*A Nurse Abroad* Anne Watts, 2012-05-10 The moving and heartwarming memoir of a British nurse who has spent her life working in the world's most remote and hostile environments In the early 1960s Anne Watts was a newly qualified nurse eager to use her skills Her father expected her to work locally not too far from North Wales where Anne had grown up and to then settle down and have children However Anne was a chip off the old block who had inherited her father's adventurous spirit and at the first opportunity she set sail for Canada to work in the remote stations in the frozen north of the country She found a placement easily one of only a couple of women to work among the indigenous peoples who in those days were called Eskimos With the whole world to explore Anne later headed for Alice Springs in the Australian outback She speaks eloquently about what it was like to be a nurse and midwife among a tough cattle ranching community who lived not always harmoniously in close proximity with Australia's Aboriginal people Working with native peoples Anne's eyes were opened to their skills at surviving the harshest of environments but also to the prejudices they suffered Forty years later Anne returned to both countries to see how life has changed in Eskimo Point and Alice Springs and what has become of its people and landscape

**Beyond the Checklist** Suzanne Gordon, Patrick Mendenhall, Bonnie Blair O'Connor, 2012-11-20 The U S healthcare system is now spending many millions of dollars to improve patient safety and inter professional practice Nevertheless an estimated 100 000 patients still succumb to preventable medical errors or infections every year How can health care providers reduce the terrible financial and human toll of medical errors and injuries that harm rather than heal Beyond the Checklist argues that lives could be saved and patient care enhanced by adapting the relevant lessons of aviation safety and teamwork In response to a series of human error caused crashes the airline industry developed the system of job training and information sharing known as Crew Resource Management CRM Under the new industry wide system of CRM pilots flight attendants and ground crews now communicate and cooperate in ways that have greatly reduced the hazards of commercial air travel The coauthors of this book sought out the aviation professionals who made this transformation possible Beyond the Checklist gives us an inside look at CRM training and shows how airline staff interaction that once suffered from

the same dysfunction that too often undermines real teamwork in health care today has dramatically improved Drawing on the experience of doctors nurses medical educators and administrators this book demonstrates how CRM can be adapted more widely and effectively to health care delivery The authors provide case studies of three institutions that have successfully incorporated CRM like principles into the fabric of their clinical culture by embracing practices that promote common patient safety knowledge and skills They infuse this study with their own diverse experience and collaborative spirit Patrick Mendenhall is a commercial airline pilot who teaches CRM Suzanne Gordon is a nationally known health care journalist training consultant and speaker on issues related to nursing and Bonnie Blair O Connor is an ethnographer and medical educator who has spent more than two decades observing medical training and teamwork from the inside **The**

**Public Health Reports** ,1966      **Destigmatising mental illness?** Vicky Long,2015-11-01 This historical study of mental healthcare workers efforts to educate the public challenges the supposition that public prejudice generates the stigma of mental illness Drawing on extensive archival research this book argues that psychiatrists nurses and social workers generated representations of mental illness which reflected their professional aspirations economic motivations and perceptions of the public Sharing in the stigma of their patients healthcare workers sought to enhance the prestige of their professions by focussing upon the ability of psychiatry to effectively treat acute cases of mental disturbance As a consequence healthcare workers inadvertently reinforced the stigma attached to serious and enduring mental distress This book makes a major contribution to the history of mental healthcare and critiques current campaigns which seek to end mental health discrimination for failing to address the political economic and social factors which fuel discrimination It will appeal to academics students healthcare practitioners and service users
