Modern Mathematics Dirk De Bock, 2023-03-08 The international New Math developments between about 1950 through 1980 are regarded by many mathematics educators and education historians as the most historically important development in curricula of the twentieth century It attracted the attention of local and international politicians of teachers and of parents and influenced the teaching and learning of mathematics at all levels kindergarten to college graduate in many nations After garnering much initial support it began to attract criticism But as Bill Jacob and the late Jerry Becker show in Chapter 17 some of the effects became entrenched This volume edited by Professor Dirk De Bock of Belgium provides an outstanding overview of the New Math modern mathematics movement Chapter authors provide exceptionally high quality analyses of the rise of the movement and of subsequent developments within a range of nations The first few chapters show how the initial leadership came from mathematicians in European nations and in the United States of America The background leaders in Europe were Caleb Gattegno and members of a mysterious group of mainly French pure mathematicians who since the 1930s had published under the name of a fictitious Nicolas Bourbaki In the United States there emerged during the 1950s various attempts to improve U S mathematics curricula and teaching especially in secondary schools and colleges This side of the story climaxed in 1957 when the Soviet Union succeeded in launching Sputnik the first satellite Undoubtedly this is a landmark publication in education The foreword was written by Professor Bob Moon one of a few other scholars to have written on the New Math from an international perspective The final epilogue chapter by Professor Geert Vanpaemel a historian draws together the overall thrust of the volume and makes links with the general history of curriculum development especially in science education including recent globalization trends **Primary**

Mathematics Pedagogy at the Intersection of Education Reform, Policy, and Culture Sarah Murray, Princess Allotey, 2021-11-29 This volume provides an in depth comparative examination of how primary mathematics education is influenced by national education reform policy local resources and culture in three different countries By drawing on first hand observations and interviews as well as analysis of policy documents and learning resources the book considers the viability of transferring best practices in primary mathematics education across global contexts Three diverse countries Ghana the US and Singapore are explored Similarities and differences are highlighted and the influence of national and regional initiatives related to pedagogical strategies teacher education and cultural expectations are considered to offer an insightful examination of how best practices might be shared across borders This book will benefit researchers academics and postgraduate scholars with an interest in international and comparative education mathematics and educational policy Those with a specialization in primary mathematics education including pedagogy and teacher preparation will also benefit from this book **Gender and Primary Schooling in Ghana** Ruby Avotri, 2000 [IJER Vol 22-N1](#) International Journal of Educational Reform, 2012-12-16 The mission of the International Journal of Educational Reform IJER is to keep readers up to

date with worldwide developments in education reform by providing scholarly information and practical analysis from recognized international authorities As the only peer reviewed scholarly publication that combines authors voices without regard for the political affiliations perspectives or research methodologies IJER provides readers with a balanced view of all sides of the political and educational mainstream To this end IJER includes but is not limited to inquiry based and opinion pieces on developments in such areas as policy administration curriculum instruction law and research IJER should thus be of interest to professional educators with decision making roles and policymakers at all levels turn since it provides a broad based conversation between and among policymakers practitioners and academicians about reform goals objectives and methods for success throughout the world Readers can call on IJER to learn from an international group of reform implementers by discovering what they can do that has actually worked IJER can also help readers to understand the pitfalls of current reforms in order to avoid making similar mistakes Finally it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers who help to study and shape the power base directing educational reform in the U S and the world

Basic Education beyond the Millennium Development Goals in Ghana David Balwanz, Peter Darvas, 2013-12-11 Expansion of basic education in Ghana was unprecedented and brought the country to the forefront in education in Africa The report provides analysis lessons and policy options to developing a post MDG strategic agenda for basic education

Comparative Analysis on Universal Primary Education Policy and Practice in Sub-Saharan Africa, 2015-01-01 Achieving Universal Primary Education UPE has received considerable attention since the early 1950s The concept of universal education is however not well defined and is used to mean many different things to different people This book contains a five year research work conducted by a group of African and Japanese researchers who have developed an equal partnership and network to review the expansion of primary education some policies prompting the free primary education intervention and the challenges of implementation based on the case study of two districts in four countries namely Ghana Kenya Malawi and Uganda The first part discusses issues related to administrative financial and perceptive issues related to UPE policies in each country case followed by the second part that focuses on quality of education and UPE policies The book contains various lessons learnt and implications for future education policies in developing countries

Dynamics and Policy Implications of the Global Reforms at the End of the Second Millennium Tukumbi Lumumba-Kasongo, 2021-12-28 Most people and indeed governments hold the conviction that reforms rather than revolutions are likely to produce more appropriate and acceptable results This is especially true for developing countries That is because reforms are gradual in their implementation and respectful to past policy fabrics of a society On the other hand the simultaneous spread of communication technology global liberalization of the market and peripheral homogenization of cultures have caused extreme tensions in just these developing countries In this book scholars from different countries around the world highlight the reforms and the tensions in the light of the questions what has been achieved what has failed

and what is still needed Experiences from such diverse locations as Nigeria Ghana Guatemala South Korea Taiwan Zimbabwe and Tanzania are combined with more general observations from other countries Contributors are Don Adams N dri Th r se Assi Lumumba Amiya Kumar Bagchi Thomas Clayton Mark Ginsburg Julius O Ihonvbere Kent Klitgaard Tukumbi Lumumba Kasongo Martha Mantilla Arild Schou Judy Sylvester and Yidan Wang Education in Ghana Betty Grace Stein George,1976
