Practical Evaluation For Educators Finding What Works And What Doesn't:

Practical Evaluation for Educators Roger Kaufman, Ingrid Guerra, William A. Platt, 2005-07-20 Roger Kaufman and his colleagues have produced what is simply the best practical book on educational evaluation published in the past few years. It is current, clearly written, and structured in a way that educators can apply it in a huge variety of educational contexts. Richard Clark, Professor, University of Southern California. As an evaluation book written for educators and education, this publication delivers on its promise. It provides a practical, professional, and comprehensive approach for planning and conducting evaluation studies that are meaningful and effective for understanding and improving the education enterprise. Dale W. Lick, Professor, College of Education, Florida State University, Tallahassee. The book describes how to ask and answer the right questions in order to measure the gaps in results and their consequences. Readers will be able to custom tailor an evaluation plan for their specific situations. Practical examples and scenarios, along with how to do it, guides show readers how to apply the concepts and tools presented. James D. Russell, EdD, Professor, Visiting Research Associate, Educational Psychology and Learning Systems Institute, Florida State University, Tallahassee. This book puts evaluation in a framework of societal needs while simultaneously being results oriented and practical. This is a unique combination of how to with why that is of immense importance in the present time when the public value of education seems to have been lost while citizens also demand specifics. Elizabeth D. Capaldi, Vice Chancellor, Chief of Staff, State University of New York. Use program evaluations to define measurable results and deliver meaningful outcomes. Finding a straightforward approach to educational evaluations is the most important step toward discovering and reporting the meaningful results underlying the hard work of education. Kaufman, Guerra, and Platt present program evaluation as a trouble-free process that any educator can effectively complete while providing the evidence required to justify and validate any educational endeavor. Drawing from the education business and military fields, this accessible resource shows educators, administrators, politicians, learners, and parents how to distill evaluations to uncover what works and what doesn't. *Practical Evaluation for Educators* breaks down the program evaluation process into four easy-to-understand steps: Align and direct evaluation questions into useful queries aimed at the intended results of educational programs; Observe to gather pertinent, valid, and useful data; Compare the results of what was accomplished to what was planned to be accomplished; Use the data by taking action and adjusting programs to bring them into alignment with societal needs. When educators see evaluation as a simple, useful tool for improving programs, measurable results become meaningful. *The Assessment Book* Roger A. Kaufman, 2008. This book contains seven self-assessments designed to help one define the issue of what to accomplish before deciding how to accomplish it. The assessments presented are: 1. strategic thinking and planning; 2. needs assessment and your organization; 3. corporate culture and your organization; 4. evaluation and your organization; 5. performance improvement competencies; 6. performance motivation to change; and 7. organizational readiness for e-learning.
