**Historical Dictionary of the Inuit** Pamela R. Stern, 2013-09-26 The Inuit do not represent a very large population only 160 000 or so spread over a very large portion of the Arctic region and located in four different countries Although they are a people there are many variations from one group to the next and any study of them must consider both similarities and differences The Historical Dictionary of the Inuit introduces us to the Inuit as they actually are and not as they have been traditionally pictured and some would still like to see them looking after their traditional chores and engaged in time honored practices but rather as a modern people trying to shape their worlds in their own interest This second edition includes an updated chronology as well as an introduction to provide a broader view of who the Inuit are where they live and what they do But it is the dictionary section that is most interesting with many new informative entries on persons places events and institutions shedding light not only on the culture but also on the society economy and politics For those seeking further information there is a considerably expanded bibliography This book is an excellent access point for students researchers and anyone wanting to know more about the Inuit Religion, Society, And Psychoanalysis Janet L Jacobs, 2018-02-12

Distinguished contributors provide an overview of three generations of psychoanalytic theory including the work of Freud Horney Winnicott and Kristeva and discuss the evolution of psychoanalytic thought as it relates to the role that religion plays in modern culture Religion clearly remains a powerful social and political force in Western society Freudian based theory continues to inform psychoanalytic investigations into personality development gender relations and traumatic disorders Using a historical framework this collection of new essays brings together contemporary scholarship on religion and psychoanalysis These various yet related psychoanalytic interpretations of religious symbolism and commitment offer a unique social analysis on the meaning of religion Beginning with Freud's views on religion and mystical experience and continuing with those of Horney Winnicott Kristeva Miller and others this volume surveys the work of three generations of psychoanalytic theorists Special attention is given to objects relations theory and ego psychology as well as to the recent work from the European tradition Distinguished contributors provide a basic overview of a given theorist's scholarship and discuss its place in the evolution of psychoanalytic thought as it relates to the role that religion plays in modern culture Religion Society and Psychoanalysis marks a major interdisciplinary step forward in filling the void in the social psychology of

religion It is an extremely useful handbook for students and scholars of psychology and religion *Singing the Soul Back Home* Caitlin Matthews, 2003-02-01 Since it was first published in 1995 this primer on practical everyday spirituality as practiced through shamanism has become a sought after classic Now revised and available in paperback for the first time this attractive edition with line drawings throughout offers a wide audience ways to connect with their own shamanic power If you feel distanced from nature trapped in a material society without meaning or purpose shamanic wisdom can offer you some answers Caitlin Matthews shows how respect and wonder for nature combined with spiritual joy and healing are the essence of the shaman's holistic vital world In *Singing the Soul Back Home* she leads readers through a structured learning program of more than 80 exercises that will help them master the skills of the shaman With practice and sensitivity anyone can become a walker between the worlds aware not only of their own physical reality but also of the subtle spiritual reality of the shaman Following this path will stimulate your creative energies and make you more aware of your own innate healing powers

**Explorations in Psychoanalytic Ethnography** Jadran Mimica, 2007-05-01 Whereas most anthropological research is grounded in social cultural and biological analysis of the human condition this volume opens up a different approach its concerns are the psychic depths of human cultural life worlds as explored through psychoanalytic practice and or the psychoanalytically framed ethnographic project In fact some contributors here argue that the anthropological interpretation of human existence is not sustainable without psychoanalysis others take a less extreme radical stance but still maintain that the unconscious matrix of the human psyche and of the intersubjective social reality of any given cultural life world is a vital domain of anthropological and sociological inquiry and understanding

**The Matrix and Meaning of Character** Nancy J. Dougherty, Jacqueline J. West, 2013-12-02 Character structures underlie everyone's personality When rigidly defended they limit us yet as they become more flexible they can reveal sources of animation renewal and authenticity *The Matrix and Meaning of Character* guides the reader into an awareness of the archetypal depths that underlie character structures presenting an original developmental model in which current analytic theories are synthesised The authors examine nine character structures animating them with fairy tales mythic images and case material creating a bridge between the traditional language of psychopathology and the universal realm of image and symbol This book will appeal to all analytical psychologists psychoanalysts and psychotherapists who want to strengthen their clinical expertise It will help clinicians to extend their clinical insights beyond a strictly behavioural medical or cognitive approach revealing the potential of the human spirit

*The Sea Can Wash Away All Evils* Kimberley Christine Patton, 2007 Kimberley Patton examines the environmental crises facing the world's oceans from the perspective of religious history Much as the ancient Greeks believed and Euripides wrote that the sea can wash away all evils a wide range of cultures have sacralized the sea trusting in its power to wash away what is dangerous dirty and morally contaminating The sea makes life on land possible by keeping it pure Patton sets out to learn whether the treatment of the world's oceans by industrialized nations arises from the same faith

in their infinite and regenerative qualities Indeed the sea s natural characteristics such as its vast size and depth chronic motion and chaos seeming biotic inexhaustibility and unique composition of powerful purifiers salt and water support a view of the sea as a no place capable of swallowing limitless amounts of waste And despite evidence to the contrary the idea that the oceans could be harmed by wasteful and reckless practices has been slow to take hold Patton believes that environmental scientists and ecological advocates ignore this relationship at great cost She bases her argument on three influential stories Euripides tragedy Iphigenia in Tauris an Inuit myth about the wild and angry sea spirit Sedna who lives on the ocean floor with hair dirtied by human transgression and a disturbing medieval Hindu tale of a lethal underwater mare She also studies narratives in which the sea spits back its contents sins corpses evidence of guilt long sequestered suggesting that there are limits to the ocean s vast salty heart In these stories the sea is either an agent of destruction or a giver of life yet it is also treated as a passive receptacle Combining a history of this ambivalence toward the world s oceans with a serious scientific analysis of modern marine pollution Patton writes a compelling cross disciplinary study that couldn t be more urgent or timely

Ecocriticism Serenella Iovino,Serpil Oppermann,2014-09-24 Material Ecocriticism offers new ways to analyze language and reality human and nonhuman life mind and matter without falling into well worn paths of thinking Bringing ecocriticism closer to the material turn the contributions to this landmark volume focus on material forces and substances the agency of things processes narratives and stories and making meaning out of the world This broad ranging reflection on contemporary human experience and expression provokes new understandings of the planet to which we are intimately connected

**Western Esotericism and the Science of Religion** International Association for the History of Religions. Congress,International Association for the History of Religions,1998 This volume is based upon papers read during the innovative section Western Esotericism and the Science of Religion organized at the 17th International Congress of the International Association for the History of Religions IAHR in Mexico City August 5 12 1995 The section was created in order to fill a long standing hiatus in the academic study of religions whereas phenomena such as gnosticism and hermetism in antiquity and even the occult sciences of that period have long been recognized as subjects worthy of serious investigation the history of similar and related phenomena in more recent periods has hardly received the same measure of scholarly

attention and recognition The present volume is devoted to the academic emancipation of these areas as constituting a legitimate domain of research which may be referred to by the generic label western esotericism Preceded by an introductory essay on the birth of this new discipline in the study of religion the volume provides a sample of current research in the field and devotes special attention to some central methodological questions *Inuit Shamanism and Christianity* Frédéric B. Laugrand, Jarich G. Oosten, 2010-01-01 Using archival material and oral testimony collected during workshops in Nunavut between 1996 and 2008 Frédéric Laugrand and Jarich Oosten provide a nuanced look at Inuit religion offering a strong counter narrative to the idea that traditional Inuit culture declined post contact They show that setting up a dichotomy between a past identified with traditional culture and a present involving Christianity obscures the continuity and dynamics of Inuit society which has long borrowed and adapted outside elements They argue that both Shamanism and Christianity are continually changing in the Arctic and ideas of transformation and transition are necessary to understand both how the ideology of a hunting society shaped Inuit Christian cosmology and how Christianity changed Inuit shamanic traditions *A Stranger Shore* Betty Greenway, 1998 Examines over thirty of Mollie Hunter's fantasies historical novels realistic novels of modern life and nonfiction essays on writing for children In this book Greenway offers the first full length study of the works of Mollie Hunter **Fictionalizing Anthropology** Stuart J. McLean, 2017-11-22 What might become of anthropology if it were to suspend its sometime claims to be a social science What if it were to turn instead to exploring its affinities with art and literature as a mode of engaged creative practice carried forward in a world heterogeneously composed of humans and other than humans Stuart McLean claims that anthropology stands to learn most from art and literature not as evidence to support explanations based on an appeal to social context or history but as modes of engagement with the materiality of expressive media including language that always retain the capacity to disrupt or exceed the human projects enacted through them At once comparative in scope and ethnographically informed *Fictionalizing Anthropology* draws on an eclectic range of sources including ancient Mesopotamian myth Norse saga literature Hesiod Lucretius Joyce Artaud and Lispector as well as film multimedia and performance art along with the concept of fabulation the making of fictions capable of intervening in and transforming reality developed in the writings of Bergson and Deleuze Sharing with proponents of anthropology's recent ontological turn McLean insists that experiments with language and form are a performative means of exploring alternative possibilities of collective existence new ways of being human and other than human and that such experiments must therefore be indispensable to anthropology's engagement with the contemporary world **Mystical Moments and Unitive Thinking** Daniel Merkur, 1999-01-01 Building on the psychoanalytic object relations theory that the self is always in relationship with an object Merkur argues that the solipsism of some varieties of mystical union always implies unconscious ideas of a love object who is transcendent **Native Plant Stories** Joseph Bruchac, 1995 A collection of Native American nature stories which focus on the importance of plants

*Emotional Experience and Religious Understanding* Mark Wynn, 2005-05-26 Wynn tackles established topics in philosophical theology in the light of new perspectives on emotions      On Kings Marshall Sahlins, David Graeber, 2017-12-15 In anthropology as much as in popular imagination kings are figures of fascination and intrigue heroes or tyrants in ways presidents and prime ministers can never be This collection of essays by two of the world's most distinguished anthropologists David Graeber and Marshall Sahlins explores what kingship actually is historically and anthropologically As they show kings are symbols for more than just sovereignty indeed the study of kingship offers a unique window into fundamental dilemmas concerning the very nature of power meaning and the human condition Reflecting on issues such as temporality alterity and utopia not to mention the divine the strange the numinous and the bestial Graeber and Sahlins explore the role of kings as they have existed around the world from the BaKongo to the Aztec to the Shilluk and beyond Richly delivered with the wit and sharp analysis characteristic of Graeber and Sahlins this book opens up new avenues for the anthropological study of this fascinating and ubiquitous political figure      **Introducing the Mythological Crescent** Harald Haarmann, Joan Marler, 2008 There is a broad cultural region with related traditions of mythical beliefs interconnected by long term contacts during prehistoric times This area called here the Mythological Crescent is a zone of cultural convergence that extends from the ancient Middle East via Anatolia to southeastern Europe opening into the wide cultural landscape of Eurasia The very old interconnections between Eurasia and Anatolia are explored in this study for the first time In a comparative view striking similarities can be reconstructed for the ancient belief systems and the imagery of both regions which suggest convergent cosmological conceptualizations of high age The beliefs and ritual practices of the indigenous peoples of Eurasia are rooted in the shamanism of the oldest cultural layers of the Palaeolithic Although socioeconomic development in Anatolia was markedly different from cultural evolution in Eurasia the hunters and gatherers in Anatolia who adopted sedentary lifeways did not entirely lose their ancient beliefs during the transition to plant cultivation in the eighth millennium BCE Archaic beliefs and imagery fused with new practices and innovations during the development of agrarian societies One diagnostic motif which was perpetuated from the Palaeolithic to the Neolithic and beyond is represented by the production of female figurines statuettes Their significance for communal life has been linked to spiritual concepts of the continuity of life the vegetation cycle and the protection of the natural habitat of all living things as recorded in myths and historical folk art of Uralic and other peoples The bear plays a significant role as a mythical animal in the imagery of Eurasia whereas this motif was lost in Anatolia during the transition from antiquity to the Middle Ages

*Reading the Body* Alison E. Rautman, 2000 In this volume classical archaeologists and anthropologists discuss mutually beneficial perspectives in method and theory as these relate to issues of gender      People of Ancient Daunia Camilla Norman, 2024-06-01 The statue stelae of Early Iron Age Daunia north Apulia Italy a group of stone slabs are each incised to represent the garb and accoutrements of a person They detail the clothing and adornment worn by men and women in full

regalia plus through additional figurative images drawn on the robes show ritual practices everyday activities and scenes of local legend As such they offer an unparalleled window into the lives of a proto historic people providing a rich source of self representation for what is otherwise a fairly poorly understood society Grounded in the scholarship of post colonial and gender archaeology this book pays full respect to the agency of indigenous communities and the important role of women It considers the stelae not through a Hellenic lens but in the Italo Adriatic context to which they belong This is the first time an in depth holistic study of the Daunian stelae has been undertaken and the first presentation of the material in English
