Dallenbach, Madison Bentley, Edwin Garrigues Boring, Margaret Floy Washburn, 1919 *Origins of Psychopathology* Horacio Fabrega (Jr.), 2002 What are the origins of human psychopathology Is mental illness a relatively recent phenomenon or has it been with us throughout evolution In *Origins of Psychopathology* Horacio Fabrega Jr employs principles of evolutionary biology to better understand the significance of mental illness He explores whether what psychiatry has categorized as mental disorders could have existed during earlier phases of human evolution Fabrega approaches the prominent features of mental disorders as adaptive responses to the environment and life's circumstances which in turn can only be understood in the context of our evolutionary past Taking his cue from theoretical issues raised by research into primate behavior and early hominid evolution he poses the question What if any aspects of mental illness are rooted in our evolution Does mental illness occur in primates and other animals and if so what does this tell us about mental illness in human evolution How has mental illness played an adaptive role How has the development of language and higher cognitive functions affected characteristics of psychopathology Fabrega synthesizes insights from both the clinical and the evolutionary points of view This facet of
