Owl Time M. A. Foster, 1985 **Time** Edmund Yates, Walter Sydney Sichel, Bax. Ernest Belfort, 1882 Semantic Web Information Management Roberto de Virgilio, Fausto Giunchiglia, Letizia Tanca, 2010-01-08 Databases have been designed to store large volumes of data and to provide efficient query interfaces Semantic Web formats are geared towards capturing domain knowledge interlinking annotations and offering a high level machine processable view of information However the gigantic amount of such useful information makes efficient management of it increasingly difficult undermining the possibility of transforming it into useful knowledge The research presented by De Virgilio Giunchiglia and Tanca tries to bridge the two worlds in order to leverage the efficiency and scalability of database oriented technologies to support an ontological high level view of data and metadata The contributions present and analyze techniques for semantic information management by taking advantage of the synergies between the logical basis of the Semantic Web and the logical foundations of data management The book's leitmotif is to propose models and methods especially tailored to represent and manage data that is appropriately structured for easier machine processing on the Web After two introductory chapters on data management and the Semantic Web in general the remaining contributions are grouped into five parts on Semantic Web Data Storage Reasoning in the Semantic Web Semantic Web Data Querying Semantic Web Applications and Engineering Semantic Web Systems The handbook like presentation makes this volume an important reference on current work and a source of inspiration for future development targeting academic and industrial researchers as well as graduate students in Semantic Web technologies or database design **Advances in Spatial and Temporal Databases** Nikos Mamoulis, Thomas Seidl, Kristian Torp, Ira Assent, 2009-06-30 SSTD 2009 was the 11th in a series of biannual events that discuss new and exciting research in spatio temporal data management and related technologies Previous symposia were successfully held in Santa Barbara 1989 Zurich 1991 Singapore 1993 Portland 1995 Berlin 1997 Hong Kong 1999 Los Angeles 2001 Santorini Greece 2003 Angra dos Reis Brazil 2005 and Boston 2007 Before 2001 the series was devoted solely to spatial database management and called SSD From 2001 the scope was extended in order to also accommodate temporal database management in part due to the increasing importance of research that considers spatial and temporal aspects jointly SSTD 2009 introduced several innovative aspects compared to previous events There was a demonstrations track which included ten presentations of systems related to the topics of interest In addition to that the event included a poster session with seven presentations of innovative research developed at an early stage For the first time in the SSTD series the best paper of the symposium was awarded and a few high quality papers were selected and the authors were invited to submit extended versions of their work to a special issue of the Geoinformatica journal Springer Prior to the symposium there was a two day advanced seminar which hosted three half day tutorials on state of the art topics within spatio temporal data management held by distinguished international researchers *Wise Owl's Time Book* Jane Belk

End-to-End Quality of Service Abdelhamid Mellouk,2013-03-01 A modern communication network can be described as a large complex distributed system composed by higher interoperating smaller sub systems Today the proliferation and convergence of different types of wired wireless and mobile networks are crucial for the success of the next generation networking However these networks can hardly meet the requirements of future integrated service networks and are expected to carry multimedia traffic with various Quality of Experience QoE and Quality of Service QoS requirements Providing all relevant QoS QoE issues in these heterogeneous networks is then an important challenge for telecommunication operators manufacturers and companies The impressive emergence and the important demand of the rising generation of real time Multi service such as Data Voice VoD Video Conference etc over communication heterogeneous networks require scalability while considering a continuous QoS This book presents and explains all the techniques in new generation networks which integrate efficient global control mechanisms in two directions 1 maintain QoS requirements in order to maximize network resources utilization and minimize operational costs on all the types of wired wireless mobile networks

used to transport traffic and 2 mix the QoS associated with home access and core networks in order to provide Quality of Service Quality of Experience expected by users of new services , **Information Modelling and Knowledge Bases**
