Mathematical Theory and Computational Practice Klaus Ambos-Spies, Benedikt Löwe, Wolfgang Merkle, 2009-07-15 This book constitutes the proceedings of the 5th Conference on Computability in Europe CiE 2009 held in Heidelberg Germany during July 19 24 2009 The 34 papers presented together with 17 invited lectures were carefully reviewed and selected from 100 submissions The aims of the conference is to advance our theoretical understanding of what can and cannot be computed by any means of computation It is the largest international meeting focused on computability theoretic issues

Mathematics, Logic, and their Philosophies Mojtaba Mojtahedi, Shahid Rahman, Mohammad Saleh Zarepour, 2021-02-09 This volume is a collection of essays in honour of Professor Mohammad Ardeshtir It examines topics which in one way or another are connected to the various aspects of his multidisciplinary research interests Based on this criterion the book is divided into three general categories The first category includes papers on non classical logics including intuitionistic logic constructive logic basic logic and substructural logic The second category is made up of papers discussing issues in the contemporary philosophy of mathematics and logic The third category contains papers on Avicenna s logic and philosophy Mohammad Ardeshtir is a full professor of mathematical logic at the Department of Mathematical Sciences Sharif University of Technology Tehran Iran where he has taught generations of students for around a quarter century Mohammad Ardeshtir is known in the first place for his prominent works in basic logic and constructive mathematics His areas of interest are however much broader and include

topics in intuitionistic philosophy of mathematics and Arabic philosophy of logic and mathematics In addition to numerous research articles in leading international journals Ardeshtir is the author of a highly praised Persian textbook in mathematical logic Partly through his writings and translations the school of mathematical intuitionism was introduced to the Iranian academic community Dick de Jongh on Intuitionistic and Provability Logics Nick Bezhanishvili, Rosalie Iemhoff, Fan

Yang, 2024-07-25 This book is dedicated to Dick de Jongh's contributions to the theory of intuitionistic and provability logics Consisting of 13 chapters written by leading experts this book discusses de Jongh's original contributions and consequent developments that have helped to shape these fields The book begins with an autobiographic note by Dick de Jongh which discusses the main themes of his work and places the other contributions in context The next four chapters explore the De Jongh Sambin fixed point theorem and other contributions to provability and interpretability logics The following four chapters focus on modal intuitionistic and intuitionistic modal logics They discuss independence of formulas unification and de Jongh formulas in intuitionistic and modal logics Then there follow two chapters on the other two areas to which Dick de Jongh made important contributions the theory of well partial orders and formal learning theory The second to last chapter on Origami Geometry can be seen as representing the Master of Logic program of the Institute for Logic Language and Computation ILLC in which de Jongh invested a lot of energy The book ends with a complete bibliography of Dick de Jongh in the last chapter This volume provides a vital overview and continuation of de Jongh's prolific work in the theory of intuitionistic and provability logics **Computability In Context: Computation And Logic In The Real World** S Barry

Cooper, Andrea Sorbi, 2011-02-25 Computability has played a crucial role in mathematics and computer science leading to the discovery understanding and classification of decidable undecidable problems paving the way for the modern computer era and affecting deeply our view of the world Recent new paradigms of computation based on biological and physical models address in a radically new way questions of efficiency and challenge assumptions about the so called Turing barrier This volume addresses various aspects of the ways computability and theoretical computer science enable scientists and philosophers to deal with mathematical and real world issues covering problems related to logic mathematics physical processes real computation and learning theory At the same time it will focus on different ways in which computability emerges from the real world and how this affects our way of thinking about everyday computational issues a Instability in

Models Connected with Fluid Flows I Claude Bardos, Andrei V. Fursikov, 2007-12-20 In this authoritative and comprehensive volume Claude Bardos and Andrei Fursikov have drawn together an impressive array of international contributors to present important recent results and perspectives in this area The main subjects that appear here relate largely to mathematical aspects of the theory but some novel schemes used in applied mathematics are also presented Various topics from control theory including Navier Stokes equations are covered Sobolev Spaces in Mathematics II Vladimir Maz'ya, 2008-11-26

Sobolev spaces become the established and universal language of partial differential equations and mathematical analysis

Among a huge variety of problems where Sobolev spaces are used the following important topics are the focus of this volume boundary value problems in domains with singularities higher order partial differential equations local polynomial approximations inequalities in Sobolev Lorentz spaces function spaces in cellular domains the spectrum of a Schrodinger operator with negative potential and other spectral problems criteria for the complete integration of systems of differential equations with applications to differential geometry some aspects of differential forms on Riemannian manifolds related to Sobolev inequalities Brownian motion on a Cartan Hadamard manifold etc Two short biographical articles on the works of Sobolev in the 1930s and the foundation of Akademgorodok in Siberia supplied with unique archive photos of S Sobolev are included

Sobolev Spaces in Mathematics I Vladimir Maz'ya, 2008-12-02 This volume marks the centenary of the birth of the outstanding mathematician of the 20th century Sergey Sobolev It includes new results on the latest topics of the theory of Sobolev spaces partial differential equations analysis and mathematical physics
