Practical Evaluation For Educators Finding What Works And What Doesnt

Roger A. Kaufman

Practical Evaluation For Educators Finding What Works And What Doesn't:

Practical Evaluation for Educators Roger Kaufman, Ingrid Guerra, William A. Platt, 2005-07-20 Roger Kaufman and his colleagues have produced what is simply the best practical book on educational evaluation published in the past few years. It is current, clearly written, and structured in a way that educators can apply it in a huge variety of educational contexts. Richard Clark, Professor, University of Southern California. As an evaluation book written for educators and education, this publication delivers on its promise. It provides a practical, professional, and comprehensive approach for planning and conducting evaluation studies that are meaningful and effective for understanding and improving the education enterprise. Dale W. Lick, Professor, College of Education, Florida State University, Tallahassee. The book describes how to ask and answer the right questions in order to measure the gaps in results and their consequences. Readers will be able to custom tailor an evaluation plan for their specific situations. Practical examples and scenarios, along with how to do it, guides show readers how to apply the concepts and tools presented. James D. Russell, EdD, Professor, Visiting Research Associate, Educational Psychology and Learning Systems Institute, Florida State University, Tallahassee. This book puts evaluation in a framework of societal needs while simultaneously being results oriented and practical. This is a unique combination of how to with why that is of immense importance in the present time when the public value of education seems to have been lost while citizens also demand specifics. Elizabeth D. Capaldi, Vice Chancellor, Chief of Staff, State University of New York. Use program evaluations to define measurable results and deliver meaningful outcomes. Finding a straightforward approach to educational evaluations is the most important step toward discovering and reporting the meaningful results underlying the hard work of education. Kaufman, Guerra, and Platt present program evaluation as a trouble-free process that any educator can effectively complete while providing the evidence required to justify and validate any educational endeavor. Drawing from the education business and military fields, this accessible resource shows educators, administrators, politicians, learners, and parents how to distill evaluations to uncover what works and what doesn't. *Practical Evaluation for Educators* breaks down the program evaluation process into four easy-to-understand steps: Align and direct evaluation questions into useful queries aimed at the intended results of educational programs; Observe to gather pertinent, valid, and useful data; Compare the results of what was accomplished to what was planned to be accomplished; Use the data by taking action and adjusting programs to bring them into alignment with societal needs. When educators see evaluation as a simple, useful tool for improving programs, measurable results become meaningful.

Measuring What We Do in Schools Victoria L. Bernhardt, 2017-06-06 What is a true learning organization and how can your school become one? To excel, schools must embrace continuous school improvement and evaluation as well as systems thinking. In *Measuring What We Do in Schools*, author Victoria L. Bernhardt details the critical role program evaluation serves in school success and how to implement meaningful evaluations that make a difference. She provides a roadmap of how to conduct comprehensive systemwide evaluations of programs and processes, the tools needed to

obtain usable pertinent information and how to use these data to expand teachers and administrators data informed decision making focus Educators will learn how to Assess what is working and not working for students Determine which processes need to change Use data to improve practices on an ongoing basis Although challenging for many schools program evaluation and data analysis can begin with a single program or process over time building on the expanded knowledge of the school s processes and the results they produce An effective tool The Program Evaluation Tool enables schools to easily identify the purpose and intended outcomes of any school program along with whom it serves and how it should be implemented monitored and evaluated These data can then be used to improve every aspect of a school s programs and processes and the outcomes achieved Filled with practical strategies and featuring an in depth case study this book is designed to help educators see that evaluation work is logical and easy to do They ll gain the confidence to do this work on a regular basis working together to become a true learning organization The Assessment Book Roger A. Kaufman,2008 This book contains seven self assessments designed to help one define the issue of what to accomplish before deciding how to accomplish it The assessments presented are 1 strategic thinking and planning 2 needs assessment and your organization 3 corporate culture and your organization 4 evaluation and your organization 5 performance improvement competencies 6 performance motivation to change and 7 organizational readiness for e learning Includes bibliographical references
