

Practical Evaluation of the Quality of the Evidence

What is the Relevance of Grading to the Research Question?

- Consider what is your purpose in grading the literature:
 - Grading a body of evidence for purposes of synthesis (quantitative)
 - Grading a select number of studies for inclusion in a dossier or other use (qualitative)
- Consider whether you are grading the quality of the evidence or the reporting of the evidence

“The strength of evidence grade summarizes the reviewers’ confidence in the findings based on either approach to evidence synthesis.” – AHRQ 2013

Evaluation and Translation Carol Maier, 2014-04-23 The definition of value or quality with respect to work in translation has historically been a particularly vexed issue Today however the growing demand for translations in such fields as technology and business and the increased scrutiny of translators work by scholars in many disciplines is giving rise to a need for more nuanced more specialized and more explicit methods of determining value Some refer to this determination as evaluation others use the term assessment Either way the question is one of measurement and judgement which are always unavoidably subjective and frequently rest on criteria that are not overtly expressed This means that devising more complex evaluative practices involves not only quantitative techniques but also an exploration of the attitudes preferences or individual values on which criteria are established Intended as an interrogation and a critique that can serve to prompt a more thorough and open consideration of evaluative criteria this special issue of The Translator offers examinations of diverse evaluative practices and contains both empirical and hermeneutic work Topics addressed include the evaluation of student translations using more up to date and positive methods such as those employed in corpus studies the translation of non standard language translation into the second language terminology the application of theoretical criteria to practice a social textual perspective and the reviewing of literary translations in the press In addition reviews by a number of literary translators discuss specific translations both into and out of English
