Perspectives on Ancient Maya Rural Complexity Samuel V. Connell,Gyles Iannone,2003-12-01 Settlement

archaeology in the Maya area has focused much of its attention on the polar extremes of the settlement continuum As a result of this urban rural bias a whole range of complex rural settlements remain under explored The chapters in this volume highlight the variable quality of these middle level settlements *Political Economy and American Capitalism* Rodney D. Peterson, 2012-12-06 We are now witness to the waning years of the 1900s Soon we shall embark upon a bold journey into the uncharted territory of the twenty first of various persuasions have speculated as to what the century Futurists oncoming decades might bestow upon us Not surprising most predictions are closely tied to advances in technology especially in astrophysics biochemistry electronics and genetics But what about the economic system Whatever happens forces have undoubtedly already been set in motion which will mold or remold the structure and character of American capitalism American capitalism has been is and will undoubtedly continue to be a system in transition Technology perennially changes albeit at a faster or slower pace sometimes than others and society's institutions continually adjust to these technological changes Such adjustments alter the character of our politico economic system when statutes are enacted court decisions rendered administrative agency rules promulgated and cultural mores realigned to supplant old ones Other adaptations are brought about when small group collective action is successful in causing a special status of privilege to be conferred on some members of society but restrictions to be levied on others **Semiperipheral Development and Foreign Policy** M. Fatih Tayfur, 2018-02-05 This title was first published in 2003 Tayfur's theoretical approach to foreign policy analysis is original and represents an extremely valuable addition to a field which is under theorised It develops the World System theory of Wallerstein and Arrighi In applying this theory to two case studies Tayfur offers a detailed account of the domestic and foreign policies of Greece and Spain after the Second World War He illuminates in particular their turn from a foreign policy orientation towards the United States to a growing identification with and eventual integration into the European Community This original book is pertinent to a range of contemporary debates and suitable to feature on the reading lists of every course on foreign policy analysis and international political theory In addition students of comparative politics political transition and Mediterranean studies will find this book particularly useful **Revisiting Institutionalism in Sociology** Seth Abrutyn, 2013-11-07 There may not be a concept so central to sociology yet so vaguely defined in its contemporary usages than institution In *Revisiting Institutionalism in Sociology* Abrutyn takes an in depth look at what institutions are by returning to some of the insights of classical theorists like Max Weber and Herbert Spencer the functionalisms of Talcott Parsons and S N Eisenstadt and the more recent evolutionary institutionalisms of Gerhard Lenski and Jonathan Turner Returning to the idea that various levels of social reality shape societies Abrutyn argues that institutions are macro level structural and cultural spheres of action exchange and communication They have emergent properties and dynamics that are not reducible to other levels of social reality Rather than fall back on old functionalist solutions Abrutyn offers an original and synthetic theory of institutions like religion or economy the process by which they become autonomous or distinct cultural

spaces that shape the color and texture of action exchange and communication embedded within them and how they gain or lose autonomy by theorizing about institutional entrepreneurship Finally Abrutyn lays bare the inner workings of institutions including their ecology the way structure and culture shape lower levels of social reality and how they develop unique patterns of stratification and inequality founded on their ecology structure and culture Ultimately Abrutyn offers a refreshing take on macrosociology that brings functionalist conflict and cultural sociologies together while painting a new picture of how the seemingly invisible macro world influences the choices humans make and the goals we set IR James M.
