The Gentry of North Wales in the Later Middle Ages Antony D Carr, 2017-10-12 This is a study of the landed gentry of north Wales from the Edwardian conquest in the thirteenth century to the incorporation of Wales in the Tudor state in the sixteenth The limitation of the discussion to north Wales is deliberate there has often been a tendency to treat Wales as a single region but it is important to stress that like any other country it is itself made up of regions and that a uniformity based on generalisation cannot be imposed This book describes the development of the gentry in one part of Wales from an earlier social structure and an earlier pattern of land tenure and how the gentry came to rule their localities There have been a number of studies of the medieval English gentry usually based on individual counties but the emphasis in a Welsh study is not necessarily the same as that in one relating to England The rich

corpus of medieval poetry addressed to the leaders of native society and the wealth of genealogical material and its potential are two examples of this difference in emphasis

Border Liberties and Loyalties Matthew L. Holford, 2010-03-31 This book examines the organisation of power and society in north east England over two crucial centuries in the emergence of the English state England is usually regarded as medieval Europe's most centralised kingdom yet the North East was dominated by liberties largely self governing jurisdictions that greatly restricted the English crown's direct authority in the region These local polities receive here their first comprehensive discussion and their histories are crucial for understanding questions of state formation in frontier zones regional distinctiveness and local and national loyalties The analysis focuses on liberties as both governmental entities and sources of socio political and cultural identification It also connects the development of liberties and their communities with a rich variety of forces including the influence of the kings of Scots as lords of Tynedale and the impact of protracted Anglo Scottish warfare from 1296 Why did liberties enjoy such long term relevance as governance structures How far and why did the English monarchy respect their autonomous rights and status By what means and how successfully were liberty identities created sharpened and sustained In addressing such issues this ground breaking study extends beyond regional history to make significant contributions to the ongoing mainstream debates about state society identity and community

Bannockburn in 1314 they would be called upon to fight in four different theatres of war in Wales Gascony Flanders and Scotland Although the identities of many of the men who fought in these wars particularly those of the thousands of peasant foot soldiers will never be known the names of a large proportion of the men at arms can be located in the records of central government This book utilises these sources payrolls horse inventories wardrobe books and others to examine the military careers and activities of these men at arms focussing on five main themes mobilisation military command service patterns among the gentry retinues and their composition and feudal service Book Jacket

Town and Countryside in Western Berkshire, C.1327-c.1600 Margaret Yates, 2007 A fresh examination of how society and economy changed at the end of the middle ages comparing urban and rural experience The traditional boundary between the medieval and early modern periods is challenged in this new study of social and economic change that bridges the fifteenth and sixteenth centuries It addresses the large historical questions what changed when and why through a detailed case study of western Berkshire and Newbury integrating the experiences of both town and countryside Newbury is of particular interest being a rising cloth manufacturing centre that had contacts with London and overseas due to its specialist production of kerseys The evidence comes from original documentary research and the data are clearly presented in tables and graphs It is a book alive with the actions of people famous men such as the clothier John Winchcombe known as Jack of Newbury but more notably by the hundreds of individuals such as William Eyston or Isabella Bullford who acquired property cultivated their lands or in the case of Isabella managed the mill complex after her husband's death MARGARET YATES is Lecturer in History at the University of Reading
