*Power and the Engineer*, 1893      **The Reasoning of Unreason** John Roberts, 2018-08-23 The twenty first century so far has seen the global rise of authoritarian populism systematic racism and dogmatic metaphysics Even though these events demonstrate the growth of an age of unreason in this original and compelling book John Roberts resists the assumption that such thinking displays an unthinking irrationality or loss of reason instead he asserts that an important feature of modern reactionary politics is that it offers a supposedly convincing integration of the particular and the universal This move is defined by what Roberts calls the reasoning of unreason and has deep roots in the history of Western thought and politics Tracing the dark history of enlightenment disenlightenment John Roberts explores the reasoning of unreason across centuries from Aquinas William of Ockham the most important treatise on witchcraft Malleus Maleficarum Locke Kant and Count Arthur de Gobineau to Social Darwinism Nazism Carl Schmitt Leo Strauss and Friedrich von Hayek Roberts provides a new set of philosophical political tools to understand the formation and denigration of the rational subject and the current reinvestment in various forms of political unreason globally *The Reasoning of Unreason* is the first book to draw on the philosophy of reason political philosophy political theory and political history in order to produce a dialectical account of the making of reason internal to the forces of unreason and the limits of reason      *Time, History, and Literature* Erich

Auerbach, 2021-08-10 Important essays from one of the giants of literary criticism including a dozen published here in English for the first time Erich Auerbach 1892 1957 best known for his classic literary study *Mimesis* is celebrated today as a founder of comparative literature a forerunner of secular criticism and a prophet of global literary studies Yet the true depth of Auerbach's thinking and writing remains unplumbed *Time History and Literature* presents a wide selection of Auerbach's essays many of which are little known outside the German speaking world Of the twenty essays culled for this volume from the full length of his career twelve have never appeared in English before and one is being published for the first time Foregrounded in this major new collection are Auerbach's complex relationship to the Judaeo Christian tradition his philosophy of time and history and his theory of human ethics and responsible action Auerbach effectively charts out the difficult discovery in the wake of Christianity of the sensuous the earthly and the human and social worlds A number of the essays reflect Auerbach's responses to an increasingly hostile National Socialist environment These writings offer a challenging model of intellectual engagement one that remains as compelling today as it was in Auerbach's own time

**Twilight of the Literary** Terry Cochran, 2009-07-01 In Western thought the modern period signals a break with stagnant social formations the advent of a new rationalism and the emergence of a truly secular order all in the context of an overarching globalization In *The Twilight of the Literary* Terry Cochran links these developments with the rise of the book as the dominant medium for recording preserving and disseminating thought Consequently his book explores the role that language plays in elaborating modern self understanding It delves into what Cochran calls the figures of thought that have

been an essential component of modern consciousness in the age of print technology and questions the relevance of this print bound thinking in a world where print no longer dominates Cochran begins by examining major efforts of the eighteenth century that proved decisive for modern conceptions of history knowledge and print After tracing late medieval formulations of vernacular language that proved crucial to print he analyzes the figures of thought in print culture as they proceed from the idea of the collective spirit the people an elaboration of modern history Cochran reconsiders basic texts that in his analysis reveal the underpinnings of modernity s formation from Dante and Machiavelli to Antonio Gramsci and Walter Benjamin Moving from premodern models for collective language to competing theories of history his work offers unprecedented insight into the means by which modern consciousness has come to know itself **PC Mag** ,1991-09-10 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology A Treatise on the Augustinian Doctrine of Predestination J .....
