

# Textured Modified Diets

"Dysphagia is when an individual has difficulty swallowing making it hard for them to eat and drink. Their food and drink may need to be modified to make it safer and minimising the risk of choking and aspiration."

## The Modified Food Groups

### Liquidised

All food items should be prepared separately. It should be completely smooth, passed through a sieve and lump free with a moderately thick liquid consistency. No thin liquid should separate.

### Pureed

Food should be smooth, without lumps or separated liquid. It should hold its shape on a spoon and be a mousse like consistency. Extra gravy or sauce should not be added.

### Minced and Moist

Food particles should be no bigger than 3mm. Tender and moist with a fine minced consistency with no separated liquid. Extra gravy or sauce should not be added.

### Soft and -Sized

Food particles should be no bigger than 15mm x 15mm and soft enough to press down with a fork without regaining shape. Gravy or sauce should be bound within the dish and not served separately.

### Easy to Chew

Age appropriate foods that are a soft/tender texture that can be cut with a fork or spoon. No hard, tough, stringy textures with pips, seeds bones or grits.

### Regular

Everyday foods of different textures. Chewing required, includes mixed consistencies e.g. cereal with milk, soup with vegetables & sandwiches.

Ingredients to avoid in Levels 3-7 Easy to Chew.

Foods with husks, seeds, pips or fibrous textures. No hard, crunchy or sticky textures. If in doubt pass ingredients through a fine sieve and thicken to correct consistency.

**The Role of Food, Agriculture, Forestry and Fisheries in Human Nutrition - Volume IV** Victor R. Squires, 2011-11-15 The Role of Food Agriculture Forestry and Fisheries in Human Nutrition is a component of Encyclopedia of Food and Agricultural Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Human health and wellbeing depend strongly on production quality and availability of food Agriculture or cultivation of the soil harvesting crops and raising livestock which are the main sources of food has no single origin At different times and in numerous places many plants and animals have been domesticated to provide food for humankind Fishing like farming is a form of primary food production Through food gathering primitive humans first obtained fish and other aquatic products in the shallow waters of lakes and along the seashore in areas with ebb tides and in small streams The breadth and complexity of the subject matter presented here is vast This volume traces the extraordinary history of human colonization of the habitable world and is a chronicle of humankind s early communion with the underlying realities of the earth s physical environment the eventual destruction of this harmonious relationship and efforts to repair the damage To make it easier for the reader the volume is divided into 7 sections Food and agriculture and the use of natural resources examines the relationship between food production and the resource base and demonstrate how humans have adapted and exploited Nature to feed the burgeoning populations of humans and their domestic animals History of forestry from ancient times to the present day is analyzed and shows the linkage between forest clearance for agriculture and the rise of human populations and current global environmental issues History of Fishing is a saga explained that spans the full range from traditional fishing for subsistence through to the evolution of modern factory fishing fleets Impact of global change on agriculture outlines the impact of climate change human demographic trends and the sustainability issues that arise Economics and policy of food production analyzes the global trade in foodstuffs and the regional specializations and land use complexities Fundamentals of human health and nutrition explains the complexities of providing a balanced and safe diet for humans throughout their life cycle from birth to old age It explores some of the linkages between human health and the quality and quantity of food provided Human nutrition an overview provides a wide ranging summary of the issues and imperatives

associated with providing humans with food of a quality and standard that will ensure healthy lives In the history of human development from the time of the earliest agricultural activities humans have cleared the natural forests and woodlands to obtain building materials and fuel wood and to provide lands for domestic animals and crops It is this aspect that is the main focus of the volume The authors in this volume have analyzed and reviewed the interactions between the utilization of natural resources and human nutrition Much attention focuses on the specific contribution by agriculture including livestock husbandry forestry and fisheries in meeting human needs This synoptic overview assesses the pattern of past change in the relationship between humans and the resource base on which their lives depend Lessons learned or still to be learned are teased out and elaborated The vast breadth of the subject matter covered in this volume has meant that the work has benefited from the input of many individual contributors from vastly different parts of the globe I am grateful to the contributors and reviewers for their time and effort and the exchange of ideas and the learning experience that I obtained by working with such a diverse and learned group We all owe a debt of gratitude to the vast invisible college of colleagues whose publications that have shed light on some of the most pertinent problems facing humankind today These four volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

**Textbook of Basic Nursing** Caroline Bunker Rosdahl, Mary T. Kowalski, 2008 Now in its Ninth Edition this comprehensive all in one textbook covers the basic LPN LVN curriculum and all content areas of the NCLEX PN Coverage includes anatomy and physiology nursing process growth and development nursing skills and pharmacology as well as medical surgical maternal neonatal pediatric and psychiatric mental health nursing The book is written in a student friendly style and has an attractive full color design with numerous illustrations tables and boxes Bound in multimedia CD ROMs include audio pronunciations clinical simulations videos animations and a simulated NCLEX PN exam This edition s comprehensive ancillary package includes curriculum materials PowerPoint slides lesson plans and a test generator of NCLEX PN style questions

Cancer Management in Man: Chemotherapy, Biological Therapy, Hyperthermia and Supporting Measures Boris Minev, 2011-01-13 This book represents a comprehensive description and evaluation of the most up to date approaches to cancer management Each chapter prepared by leading basic researchers and clinicians provides an in depth description of a specific method for cancer management The chemotherapy section of the book is updated to include the newest drugs as well as those currently in development Organized by drug class this section provides the latest information on most drugs including their mechanisms of action interactions with other agents toxicities side effects and mechanisms of resistance The biological therapy section of the book provides expanded coverage of the currently used cytokines vaccines and cell based therapies of cancer Full consideration is also given to other modern treatment approaches such as tyrosine kinase inhibitors inhibitors of tumor angiogenesis and the transcatheter management of cancer Current advances in hyperthermia in cancer treatment hematologic and nutritional

support bone marrow transplantation pain management and care of the terminally ill patients with cancer are also presented In summary this book provides a comprehensive coverage of the current knowledge on the most innovative systematic and multidisciplinary approaches to the treatment of patients with cancer      **Renal Pathophysiology** Helmut G.

Rennke,Bradley M. Denker,2007 This text offers second year medical students a case based approach to learning mechanisms of renal disease Each chapter covers a disease and begins with a patient case followed by discussion of the pathophysiology of the disease Issues of differential diagnosis and therapy are linked to pathophysiologic mechanisms Short questions interspersed in the text require students to apply their knowledge and detailed answers to the questions are given The Second Edition incorporates the latest findings regarding mechanisms of renal disease This edition also has a two color art program and a fresh new design that features cases questions and other pedagogical elements prominently      Handbook of Nutrition and Diet Desai,2000-08-16 This handbook of nutrition and diet provides information on food nutrients and their functions food safety and distribution food composition consumption and utilization adequacy of diet and the nutritional management of diseases and disorders It also discusses the effects of nutrition and diet on diseases of the bones teeth hair kidneys liver and nervous system      **Nutritional Foundations and Clinical Applications - E-Book** Michele Grodner,Sara Long Roth,Bonnie C. Walkingshaw,2013-08-07 Now in its 5th edition the critically acclaimed Nutritional Foundations and Clinical Applications A Nursing Approach offers you a comprehensive first hand account of the ways in which nutrition affects the lives of nursing professionals and everyday people Discussions on nutritional needs and nutritional therapy from the nurse s perspective define your role in nutrition wellness and health promotion The dynamic author team of Grodner Roth and Walkingshaw utilizes a conversational writing style and a variety of learning features help you apply your knowledge to the clinical setting Content updates specifically to the Dietary Guidelines for Americans 2010 an online resource a new logical organization and much more prepare you to handle the challenges you face with ease Emphasis on health promotion and primary prevention stresses the adoption of a healthy diet and lifestyle to enhance quality of life Content Knowledge and Critical Thinking Clinical Applications case studies reinforce knowledge and help you apply nutrition principles to real world situations Cultural Considerations boxes discuss various eating patterns related to ethnicity and religion to help you understand the various influences on health and wellness Personal Perspective boxes demonstrate the personal touch for which this book is known and offer first hand accounts of interactions with patients and their families Health Debate and Social Issue boxes explore controversial health issues and encourage you to develop your own opinions Teaching tool boxes provide tips and guidance to apply when educating patients Website listings with a short narrative at the end of every chapter refer you to additional online resources Updated content to Dietary Guidelines for Americans 2010 keeps you current Additional questions added to case studies in the Nursing Approach boxes help you focus on practical ways you can use nutrition in practice Study tools on Evolve present virtual case studies and additional questions with instant

feedback to your answers that reinforce your learning Online icons throughout the text refer you to the NEW Nutrition Concepts Online course content A logical organization to updated and streamlined content lets you find the information you need quickly

Nutrition and Fitness: Diet, Genes, Physical Activity and Health A. P. Simopoulos, K. N. Pavlou, Berthold Koletzko, 2001-07 This is the first of two volumes containing the proceedings of the Fourth International Conference on Nutrition and Fitness It presents the latest data on the interrelationships of genes nutrients and physical activity as they influence the phenotype throughout development The human genome was shaped by the environment especially diet and physical activity The phenotype is thus the result of continuous gene environment interactions However new data indicate that the environment has changed enormously especially during the last 100 years so that it is no longer in harmony with the human genome A new discipline is evolving called Nutrigenetics which combines concepts and methods from genetics and nutritional sciences and the term refers to individual variability in response to diet The papers presented make it abundantly clear that we must make a conscious effort to develop in all dimensions the environment particularly diet and physical activity in which the human genome finds its optimal expression This approach of individualized environmental modification is called Euphenics and it must evolve simultaneously with Genomics and the use of genotypic analyses to enhance the quality of medical care for the individual The euphenic approach is essential for the prevention and management of chronic disease These proceedings will be of interest to geneticists nutritionists and dietitians exercise physiologists anthropologists psychologists and psychiatrists pediatricians internists general practitioners health care providers scientists in government and industry policymakers and governmental organizations
