Preparing Antiracist Teachers Christine Montecillo Leider, Christina L.

Dobbs, Erin Nerlino, 2024-12-27 *Preparing Antiracist Teachers* Fostering Antiracism and Equity in Teacher Preparation examines multiple strategies and theories for developing antiracist attitudes and actions in teachers and teacher candidates. This textbook uses critical consciousness as a framework to help practitioners and scholars to facilitate the process of doing antiracist work. The book is divided into three sections with Part 1 focusing on critical reflection which refers to a social analysis and moral rejection of societal inequities such as social economic racial ethnic and gender inequities that constrain well being and human agency. It shows that those who are critically reflective view social problems and inequalities in systemic terms and are therefore better able to address them. Part 2 examines sociopolitical efficacy which refers to the perceived capacity to effect social and political change by individual and or collective activism. Part 3 centers on critical action that is individual or collective action taken to change aspects of society such as institutional policies and practices that are perceived to be unjust. This is a broad view of activism that can include participation in activities such as voting community organizing and peaceful protests. Showcasing both USA based and international case studies *Preparing Antiracist Teachers* will support teacher educators in their work by presenting nuanced and important means of teacher education for antiracism and critical consciousness. It will also benefit those studying related courses including Teacher Education Social Justice Education and Multicultural Education.

[Transitions To Alternative Energy Systems](#) Thomas Baumgartner, 2019-03-22 The industrial world was built to run on cheap oil and now the cheap oil has run out For a while longer the West will depend for its energy upon expensive oil much of it obtained from sources that are geographically remote or politically unstable so in the near future the world must shift from oil to other sources of energy

TRANSITIONS TO ALTERNATIVE ENERGY SYSTEMS explores how such change can best be encouraged. The governments of the world then do not have the option of piously washing their hands of the energy crisis. Through its careful analysis of past programs to promote renewable resource development, Tom Baumgartner's new book provides the public sector with precisely the kind of guidance it needs.
