MEDICATION OF THE MIND

Medication Of The Mind:

Medication of the Mind Scott K. Veggeberg, Richard Restak, 2025-10-16 We are witnessing what many call the biological revolution in psychiatry a revolution that is as controversial as it is potentially beneficial Psychoanalysis as pioneered by Freud and Jung along with all the subsequent forms of talk therapy is at risk of becoming obsolete Using the latest technology modern medical scientists believe they can now pinpoint the natural biological and chemical causes of most mental illnesses The result is a new class of mind medications that includes drugs such as Prozac and Zoloft These drugs alter the function of the neurons and synapses of the human brain and in the process can dramatically change people's personalities in ways we don't yet fully understand What does the future hold Can drugs really cure depression and anxiety If so should we use them for this purpose Who should be medicated and who shouldn't Who decides What is the future of talk therapy Will the discovery of the genetic causes of mental illnesses lead to genetic experimentation and engineering
