Each book offers practical, research-based guidance to differentiating instruction in the mathematics classroom. The authors provide dozens of ready-to-use differentiated tasks, including reproducibles, along with ways to scaffold mathematical learning strategies for providing and structuring choice within classrooms, guidance in leading large group discussions when students are completing different activities, and engaging ways to address NCTM's Principles and Standards for School Mathematics and Curriculum Focal Points.

Developing Mathematical Proficiency for Elementary Instruction Yeping Li, Roger E. Howe, W. James Lewis, James J. Madden, 2021-04-23. The need to improve the mathematical proficiency of elementary teachers is well recognized, and it has long been of interest to educators and researchers in the U.S. and many other countries. But the specific proficiencies that elementary teachers need and the process of developing and improving them remain only partially conceptualized and not well validated empirically. To improve this situation, national workshops were organized at Texas A M University to generate focused discussions about this important topic with participation of mathematicians, mathematics educators, and teachers. **Developing Mathematical Proficiency for Elementary Instruction** is a collection of articles that grew out of those exciting cross-disciplinary exchanges. **Developing Mathematical Proficiency for Elementary Instruction** is organized to probe the specifics of mathematical proficiency that are important to elementary teachers during two separate but interconnected professional stages: as pre-service teachers in a preparation program and as in-service teachers teaching mathematics in elementary classrooms. From this rich and inspiring collection, readers may better understand and possibly rethink their own practices and research in empowering elementary teachers mathematically and pedagogically as educators or researchers.
