*Oracles of Science : Celebrity Scientists versus God and Religion* Karl Giberson Professor of Physics Eastern Nazarene College, Mariano Artigas Professor of Philosophy of Science University of Navarra, 2006-11-29 Biologists Stephen Jay Gould Richard Dawkins and Edward O Wilson and physicists Carl Sagan Stephen Hawking and Steven Weinberg have become public intellectuals articulating a much larger vision for science and what role it should play in the modern worldview The scientific prestige and literary eloquence of each of these great thinkers combine to transform them into what can only be called oracles of science Curiously the leading oracles of science are predominantly secular in ways that don't reflect the distribution of religious beliefs within the scientific community Many of them are even hostile to religion creating a false impression that science as a whole is incompatible with religion Karl Giberson and Mariano Artigas offer an informed

analysis of the views of these six scientists carefully distinguishing science from philosophy and religion in the writings of the oracles     *Scientific Miracles of the Qur'an With Signs of Allah in the Heavens and on the Earth* Hassan S.

Abou-El-Enin,2009-12     **The Big Questions in Science and Religion** Keith Ward,2008-05 Can religious beliefs survive in the scientific age Are they resoundingly outdated Or is there something in them of great importance even if the way they are expressed will have to change given new scientific context These questions are among those at the core of the science religion dialogue An Anglican priest who was once an atheist offers compelling insights into the often contentious relationship between diverse religious views and new scientific knowledge He identifies ten basic questions about the nature of the universe and human life Among these are Does the universe have a goal or purpose Do the laws of nature exclude miracles Can science provide a wholly naturalistic explanation for moral and religious beliefs Has science made belief in God obsolete Are there any good science based arguments for God Ward considers concepts from Buddhism Confucianism Taoism Islam Hinduism Judaism and Christianity while featuring the speculations of cosmologists physicians mathematicians and philosophers     **History of Religion** Alexander Men,2021-06-08 The first book In Search of the Way the Truth and the Life explores the origins of religion and early beliefs from prehistoric mysticism to the idea of a living God The reader is invited on a fascinating journey of the human spirit highlighting the interconnectedness and a common vector of humanity s religious search which unraveled across continents spanning millennia from Mesoamerica to the plains of Mesopotamia from the emergence of the religious views of Egypt and India to the formation of ancient philosophies in China and Greece The book recounts the emergence of the ancient Israel s religion that gave the world the liberating fire of Light and Truth culminating with the coming of the Messiah His earthly life and the victory over death We learn that the spiritual quest of humanity was embodied in the person and teachings of Jesus Christ and that His birth for the most profound reasons was the beginning of a new era the era of the triumph of Truth     **Wireless from Venus** Charles Henry Taylor,1922     **Science vs. Religion:** Guido O. Perez,2015-04-01 Most people look to religion and science faith and reason for an explanation of everything that is but neither the scientific nor the religious system can actually provide all the answers to life s questions Is that really what we re looking for The author examines both science and religion in some detail and from a variety of standpoints A life long educator he indicates many avenues for further reading so that no one has to simply accept whatever his family or community traditions may have proposed One sticking point in most discussions of religion vs science is that few of us really have enough information about both positions and the myriad hybrid beliefs in between in order to make a proper evaluation As a professor of medicine and an avid investigator of these questions Dr Guido Perez offers some background and guidance The author explores the basics of theism and today s largest religions and gives a solid grounding in the facts and theoretical basis for evolution and the scientific approach to knowledge He then explores a possible place to stand in both morally and intellectually grounded while we puzzle out our existence a rational belief system that accounts for what we can

account for while recognizing those mysteries and existential questions we humans just can't seem to stop asking Dr Perez proposes a rational belief system grounded in natural science and humanism an approach where morality comes naturally not because we fear divine punishment but because we inherently understand what is good for humanity The Emergence of Everything Harold J. Morowitz, 2004 The Emergence of Everything is a study of complexity which highlights 28 moments of what the author feels are the most important emergences The author also seeks out the nature of God in an emergent universe arguing that we can know God through a study of the laws of nature **Evolutionary History in Theological**

After the Beginning Anthony L. Edridge, 2012-06 A new and inspiring view of creation and the Flood After the Beginning offers compelling insight about God's purpose for an eternal loving relationship with mankind that was made in His image This theme is revealed in Genesis with the creation of Adam and Eve with the animals named by Adam and with the animals that were saved on the ark From creation through the Flood Dr Edridge concludes that the creatures described in Genesis had emotional capability such as mammals and birds Further consideration of species that should be included in the creation narrative leads to agreement between the biblical sequence of creation and the scientific chronology of the fossil record and the early stages of the Earth's development Dr Edridge examines different flood models to determine if they are consistent with biblical parameters and scientific scrutiny Based on documented flood records and geological events he proposes a new catastrophic Flood Model that meets both qualitative and quantitative requirements for the most likely flooded area the cradle of civilization This model is unique providing a viable mechanism that caused the Flood to subside but which agrees with the biblical description

**A Primal Perspective on the Philosophy of Religion** Arvind Sharma, 2006-09-09 What am I trying to accomplish through the exercise which I have undertaken namely to examine the philosophy of religion in the light of primal religions If to choose someone else's expression to characterize one's own intellectual endeavour is an indication of one's own lack of imagination then I must plead guilty to that charge but not to that of lack of gratitude for I have to thank Robin Horton for describing better than I can what I have attempted in the book It is an exercise in what he calls translational understanding I quote him now By translational understanding I mean the kind of understanding of a particular thought system that results from the successful translation of the language and conceptual system that embody it into terms of a language and conceptual system that currently enjoy world status In talking of translation of course I am not just talking of the provision of dictionary equivalents for individual words or sentences I am talking about finding a world language equivalent for a whole realm of discourse and of showing in world language terms what the point of that realm of discourse is in the life of the people who use it Translation in this broader sense can be very arduous There may be no realm of discourse in the world language that exactly fits the bill We may have to bend and refashion existing realms and even redefine their guiding intentions
