Nutrition In Gastrointestinal Disease:

Nutrition and Gastrointestinal Disease Mark DeLegge, 2007-12-26 Nutritional support of people with gastrointestinal impairment is critical to treatment and ultimately successful management. As such, gastroenterologists should be experts in nutrition and knowledgeable about the effects of nutrition on disease management. Nutritional and Gastrointestinal Disease fulfills that need, serving as a hands-on practical reference in nutrition support for the clinical gastroenterologist and other clinicians with similar interests. The volume offers expert nutritional knowledge and management ideas as well as methodology for combating problems such as short bowel syndrome, inflammatory bowel disease, celiac disease, and obesity. Renowned authorities also investigate nutrition's influence on such issues as liver failure and acute pancreatitis.
