Mathematical Results In Statistical Mechanics Proceedings Of The Satellite Colloquium Statphys:

Mathematical Results In Statistical Mechanics Jean Ruiz, Salvador Miracle-sole, Valentin Zagrebnov, 1999-05-14 This invaluable book is a collection of lectures delivered at the Colloquium Mathematical Results in Statistical Mechanics held in Marseilles France on July 27-31, 1998 as a satellite colloquium of the Paris conference STATPHYS 20. It covers a large part of the contemporary results in statistical mechanics from the point of view of mathematical physics by leading experts in this field. It includes as the main topics phase transitions, interfaces, disordered systems, Gibbsian and non-Gibbsian states as well as recent rigorous treatments in quantum statistical mechanics.

Non-equilibrium Statistical Mechanics - Satellite Meeting To Statphys 17 And 4th Medyfinol Conference Susana Hernandez, 1990-05-01 This text provides a pedagogical tour through mechanics from Newton to Einstein with detailed explanations and a large number of worked examples. From the very beginning, relativity is kept in mind along with its relation to concepts of basic mechanics such as inertia, escape velocity, Newton's potential, Kepler motion and curvature. The Lagrange and Hamilton formalisms are treated in detail and extensive applications to central forces and rigid bodies are presented. After consideration of the motivation of relativity, the essential tensor calculus is developed and thereafter Einstein's equation is solved for special cases with explicit presentation of calculational steps. The combined treatment of classical mechanics and relativity thus enables the reader to see the connection between Newton's gravitational potential, Kepler motion and Einstein's corrections as well as diverse aspects of mechanics. The text addresses students and others pursuing a course in classical mechanics as well as those interested in a detailed course on relativity.
