The Generative Power of Hope Frederick Bird, 2022-04-26 This book analyses how and why we are living at a critical moment in the history of human life on earth and explores how we find grounds for the hopes that will enable us to address the challenges and crises of our time The author analyses hope both practically and philosophically as a generative virtue to realistically discern the situations in which we find ourselves and imaginatively to anticipate possibilities when the future is

unknown and uncertain The author argues that hope is a mean between anomy disillusionment and despair on the one hand and wishful thinking dreaming and fanaticizing on the other hand The book not only examines and analyzes from a historical perspective the contemporary crises such as climate change environmental degradation and its effects such as the social costs of these developments but also further analyzes the character and micro dynamics of hope and how it makes a difference in how we manage the crises which inevitably emerge Though contemporary crises are those we tend to focus on the author also engages with what is involved in a due regard for history and the relevance of a sense of history for addressing the crises of our time He shows us what we can learn from revisiting some thoughtful reflections by thinkers like Niebuhr Jaspers Camus and Arendt Finally the author shows us what is involved practically in anticipating possibilities by looking at hope as a social practice and noting how hopeful people make a difference

**The Healing Power of Hope** Jean Maalouf, 2004-10 This book makes a beautiful gift of encouragement The author discusses the difference between mere optimism and true hope He helps readers examine how faith influences the hope in their lives and he helps them recognize that hope is the basis for continued achievement and existence
