classroom practitioners. Topics covered include understanding children's relationships with media and how to build on these constructively; getting to grips with multimodality; developing children's critical skills through watching and analysing moving image media; broadening children's experiences of different kinds of media and their media literacy; creative media activities that promote imaginative thinking and decision making; the importance of social networking and social media; and how to use these in the classroom. In an increasingly digital world, media education is an essential part of good teaching, not

just as a tool to teach the more traditional aspects of the curriculum but in its own right as an essential part of literacy This book is relevant to all teachers working in Primary schools and will be particularly helpful for Literacy Co ordinators
