strikes This is evident particularly in public services including health care social care and education and is accompanied by a feminization of strikes given the prevalence of women working there This unique study draws on the experience of fifteen countries around the world South Africa Argentina Canada Mexico United States Korea Australia New Zealand Belgium Denmark France Germany the Netherlands Sweden and the United Kingdom Covering the high and low points of strike activity over the period 1968 2005 the study shows continuing evidence of the durability adaptability and necessity of the strike
