Power And Sex:

Sex, Priests, and Power A. W. Richard Sipe, 1995 First published in 1995 Routledge is an imprint of Taylor Francis an informa company

Power, Sex, Suicide Nick Lane, 2018-10-18 Mitochondria are tiny structures located inside our cells that carry out the essential task of producing energy for the cell They are found in all complex living things and in that sense they are fundamental for driving complex life on the planet But there is much more to them than that Mitochondria have their own DNA with their own small collection of genes separate from those in the cell nucleus It is thought that they were once bacteria living independent lives Their enslavement within the larger cell was a turning point in the evolution of life enabling the development of complex organisms and closely related the origin of two sexes Unlike the DNA in the nucleus mitochondrial DNA is passed down exclusively or almost exclusively via the female line That s why it has been used by some researchers to trace human ancestry daughter to mother to Mitochondrial Eve Mitochondria give us important information about our evolutionary history And that s not all Mitochondrial genes mutate much faster than those in the nucleus because of the free radicals produced in their energy generating role This high mutation rate lies behind our ageing and certain congenital diseases The latest research suggests that mitochondria play a key role in degenerative diseases such as cancer through their involvement in precipitating cell suicide Mitochondria then are pivotal in power sex and suicide In this fascinating and thought provoking book Nick Lane brings together the latest research findings in this exciting field to show how our growing understanding of mitochondria is shedding light on how complex life evolved why sex arose why don t we just bud and why we age and die This understanding is of fundamental importance both in understanding how we and all other complex life came to be but also in order to be able to control our own illnesses and delay our degeneration and death Oxford Landmark Science books are must read classics of modern science writing which have crystallized big ideas and shaped the way we think

Sex, Power and the Games K. Woodward, 2012-06-12 This book explores the social and cultural impact of the Olympic Games examining gender and sport the inequalities between nations and people and at what the Games offer and how they are changing in relation to spectacles spectatorship and culture including the links between art and sport

Sex, Time, and Power Leonard Shlain, 2004-08-03 As in the bestselling *The Alphabet Versus the Goddess* Leonard Shlain s provocative new book promises to change the way readers view themselves and where they came from *Sex Time and Power* offers a tantalizing answer to an age old question Why did big brained Homo sapiens suddenly emerge some 150 000 years ago The key according to Shlain is female sexuality Drawing on an awesome breadth of research he shows how long ago the narrowness of the newly bipedal human female s pelvis and the increasing size of infants heads precipitated a crisis for the species Natural selection allowed for the adaptation of the human female to this environmental stress by reconfiguring her hormonal cycles entraining them with the periodicity of the moon The results however did much more than ensure our existence they imbued women with the concept of time and gave them control over sex a power that males sought

to reclaim And the possibility of achieving immortality through heirs drove men to construct patriarchal cultures that went on to dominate so much of human history From the nature of courtship to the evolution of language Shlain's brilliant and wide ranging exploration stimulates new thinking about very old matters *Sex, Honor, and Power in the Deuteronomistic History* Kenneth Stone, 1996-11-01 In this original work Stone studies the structure and social presuppositions of several narratives from the Deuteronomistic History in which sexual activity plays a significant role Both narratological and anthropological tools are utilized in the textual analysis Stone interestingly notes the link between sexual activity gender and prestige structures the emphasis on male contest and female chastity discussed by anthropologists of honour and shame and the role of the exchange of women in relations between men In each story sexual practice is primarily related to male struggles for honour and power

Tickling the Ivories. Power, Violence, Sex and Identity in Elfriede Jelinek's *The Piano Teacher* Kendall Petersen, 2012-02-24 Erika Kohut is in her late thirties By day she confronts her unrealised ambition as a concert pianist teaching at the Vienna Conservatory while at night she skulks through porn shows and spies on couples in the park confronting her inadequate awareness of her own sexuality Kendall Petersen seeks to examine the notion of power including its manifestations and consequences in social sexual and interpersonal relationships in *The Piano Teacher* by Elfriede Jelinek based on an analysis of the three main relationships narrated in the text Not only does it become clear that social and interpersonal relationships cannot be divorced from the dynamics of power which demonstrate themselves in acts of physical psychological and sexual violence but more importantly that the text narrates a legacy of female internalisation of patriarchal power which ironically results not in women who are fundamentally independent and self sufficient but rather in women who are and will always remain victims disempowered desexualised and dehumanised *Sexuality, Intimacy, Power*

Muriel Dimen, 2013-06-17 Can contemporary psychoanalysis tell us anything about sexuality that is new and clinically meaningful It most certainly can answers Muriel Dimen in *Sexuality Intimacy Power* a compelling attempt to revivify Freud's core interest in sexual impulses in the ordinary sense of the term But there is nothing ordinary about Dimen's project Drawing on contemporary relational theory feminism and postmodernism she takes a sustained sometimes irreverent look at assumptions about psychosexuality For Dimen the shift from dualism to multiplicity that has reshaped a range of disciplines can also be brought to bear on our thinking about sexuality She urges us to return to the open mindedness hiding between the lines and buried in the footnotes of Freud's writings and to replace the determinism into which his thought has hardened with more fluid notions of contingency paradox and thirdness By unveiling the colloquy among psychoanalysis social theory and feminism Dimen challenges clinicians and academicians alike to rethink ideas about gender eroticism and perversion She explores among other topics the relations between Lust and libido the limitations of Darwinian thought in theorizing homosexuality the body as projective test and the intimate tangle of love and hate between women Generous clinical examples illustrate the ways in which a radical re-visioning of psychosexuality benefits therapists and patients alike Mixing

medium and message Dimen draws on a variety of disciplines and styles to delineate the ambiguities contradictions and paradoxes that subtend sexuality in all its personal and clinical complexity A brilliant example of contemporary psychoanalytic theory at its destabilizing best *Sexuality Intimacy Power* is equally a historical document that will intrigue and enlighten students of women s gender and queer studies *Sex, Power, Conflict* David M. Buss, Neil Malamuth, 1996-04-11 Sexual harassment in the workplace date rape and domestic violence dominate the headlines and have recently sparked scholarly debates about the nature of the sexes Concurrently the scientific community is conducting research in topics of sex and gender issues Indeed more research is being done on the topics of sexual conflict and coercion than at any other time in the history of the social sciences Despite this attention it is clear that these issues are being addressed from two essentially different perspectives one is labeled feminist while the other viewed as antithetical to the feminist movement is called evolutionary psychology which emphasizes the history of reproductive strategies in understanding conflict between the sexes This book brings together leading experts from both sides of the debate in order to discover how each could offer insights lacking in the other The editors overall goal is to show how the feminist and evolutionary approaches are complementary despite their evident differences then provide an integration and synthesis In fact several of the contributors to this unique volume consider themselves advocates of both approaches As a stimulating presentation of the dynamics of sex power and conflict and a pioneering rapprochement of the diverse tendencies within the scientific community this book will attract a wide audience in both psychology and women s studies fields *The Power of Sex* Frank S. Caprio, 2011-08 A Leading Psychiatrist Discusses Frankly And Simply The Influence Of Sex On Personality From Childhood To Old Age And How To Develop The Type Of Sexual Relationship That Makes For Ideal Marriage And Family Life **Passion and Power** Kathy Lee Peiss, Christina Simmons, Robert A. Padgug, 1989 *Passion and Power* brings together some of the most recent and innovative writings on the history of sexuality and explores the experiences ideas and conflicts that have shaped the emergence of modern sexual identities Arguing that sexuality is not an unchanging biological reality or a universal natural force the essays in this volume discuss sexuality as an integral part of the history of human experience Articles on sexual assault homosexuality birth control venereal disease sexual repression pornography and the AIDS epidemic examine the ways that sexuality has become a core element of modern social identity in the nineteenth and twentieth century United States It is only in recent years that historians have begun to examine the social construction of sexuality This is the first anthology that addresses this issue from a radical historical perspective examining sexuality as a field of contention in itself and as part of other struggles rooted in divisions of gender class and race Author note Kathy Peiss is Associate Professor of History and Women s Studies at the University of Massachusetts at Amherst and author of *Cheap Amusements Working Women and Leisure in Turn of the century New York* Temple P Christina Simmons is Assistant Professor of History at the University of Cincinnati Raymond Walters College **Biology at Work** Kingsley R. Browne, 2002-06-06 Does biology help explain why

women on average earn less money than men Is there any evolutionary basis for the scarcity of female CEOs in Fortune 500 companies According to Kingsley Browne the answer may be yes Biology at Work brings an evolutionary perspective to bear on issues of women in the workplace the glass ceiling the gender gap in pay sexual harassment and occupational segregation While acknowledging the role of discrimination and sexist socialization Browne suggests that until we factor real biological differences between men and women into the equation the explanation remains incomplete Browne looks at behavioral differences between men and women as products of different evolutionary pressures facing them throughout human history Womens biological investment in their offspring has led them to be on average more nurturing and risk averse and to value relationships over competition Men have been biologically rewarded over human history for displays of strength and skill risk taking and status acquisition These behavioral differences have numerous workplace consequences Not surprisingly sex differences in the drive for status lead to sex differences in the achievement of status Browne argues that decision makers should recognize that policies based on the assumption of a single androgynous human nature are unlikely to be successful Simply removing barriers to inequality will not achieve equality as women and men typically value different things in the workplace and will make different workplace choices based on their different preferences Rather than simply putting forward the nature side of the debate Browne suggests that dichotomies such as nature nurture have impeded our understanding of the origins of human behavior Through evolutionary biology we can understand not only how natural selection has created predispositions toward certain types of behavior but also how the social environment interacts with these predispositions to produce observed behavioral patterns

Sex, Power and Pleasure Mariana Valverde, 1987 Text lust Body and erotic power Heterosexuality contested ground Lesbianism a country that has no language Bisexuality coping with sexual boundaries Pornography not for men only Imagining desire Pleasure and ethics *Rape and Sexual Power in Early America* Sharon Block, 2012-12-01 In a comprehensive examination of rape and its prosecution in British America between 1700 and 1820 Sharon Block exposes the dynamics of sexual power on which colonial and early republican Anglo American society was based Block analyzes the legal social and cultural implications of more than nine hundred documented incidents of sexual coercion and hundreds more extralegal commentaries found in almanacs newspapers broadsides and other print and manuscript sources Highlighting the gap between reports of coerced sex and incidents that were publicly classified as rape Block demonstrates that public definitions of rape were based less on what actually happened than on who was involved She challenges conventional narratives that claim sexual relations between white women and black men became racially charged only in the late nineteenth century Her analysis extends racial ties to rape back into the colonial period and beyond the boundaries of the southern slave labor system Early Americans treatment of rape Block argues both enacted and helped to sustain the social racial gender and political hierarchies of a New World and a new nation *Evolutionary Forensic Psychology* Joshua Duntley, Todd K. Shackelford, 2008-08-20 The field of forensic psychology explores the intersection of

psychology and the law The purpose of this book is to examine topics in the field using the powerful multidisciplinary conceptually integrated approach that the natural sciences have embraced for decades with great success Darwin's theory of evolution by natural selection is the meta theoretical framework that unifies the field of biology It unites research and understanding of the development control and organization of behavior The study of humans which includes all of the social sciences is part of the field of biology Darwin's theory provides a powerful meta theoretical framework that can unify and energize forensic psychology just as it has the biological sciences Evolutionary processes undoubtedly shaped physiological characteristics to help solve problems of survival and reproduction The lungs for example with their vast surface area and moist membranes are marvelous adaptations for extracting oxygen and releasing carbon dioxide Natural selection is the only known process capable of shaping complex functional mechanisms Just as it shaped physiological adaptations with specific problem solving functions it also shaped our thoughts and emotions to guide behaviors toward solving recurrent problems of survival and reproduction With this logic we can use knowledge of ancestral problems to guide our understanding of how the mind works Evolutionary Forensic Psychology is a necessary step toward a unified and complete understanding of psychology and the law It recognizes that crimes such as murder non lethal violence rape and theft are manifestations of evolutionarily recurrent selection when they gave individuals an advantage in competition for resources Each of the chapters that comprise this volume has been selected to provide the first unified examination of important research contributions and future directions of Evolutionary Forensic Psychology

The Constitution of Power Mark Haugaard, 1997 With *The Constitution of Power* Mark Haugaard provides an introduction to the analysis of social and political power and discusses the relationship between power structure and knowledge

Reconceiving the Renaissance Ewan Fernie, 2005-03-31 The last two decades have transformed the field of Renaissance studies and *Reconceiving the Renaissance: A Critical Reader* maps this difficult terrain Attending to the breadth of fresh approaches the volume offers a theoretical overview of current thinking about the period Collecting in one volume the classic and cutting edge statements which define early modern scholarship as it is now practised this book is a one stop indispensable resource for undergraduates and beginning postgraduates alike Through a rich array of arguments by the world's leading experts the Renaissance emerges wonderfully invigorated while the suggestive shorter extracts topical questions and engaged editorial introductions give students the wherewithal and encouragement to do some reconceiving themselves

Gender and Sexuality Chris Beasley, 2005-05-20 About various theories of gender sexuality feminism and masculinity including queer theory transgender theorizing modernist liberationism and social constructionism

Foucault and the Critique of Institutions John Caputo, Mark Yount, 2010-11-01

Power/Gender H. Lorraine Radtke, Henderikus J. Stam, Professor Henderikus J Stam, 1994-01-01 This book investigates the complex strands that inextricably link gender and power relations demonstrating how gender is constructed through the practices of power The contributors argue that female and male are shaped not only at the micro level of everyday social

interaction but also at the macro level where social institutions control and regulate the practice of gender Power Gender explores how theorizing on power is affected when gender is taken into account post Foucauldian theory of gender and power whether it is possible to separate gender and power the connections between gender and the practice of power in political contexts and how these connections work in the specific contexts of women s lives and whether the construction of sex or gender is an expression of power relations **Violence and the Female Imagination** Paula Ruth

Gilbert,2006-03-31 In the past twenty years Quebec women writers including Aline Chamberland Claire D Suzanne Jacob and H l ne Rioux have created female characters who are fascinated with bold sexual actions and language cruelty and violence at times culminating in infanticide and serial killing Paula Ruth Gilbert argues that these Quebec feminist writers are re framing gender Violence and the Female Imagination explores whether these imagined women are striking out at an external other or harming themselves through acts of self destruction and depression Gilbert examines the degree to which women are imitating men in the outward direction of their anger and hostility and suggests that such tough women may be mocking men in their macho exploits of sexuality and violence She illustrates the ways in which Quebec female authors are feminizing violence or re envisioning gender in North American culture Gilbert bridges methodological gaps and integrates history sociology literary theory feminist theory and other disciplinary approaches to provide a framework for the discussion of important ethical and aesthetic questions
