**City Bound** Gerald E. Frug,David J. Barron,2013-07-02 Many major American cities are defying the conventional wisdom that suburbs are the communities of the future But as these urban centers prosper they increasingly confront significant constraints In City Bound Gerald E Frug and David J Barron address these limits in a new way Based on a study of the differing legal structures of Boston New York Atlanta Chicago Denver San Francisco and Seattle City Bound explores how state law determines what cities can and cannot do to raise revenue control land use and improve city schools Frug and Barron show that state law can make it much easier for cities to pursue a global city or a tourist city agenda than to respond to the needs of middle class residents or to pursue regional alliances But they also explain that state law is often so outdated and so rooted in an unjustified distrust of local decision making that the legal process makes it hard for successful cities to develop and implement any coherent vision of

their future Their book calls not for local autonomy but for a new structure of state local relations that would enable cities to take the lead in charting the future course of urban development It should be of interest to everyone who cares about the future of American cities whether political scientists planners architects lawyers or simply citizens     The City Alan S. Berger,1978     **The Political Economy of the Living Wage: A Study of Four Cities** Oren M. Levin-Waldman,2016-07-22 This book examines the movement for living wages at the local level and what it tells us about urban politics Oren M Levin Waldman studies the role that living wage campaigns may have had in recent years in altering the political landscape in four cities where they have been adopted Los Angeles Detroit Baltimore and New Orleans It is the author s belief that the living wage movements are a result of policy failure at the local level They are the by product of the failure to adequately address the changes that were occurring mainly the changing urban economic base and growing income inequality The author undertakes a scholarly analysis of the issue through the disciplinary lenses of political science while also employing some of the economists tools     Overcoming Barriers Craig Taylor,Elliott Mittler,Le Val Lund,1998-01-01 Prepared by the Technical Council on Lifeline Earthquake Engineering of ASCE This TCLEE Monograph studies seven large lifeline organizations that have undertaken significant seismic improvement programs In spite of often cited barriers to natural hazards risk reduction these organizations demonstrate a variety of ways to start and sustain risk reduction programs In these economically and politically robust organizations top level managers and high level inside technical seismic advocates learned from the damage done by past earthquakes to their systems or similar systems and from research and educational programs Then each group developed an overall view of its system s earthquake vulnerabilities and devised adaptable incremental seismic implementation programs
