Creative Intelligence: Essays in the Pragmatic Attitude Various Authors, Intellectual advance occurs in two ways At times increase of knowledge is organized about old conceptions while these are expanded elaborated and refined but not seriously revised much less abandoned At other times the increase of knowledge demands qualitative rather than quantitative change alteration not addition Men s minds grow cold to their former intellectual concerns ideas that were burning fade interests that were urgent seem remote Men face in another direction their older perplexities are unreal considerations passed over as negligible loom up Former problems may not have been solved but they no longer press for solutions Philosophy is no exception to the rule But it is unusually conservative not necessarily in proffering solutions but in clinging to problems It has been so allied with theology and theological morals as representatives of men s chief interests that radical alteration has been shocking Men s activities took a decidedly new turn for example in the seventeenth century and it seems as if philosophy under the lead of thinkers like Bacon and Descartes was to execute an about face But in spite of the ferment it turned out that many of the older problems were but translated from Latin into the vernacular or into the new terminology furnished by science The association of philosophy with academic teaching has reinforced this intrinsic conservatism Scholastic philosophy persisted in universities after men s thoughts outside of the walls of colleges had moved in other directions In the last hundred years intellectual advances of science and politics have in like fashion been crystallized into material of instruction and now resist further change I would not say that the spirit of teaching is hostile to that of liberal inquiry but a philosophy which exists largely as something to be taught rather than wholly as something to be reflected upon is conducive to discussion of views held by others rather than to immediate response Philosophy when taught inevitably magnifies the history of past thought and leads professional philosophers to approach their subject matter through its formulation in received systems It tends also to emphasize points upon which men have divided into schools for these lend themselves to retrospective definition and elaboration Consequently philosophical discussion is likely to be a dressing out of

antithetical traditions where criticism of one view is thought to afford proof of the truth of its opposite as if formulation of views guaranteed logical exclusives Direct preoccupation with contemporary difficulties is left to literature and politics

Creative Intelligence in the 21st Century Don Ambrose, Robert J. Sternberg, 2016-07-15 How can creative individuals and societies adapt to complex 21st century conditions Will civilizations thrive or collapse in the decades to come if they are not creative enough or if they are too creative Interest in these questions is growing however until now there has been inadequate understanding of the socioeconomic and cultural trends and issues that influence creativity This book provides that understanding while yielding insights from many of the world's leading creativity researchers and educational experts The book begins with a big picture interdisciplinary overview of the socioeconomic cultural and technological pressures emerging from 21st century globalization and describes some ways in which those pressures simultaneously suppress distort and invigorate creativity in general and creative education in particular After that prominent scholars of creativity and education use their impressive knowledge bases to clarify how we can adjust our thoughts and actions in order to give ourselves the best possible chances for success in this complex world The world's problems are complex messy and seemingly intractable but history tells us that human creativity finds solutions to even the most daunting problems This book collects perspectives on creative development from many of the most respected scholars and educators working in creativity and innovation today helping chart a path forward for creativity in the 21st century Jonathan Plucker Julian C Stanley Endowed Professor of Talent Development Johns Hopkins University A volume taking on macro opportunities and macroproblems by editors Ambrose and Sternberg is a treat for readers who want to think big and think forward Kick back for an imaginative journey that reaches back to early global insights but propels us solidly into the 21st century and beyond Ann Robinson Past President National Association for Gifted Children
