years In Still Growing however Donald Capps shows that older adulthood is actually a period of growth and development and that a central feature of this growth and development is the remarkable creativity of older adults This creativity is the consequence of the wisdom gained through years of experience but is also due to a newly developed capacity to adapt to unprecedented challenges integral to the aging process In Part 1 Capps illustrates the challenges of transitioning to older adulthood from the author s own experiences while in Part 2 he draws on material from Erik H Erikson Sigmund Freud and Paul W Pruyser to account for longevity adaptability and creativity in older adults Finally in part 3 he focusses on the work of both William James and Walt Disney to fashion a model of creative aging

The author illuminates connections among the histories of modern art body cultures and physiological aesthetics in early
twentieth century American culture fundamentally altering our perceptions about art and the physical and the degree of
cross pollination in the arts The Living Line shows that American producers and consumers of modernist visual art
repeatedly characterized their aesthetic experience in terms of kinesthesia the sense of bodily movement They explored

art was galvanized by theories of bodily response derived from experimental physiological psychology and facilitated by
contemporary body cultures such as modern dance rhythmic gymnastics physical education and physical therapy Situating
these complementary ideas and exercises in relation to enduring fears of neurasthenia Veder contends that aesthetic
modernism shared industrial modernity s objective of efficiently managing neuromuscular energy In a series of finely grained
and interconnected case studies Veder demonstrates that diverse modernists associated with the Armory Show the Soci t
