The Power to Choose Naila Kabeer, 2020-05-05 In this path breaking study social economist Naila Kabeer examines the lives of Bangladeshi garment workers in Bangladesh and Britain to shed light on the question of what constitutes fair competition in international trade She argues that if the unhealthy coalition of multinationals and labor movements is truly seeking to improve the working conditions for women and children in the Third World as well as those of western workers their efforts should be directed away from an attempt to impose labor standards and towards a support for the organization of labor rights Any attempt to devise acceptable labor standards at an international level which takes no account of the forces of inclusion and exclusion with local labor movements is she further argues likely to represent the interests of the powerful at the expense of those of the weak

Class Dynamics of Development Jonathan Pattenden,Liam Campling,Satoshi Miyamura,Benjamin Selwyn,2018-12-07 This book argues that class relations are constitutive of development processes and central to understanding inequality within and between countries It does so via a transdisciplinary approach that draws on case studies from Asia Latin America and sub Saharan Africa Contributors illustrate and explain the diversity of forms of class relations and the ways in which they interplay with other social relations of dominance and subordination such as gender and ethnicity as part of a wider project to revitalise class analysis in the study of development problems and experiences Class is conceived as arising out of exploitative social relations of production but is formulated through and expressed by multiple determinations By illuminating the diversity of social formations this book illustrates the depth and

complexity present in Marx's method This book was originally published as a special issue of Third World Quarterly **The Oxford Handbook of Gender and Politics** Georgina Waylen, 2013-04-04 The Oxford Handbook of Gender and Politics brings to political science an accessible and comprehensive overview of the key contributions of gender scholars to the study of politics and it shows how these contributions produce a richer understanding of politics and societies *Credit to Capabilities* Paromita Sanyal, 2014-12-11 This book focuses on how group based microcredit programs in India facilitate women's empowerment through the mechanism of group participation and networking **Coolies, Capital and Colonialism** Rana P. Andrea Cornwall,Elizabeth Harrison,Ann Whitehead,2013-07-04 This collection of essays by leading feminist thinkers from North and South constitutes a major new attempt to reposition feminism within development studies Feminism's emphasis on social transformation makes it fundamental to development studies Yet the relationship between the two disciplines has frequently been a troubled one At present the way in which many development institutions function often undermines feminist intent through bureaucratic structures and unequal power quotients Moreover the seeming intractability of inequalities and injustice in developing countries have presented feminists with some enormous challenges Here emphasizing the importance of a plurality of approaches the authors argue for the importance of what feminisms have to say to development Confronting the enormous challenges for feminisms in development studies this book provides real hope for dialogue and exchange between feminisms and development **Handbook Global History of Work** Karin
