Power In Buildings An Artists View Of Contemporary Architecture:

Power in Buildings, 1953 [Power in Buildings](#) Hugh Ferriss, 2011-09 A welcome republication of a scarce title from America's greatest architectural draftsman First published in 1953 and long out of print the sixty bold drawings and informed text trace Ferriss's personal odyssey through the modern architecture of America from 1929 to 1953 Dams bridge anchorages grain elevators skyscraper projects and viaducts are delineated in Ferriss's rich and somewhat brooding chiaroscuro style while he surprises us with illustrations of such landmarks as the Johnson Wax building Taliesin West Lever House and the then unbuilt United Nations Headquarters **Power in Buildings**, 1953 *Power in Buildings. An Artist's View of Contemporary Architecture. Drawings and Text by H. Ferriss* Hugh Ferriss, 1953 *The Power of Buildings, 1920-1950* Hugh Ferriss, 2012-03-08 Trained as an architect in the early twentieth century Hugh Ferriss possessed a vision of form that surpassed the traditional blueprints of his peers and it showed in his distinctively moody renderings A master of light and shadow he managed to capture the spirit of each building with a heightened sense of perspective and design By the 1920s he was well on his way to becoming America's greatest architectural draftsman Ferriss's remarkable style which influenced generations of builders is highlighted in this illustrated journey through three decades of American architecture Accompanied by illuminating text and captions this collection of sixty of his extraordinary drawings includes Rockefeller Center a stunning symbol of modern Art Deco style California's Shasta Dam ranked as one of the great civil engineering feats of the world the Perisphere and Trylon from New York's 1939 World's Fair Taliesin in Arizona Frank Lloyd Wright's breathtaking winter home and Denver's Red Rocks Amphitheater a dramatic structure that incorporates natural elements and rock formations Plus there are illustrations of the Empire State Building the United Nations headquarters airports grain elevators bomb shelters and more Architects draftsmen and designers of all ages will savor the wonder and imagination in this magnificent volume **Encyclopedia of Twentieth Century Architecture** R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the [Encyclopedia of 20th Century Architecture](#) website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries [The Skyscraper and the City](#) Gail Fenske, 2008-08 Once the world's tallest skyscraper the Woolworth Building is noted for its striking but incongruous synthesis of Beaux Arts architecture fanciful Gothic ornamentation and audacious steel framed engineering Here in the first history of this great urban landmark Gail Fenske argues that its design serves as a compelling lens through which to view the distinctive urban culture of Progressive era New York Fenske shows here that the building's multiplicity of meanings reflected the cultural contradictions that defined New

York City's modernity For Frank Woolworth founder of the famous five and dime store chain the building served as a towering trademark for advocates of the City Beautiful movement it suggested a majestic hotel de ville for technological enthusiasts it represented the boldest of experiments in vertical construction and for tenants it provided an evocative setting for high style consumption Tourists meanwhile experienced a spectacular sightseeing destination and avant garde artists discovered a twentieth century future In emphasizing this faceted significance Fenske illuminates the process of conceiving financing and constructing skyscrapers as well as the mass phenomena of consumerism marketing news media and urban spectatorship that surround them As the representative example of the skyscraper as a cathedral of commerce the Woolworth Building remains a commanding presence in the skyline of lower Manhattan and the generously illustrated **Skyscraper and the City** is a worthy testament to its importance in American culture

Interpreting Site Genevieve Baudoin, 2015-04-17 Interpreting Site explains the basic methods architects use to translate what you perceive to represent the complex conditions that physically and mentally construe a site helping to shape the ultimate design Within each of the four themes defining site experiencing site spatializing site and systematizing site theoretical conceptual and analytic methods and representational tools are introduced to give you a foundation to develop your own approach to the conditions of a site Author Genevieve S Baudoin examines longstanding representation methods in relation to emerging and experimental methods offering an idiosyncratic and provocative look at different approaches Four highly illustrated full colour case studies of key contemporary projects in Spain the United States the United Kingdom and Norway demonstrate how architects have used conditions discovered on a site in their final design

American Architects and Texts Juan Pablo Bonta, 1996 In this volume the author analyzes 400 architectural books and articles published over the past 150 years to reveal changing societal preferences in architecture and to measure the reputations of individual architects the text includes a ranked list of the 100 most famous architects

Privately Owned Public Space Jerold S. Kayden, The New York City Department of City Planning, The Municipal Art Society of New York, 2000-11-10 Hailed by the Wall Street Journal as a juicy little time bomb of a book *Privately Owned Public Space: The New York City Experience* examines for the first time New York City's 39 year mixed experience with the production of more than 500 plazas parks and atriums located on private property yet by law accessible to and usable by the public Until now comprehensive systematic knowledge about this vast collection of public spaces has not existed either for experts or members of the public To remedy this gap Harvard University professor Jerold S Kayden The New York City Department of City Planning and The Municipal Art Society of New York have joined forces to research and write *Privately Owned Public Space: The New York City Experience* Through words photographs scaled site plans maps and analysis of newly assembled data they examine history law design and use of the city's privately owned

public spaces Each of the more than 500 spaces is individually discussed to provide far reaching comparative information about this unique category of public space In reading this book designers planners lawyers and academics will gain greater understanding about the possibilities and problems inherent in the design management and enforcement of privately owned public space Public officials private owners and civic group representatives will learn more about their roles in ensuring public access and vitality of such spaces Individuals will discover where New York City s public spaces are located and what amenities they offer Everyone will comprehend more completely the contribution that privately owned public space can make toward open and attractive cities in which all individuals have access to a diversity of public places

A Dictionary of Architecture and Landscape Architecture , Beyond Decommissioning Michele Laraia,2019-06-08 *Beyond Decommissioning The Reuse and Redevelopment of Nuclear Installations* presents the most up to date research and guidance on the reuse and redevelopment of nuclear plants and sites Consultant Michele Laraia extensively builds upon experience from the redevelopment of non nuclear industrial sites a

technical field that has considerably predated nuclear applications to help the reader gain a very thorough and practical understanding of the redevelopment opportunities for decommissioned nuclear sites Laraia emphasizes the socioeconomic and financial benefits from very early planning for site reuse including how to manage the decommissioning transition anticipate financial issues and effectively utilize available resources With an increasing number of decommissioning projects being conducted worldwide it is critical that knowledge gained by experts with hands on experience is passed on to the younger generation of nuclear professionals Besides this book describes the experiences of non nuclear organizations that have reutilized the human financial and physical site assets with adaptations for a new productive mission making it a key reference for all parties associated with nuclear operation and decommissioning Those responsible for nuclear operation and decommissioning are encouraged to incorporate site reuse within an integrated beginning to end view of their projects The book also appeals to nuclear regulators as it highlights more opportunities to complete nuclear decommissioning safely speedily and in the best interests of all concerned parties Includes lessons learned from worldwide case studies of reuse and repurposing of nuclear plants from both the nuclear and non nuclear industries Provides practical guidance on a broad spectrum of factors and opportunities for nuclear decommissioning Identifies the roles and responsibilities of parties involved including nuclear operators regulators and authorities land planners and environmentalists **Art Power** Boris

Groys,2013-02-08 A new book by Boris Groys acknowledges the problem and potential of art s complex relationship to power Art has its own power in the world and is as much a force in the power play of global politics today as it once was in the arena of cold war politics Art argues the distinguished theoretician Boris Groys is hardly a powerless commodity subject to the art market s fiat of inclusion and exclusion In **Art Power** Groys examines modern and contemporary art according to its ideological function Art Groys writes is produced and brought before the public in two ways as a commodity and as a tool of political propaganda In the contemporary art scene very little attention is paid to the latter function Arguing for the inclusion of politically motivated art in contemporary art discourse Groys considers art produced under totalitarianism Socialism and post Communism He also considers today s mainstream Western art which he finds behaving more and more according the norms of ideological propaganda produced and exhibited for the masses at international exhibitions biennials and festivals Contemporary art Groys argues demonstrates its power by appropriating the iconoclastic gestures directed against itself by positioning itself simultaneously as an image and as a critique of the image In **Art Power** Groys examines this fundamental appropriation that produces the paradoxical object of the modern artwork
