Power In The Global Age

Power In The Global Age:

Power in the Global Age Ulrich Beck, 2014-10-15 This brilliant new book by one of Europe's leading social thinkers throws light on the global power games being played out between global business nation states and movements rooted in civil society Beck offers an illuminating account of the changing nature of power in the global age and assesses the influence of the ever expanding counter powers The author puts forward the provocative thesis that in an age of global crises and risks a politics of golden handcuffs the creation of a dense network of transnational interdependencies is exactly what is needed in order to regain national autonomy not least in relation to a highly mobile world economy It is imperative that the maxim of nation based realpolitik that national interests have necessarily to be pursued by national means be replaced by the maxim of cosmopolitan realpolitik The more cosmopolitan our political structures and activities Beck suggests the more successful they will be in promoting national interests and the greater our individual power in this global age will be **Structural Power**

in the Global Age Xuewu Gu, 2022-10-07 In light of recent global trends and crises including the hasty withdrawal of Western troops from Afghanistan and the Russian war of aggression against Ukraine this book sheds new light on global power shifts in multiple areas of international relations between industrialized countries and emerging powers This book argues that the global age is rapidly supplanting the modern age and that modernity is paving the way for globality The events that are taking place in the 21st century can no longer be effectively described understood or explained by the concept of modernity which originated more than 500 years ago Further this book challenges the academic and societal tendency to view international power related phenomena on the basis of a dichotomy between hard and soft power It assumes that another power source independent of hard and soft power does exist Invisible structure manipulating and effectively leveraged it is precisely this third power that drives and shapes power phenomena in the global age more intensively than either hard or soft power This book seeks to verify its core hypotheses by applying them to a set of selected global phenomena particularly from the domains of geopolitics Belt Road Initiative Iran conflict war in Afghanistan and competition for a new world order and technology Global Navigation Satellite Systems 5G infrastructure race for international standards and ICT rivalry Rather than systematically examining each of these issues it focuses on extracting theoretical meanings from these cases to demonstrate the logic of globality and structural power partly from global horizontal perspectives partly through a structural vertical lens **International Relations in a Global Age** Gillian

Youngs, 2013-05-02 The book investigates the ways in which state centred approaches to international relations have limited our understanding of global political economic and cultural processes By assessing a wide range of such state centred work Youngs identifies the challenges we must address to grasp the complexity of the contemporary world *Global Politics* Ben Whitham, Andrew Heywood, 2023-03-31 In turbulent global times your study of this subject is increasingly necessary and urgent Featuring a new chapter on critical theories and revised to take a less Eurocentric approach to concepts and case

The Global Age Martin Albrow, 1997 Taking issue with those who see recent social transformations as an extension of modernity the author contends that social theory must confront an epochal change from the modern era to a new era of globality in which human beings can conceive of forces at work on a global scale and in which they espouse values that take the globe as their reference point The book begins by assessing the problems of writing about modernity showing how narratives of an endlessly self perpetuating modern age were intrinsic to the modern project the attempt by Enlightenment philosophers to transform the everyday world in accord with science and logic under the auspices of the nation state Now we are beginning to realize that the nation state and the modern project cannot renew themselves endlessly through expansion Instead the author contends the age has culminated in its own dissolution and globality has supplanted modernity as the basis for action and social organization In theorizing the global age he considers the worldwide environmental consequences of aggregate human activities the reconception of human security in the age of nuclear weapons technological advances in communication systems the rise of a global economy and the growing reflexivity of global consciousness as people and groups begin to refer to the globe as the frame for their beliefs The book concludes by examining the consequences of the Global Age thesis for politics identifying a new popular construction of the state that the author terms performative citizenship In the modern age the nation state was the central power and citizens were beneficiaries of that power with rights and duties In the global age citizens respond to the lack of central power by creating or performing the state themselves The global managerial class uses the skills learned in the bureaucracy of the nation state to bring pressure on national governments in the interests of global economic environmental or human rights issues
