Primer Of Libertarian Education:

A Primer of Libertarian Education Joel H. Spring, 1975 In this classic anarchist work Joel Spring uncovers a long and often overlooked tradition of libertarian thought in education From Rousseau and William Godwin to A S Neill and Paulo Freire A Primer of Libertarian Education traces how radical thinkers have challenged authoritarian models of schooling and asked what it truly means to educate for freedom Spring delves into enduring questions Can teaching promote independence without imposing rigid ideology What is the difference between schooling and real learning How does libertarian child rearing disrupt traditional family structures Alongside well known figures he introduces lesser known but equally powerful voices including Max Stirner Francisco Ferrer Wilhelm Reich and Leo Tolstoy With clarity and urgency Spring offers a compelling vision of the directions radical educational change can take *A Primer of Libertarian Education* Joel H.

Spring, 1977 **Corporatism, Social Control, and Cultural Domination in Education** Joel H. Spring, 2012 Starting with the 1972 publication of his seminal work *Education and the Rise of the Corporate State* Joel Spring has been documenting and analyzing the politics of knowledge and education Throughout his work he has explored the attempts to use education to advance the economic and political interests of dominant groups The general term he uses for the relationship between schools and power is ideological management His scholarly work first looked at the influence on American schooling of business and economic doctrines embodied in human capital theories and consumerism The next step in his exploration of the politics of knowledge was to examine these issues in the context of globalization leading to a proposed educational rights amendment to national constitutions and a new paradigm for education both of which might ensure that schools are protected from ideological management by economic and political elites Spring's indigenous background has strongly shaped his interest in the political and economic goals of schooling particularly the attempts of those in power to use schools to destroy indigenous languages and cultures In this collection Spring brings together 10 of his key writings providing an overview not just of his own career but the larger contexts in which it is situated In the Introduction he reviews the evolution and scope of his work and his earlier arguments and reflects on its central themes which are reflected in the writings selected for this volume In the *World Library of Educationalists* international scholars themselves compile career long collections of what they judge to be their finest pieces extracts from books key articles salient research findings major theoretical and practical contributions so the world can read them in a single manageable volume Readers will be able to follow the themes and strands of their work and see their contribution to the development of a field as well as the development of the field itself Contributors to the series include Michael Apple James A Banks Stephen J Ball Elliot Eisner Howard Gardner John Gilbert Ivor F Goodson Peter Jarvis **Anarchism and Education** Judith Suissa, 2006-09-27 This book explores the neglected tradition of anarchist education showing how the ideas associated with this tradition can lend a valuable depth to philosophical debates on education and a motivating vision for teachers and educational policy makers

Anarchism and Education Judith Suisa, 2010-09-15 While there have been historical accounts of the anarchist school movement there has been no systematic work on the philosophical underpinnings of anarchist educational ideas until now *Anarchism and Education* offers a philosophical account of the neglected tradition of anarchist thought on education Although few anarchist thinkers wrote systematically on education this analysis is based largely on a reconstruction of the educational thought of anarchist thinkers gleaned from their various ethical philosophical and popular writings Primarily drawing on the work of the nineteenth century anarchist theorists such as Bakunin Kropotkin and Proudhon the book also covers twentieth century anarchist thinkers such as Noam Chomsky Paul Goodman Daniel Guérin and Colin Ward This original work will interest philosophers of education and educationalist thinkers as well as those with a general interest in anarchism

Moacir Gadotti, 1994-01-01 This book was written as Paulo Freire himself would have done it using a method of learning through victories and defeats in the same way one learns in life The author follows a chronological line in which life and work are naturally mixed In many cases he lets Paulo Freire's work speak for itself

A. S. Neill Richard Bailey, 2014-10-23 A S Neill was probably the most famous school teacher of the twentieth century His school Summerhill founded in 1921 attracted admiration and criticism from around the world and became an emblem of radical school reform and child centred education Neill claimed that he was a practical man but this book reveals that Summerhill expresses a comprehensive and distinctive set of ideas Whether he wanted to be or not Neill was an important educational thinker with a powerful influence on current educational approaches and philosophy A S Neill is the first book to examine this philosophy of education in detail It begins by showing how Neill's fascinating life story gives clues to the origin of his ideas and why they mattered so much to him It goes on to explore the main themes of his philosophy showing how they relate to the work of other great educational thinkers and how they are novel It also discusses whether there are lessons that could and should be learned by other schools from the original alternative free school of Summerhill

Film and the Anarchist Imagination

Richard Porton, 2020-10-26 Hailed since its initial release *Film and the Anarchist Imagination* offers the authoritative account of films featuring anarchist characters and motifs Richard Porton delves into the many ways filmmakers have portrayed anarchism's long traditions of labor agitation and revolutionary struggle While acknowledging cinema's predilection for ludicrous anarchist stereotypes he focuses on films that wittingly or otherwise reflect or even promote workplace resistance anarchist pedagogy self emancipation and anti statist insurrection Porton ranges from the silent era to the classics *Zéro de Conduite* and *Love and Anarchy* to contemporary films like *The Nothing Factory* while engaging the works of Jean Vigo Jean Luc Godard Lina Wertmüller Yvonne Rainer Ken Loach and others For this updated second edition Porton reflects on several new topics including the negative portrayals of anarchism over the past twenty years and the contemporary embrace of post anarchism

Inside Stories Kathleen B. deMarrais, 2012-12-06 Although articles reporting research studies are helpful in

acquainting students with methodological approaches they often make the process look so straightforward clean and effortless It is rare to find an article that tells the real story behind the finished product By having real researchers tell their own stories of mucking around with methodological and ethical issues in qualitative research we get a more realistic human story of the process This is a collection of such stories Authors were asked to describe their own experiences with methodological and ethical struggles as they engaged in their work Each of the essays offers insight into the research approach used as well as particular issues which became apparent during the research process Key issues raised by the authors include early learnings gaining entry overlapping conflicting roles and the boundaries of these roles differential power relationships who tells the story and whose story is told ethical concerns related to confidentiality and the influence of a researcher's particular philosophy or theoretical framework on his or her research Throughout the book we see scholars whose personal stories or autobiographies intersect closely with their research projects deMarrais introduces a unique framework to help students gain an overview of qualitative research methods and the underpinnings and processes in these approaches This framework is centered on the ways we understand phenomena using qualitative research approaches that engage archival knowledge narrative knowledge or observational knowledge **Constructive Anarchy** Jeff

Shantz,2016-05-23 Constructive Anarchy the result of more than a decade of direct study within a variety of anarchist projects provides the most wide ranging and detailed analysis of current anarchist endeavours The compelling discussions of anarchism and union organising anti poverty work and immigrant and refugee defence represent truly groundbreaking undertakings from a rising scholar of contemporary anarchism Organised to illustrate the development of the diversity of anarchist strategies and tactics over time the book begins with a discussion of alternative media projects before turning attention to anarchist involvement in broader community based movements Case studies include a discussion of anarchists and rank and file workplace organising anarchist anti borders struggles and No One Is Illegal movements in defence of immigrants and refugees since 9 11 and anarchist free schools and community centres Jeff Shantz's analysis demonstrates serious and grounded practices rooted in anarchist organising practices that may draw on previous traditions and practices but also innovate and experiment The varied selection of case studies allows the author to compare groups that are geared primarily towards anarchist and radical subcultures with anarchist involvement in more diverse community based coalitions an approach that is otherwise lacking in the literature on contemporary anarchism *The Passion to Learn* Joan

Solomon,2003-09-02 This inquiry into self study provides fresh insight into the motivation to learn Beginning and ending with comprehensive and stimulating discussions of learning theories it includes fourteen case studies of autodidacticism in informal learning *Ideology, Culture & the Process of Schooling* Henry A. Giroux,1984-10 This book lays bare the ideological and political character of the positivist rationality that has been the primary theoretical underpinning of educational research in the United States These assumptions have expressed themselves in the form and content of curriculum classroom social

relations classroom cultural artifacts and the experiences and beliefs of teachers and students Have existing radical critiques provided the theoretical building blocks for a new theory of pedagogy The author attempts to move beyond the abstract negative characteristics of many radical critiques which are often based on false dualisms that fail to link structure and intentionally content and process ideology and hegemony etc He also is critical of the over determined models of socialization and the abstract celebration of subjectivity that underlies much of the false utopianism of many radical perspectives

Professor Giroux begins to lay the theoretical groundwork for developing a radical pedagogy that connects critical theory with the need for social action in the interest of individual freedom and social reconstruction Author note Henry A Giroux is Assistant Professor of Education at Boston University He is the co editor of Curriculum and Instruction Alternatives in Education and The Hidden Curriculum and Moral Education

Sweet, Judith I.

Anderson, 2013-12-16 Through the years research on reading has made enormous contributions to helping us understand how students learn to read and how teachers can best instruct them Research continues to add to our fundamental knowledge of reading in significant ways thus adding more pieces to the puzzle for example finding answers to how students learn content in other school subjects through reading and what strategies teachers can use to help their students do this more effectively *Reading Research into the Year 2000* describes the dynamic process that the Department of Education engages in to plan and execute a reading research agenda It was written to inform a wide ranging public those who will benefit directly or indirectly from reading research findings including those who use research applications as well as those who conduct the research Moreover it was written to make public the process of establishing a national R D Center Few people outside the Department of Education are aware of the procedures that are undertaken The editors believe that if more people are in the know they will be more likely to participate in the entire process from generating research ideas to submitting applications and that this greater participation is essential if we are to garner divergent thinking about how to solve critical education research issues They have made a significant step toward breaking down barriers to full participation and paved the way for greater involvement of non traditional players in competing for a national R D Center award **My**

Media Capitalism Thomas Klikauer, 2022-01-01 This book argues that media and capitalism no longer exist as separated entities and posits three reasons why one can no longer exist without the other Firstly mass media have become indispensable to capitalism due to the media's ability to sell the commodities of mass consumerism Media capitalism also creates pro capital attitudes among a target population and establishes an ideological hegemony Thirdly media capitalism provides mass deception to hide the pathologies of capitalism which include mass poverty rising inequalities and the acceleration of global warming To illuminate this the book's historical chapter traces the emergence of media capitalism Its subsequent chapters show how media capitalism has infiltrated the public sphere society schools universities the world of work and finally democracy The book concludes by outlining how societies can transition from media capitalism to a post media capitalist society *Paulo Freire* James D. Kirylo, Drick Boyd, 2017-07-18 Paulo Freire 1921 1997 is well known around the world for his innovative educational philosophy which has led many to consider him the father of both critical

pedagogy and popular education What is less known about Freire however is that his politics and pedagogy were informed by a faith birthed in Roman Catholicism but which also challenged the church to move beyond individual piety to prophetic action Freire's spirituality was rooted in the conviction that God calls all people of goodwill to work toward fulfilling the vision of a new humanity given by God To that end this book one of the first of its kind discussing Freire examines the spirituality that was foundational to his life and teaching inviting all who have been influenced by Freire to consider the deeper spiritual dimensions of their pedagogical and political work James D Kirylo and Drick Boyd's powerful text on the faith spirituality and theology of Paulo Freire provide a unique and much needed contribution to our understanding of one of the most influential educational philosophers of the 20th century Antonia Darder Leavey Endowed Chair of Ethics Moral Leadership at Loyola Marymount University and Distinguished Visiting Professor at the University of Johannesburg James D Kirylo and Drick Boyd have made an important contribution to our understanding of Freire and his work and in so doing have taken us further down the long road to justice Peter McLaren Distinguished Professor in Critical Studies Co Director The Paulo Freire Democratic Project and International Ambassador for Global Ethics and Social Justice College of Education Chapman University This book is indeed an invaluable read for anyone interested in exploring the often overlooked spiritual dimension in the work of one of the most influential educators of the 20th century Freire's pedagogy was deep rooted and substantiated by his Christian faith which provided him the inspiration to work relentlessly to denounce all systems of oppression that dehumanize people and steal their agency and to announce the sacredness of life which implies dignity for all Dora B Agra Junker Founder and Director of the Center Paulo Freire at Garrett Evangelical Theological Seminary
