Power Of Power Politics From Classical Realism To Neotraditionalism:

The Power of Power Politics John A. Vasquez,1998 In this new and much expanded edition of his classic study John Vasquez examines the power of the power politics perspective to dominate inquiry and evaluates its ability to provide accurate explanations of the fundamental forces underlying world politics

Realism and Institutionalism in International Studies Michael Brecher, Frank P. Harvey, 2009-12-11 Realism and Institutionalism in International Studies represents a unique collection of original essays by foremost scholars in the field of International Studies Six essays advocate critique or revise Realism the theoretical paradigm that explains international politics by emphasizing security competition and war among states The remaining four essays address Institutionalism the paradigm that offers explanations for the formation maintenance variation and significance of international institutions The authors reflect on the strengths and weaknesses of these approaches and suggest research agendas for the future Together this volume provides an accessible and wide ranging survey of the issues concerning two major paradigms in International Studies This volume will be of interest to scholars and students alike and will undoubtedly determine the shape of future research

Morgenthau William E. Scheuerman, 2013-04-30 The ideas of Hans Morgenthau dominated the study of international politics in the United States for many decades He was the leading representative of Realist international relations theory in the last century and his work remains hugely influential in the field In this engaging and accessible new study of his work William E Scheuerman provides a comprehensive and illuminating introduction to Morgenthau s ideas and assesses their significance for political theory and international politics Scheuerman shows Morgenthau to be an uneasy Realist uncomfortable with conventional notions of Realism and sometimes unsure whether his reflections should be grouped under its rubric He was a powerful critic of the existing state system and defended the idea of a world state By highlighting Morgenthau s engagement with the leading lights of European political and legal theory Scheuerman argues that he developed a morally demanding political ethics and an astute diagnosis of the unprecedented perils posed by nuclear weaponry Believing that the irrationalities of US foreign policy were rooted partly in domestic factors he sympathized with demands for radical political and social change Scheuerman illustrates that Morgenthau s thinking has been widely misunderstood by both disciples and critics and that it offers many challenges to contemporary Realists who discount his normative aspirations With the advent of the cosmopolitan goal of international reform Morgenthau s work serves up an unsettling mix of sympathy and hard headed skepticism which remains crucially important in the development of the field Lucidly and persuasively written this book will be a valuable resource for students and scholars seeking to understand the continued importance of Morgenthau s thinking

understand IR *Energy Security in the Eastern Mediterranean Region* Floros Flouros, 2022-08-24 This book aims to provide an overview of crucial aspects related to the interconnection between the political economy of energy security and national security which is of great importance globally due to high volatility and complexity In this book contemporary energy issues in relation to the energy security are examined along with main vulnerabilities and challenges that have appeared lately with an impact beyond country borders and with a particular focus on the Eastern Mediterranean region Energy security is studied on both International and European level and finally the Eastern Mediterranean region with special reference to the countries of the State of Israel and the Republic of Cyprus The rapidly changing geopolitical environment makes energy security one of the critical areas of immediate interest that need a holistic approach The importance of energy security in the Eastern Mediterranean region is constantly growing and requires the proper vision to enhance security in the region Energy is now linked to the issues of sustainable development and tackling climate change which is also taken into account Finally this book is expected to contribute to the existing literature and provide an in depth study that gives a fresh approach to the academic and political community **Millennial Reflections on International Studies** Michael Brecher, Frank P. Henahan, 2010-06-02 In the traditional view of foreign policy making in the United States the President is considered the primary authority and Congress is seen as playing a subsidiary role Marie T Henahan looks at the effects of events in the international system on both the content of foreign policy and what actions Congress takes on foreign policy Henahan argues that the only way to understand the way congressional behavior varies over time is by looking at the rise and resolution of critical issues in foreign policy which in turn have their origin in the international system When a critical foreign policy issue arises congressional activity and

attempts to influence foreign policy increase Once the debate is resolved and one side wins a consensus emerges and Congress settles into a more passive role Using a data set consisting of all roll call votes on foreign policy issues taken by the Senate from 1897 to 1984 to generate indicators of Congressional behavior together with the rise and fall of critical issues in international relations Henahan is able to develop a more nuanced understanding of Congress's role in foreign policy making over time In recent years political scientists have begun to consider the impact of the international system on domestic policy Part of the difficulty of some of this work as well as work on Congress's role in foreign policy is that it has been limited in terms of time and the number of events the analysis considered depending on case studies This book offers a systematic consideration of the effects of international events on domestic politics crossing many different kinds of international activity and provides a unique longitudinal view of Congressional action on foreign policy This book will be of interest to scholars of international relations American foreign policy making and Congress Marie T Henahan is Assistant Professor of Political Science Vanderbilt University

International Norms and the Resort to War Gregory A. Raymond, 2020-08-27 This book offers a fresh perspective on timeless questions concerning anarchy and order power and principle and public and private morality by taking a novel approach to the study of the onset of war Rather than looking at the distribution of wealth military might or other material capabilities to explain the onset of war this book focuses instead on how international norms affect the use of military force Critical of the realist assumption that international legal norms are unable to curb hostilities without a powerful central authority to enforce their injunctions it contends that the normative context within which national leaders act sets the tone for world politics by communicating commonly accepted understandings about the limits of permissible action Using quantitative analyses of the relationships between war initiation norms and various types of armed conflict the author calls into question realist beliefs regarding international norms demonstrating that restrictive normative orders reduce the likelihood of war

establishment of a Palestinian state has long been a strategic objective of EU and Russian foreign policy in the Middle East. However, over a decade after the creation of the road map, the establishment of an independent Palestinian state has still not been achieved. Palestine in EU and Russian Foreign Policy uses the school of constructivism to provide a new understanding of EU and Russian foreign policy. It explores the failure of these global actors to speed up the process of establishing a Palestinian state despite this being a strategic objective and top priority of their involvement in the Middle East peace process. The book then analyses the role of identity and self-other perception in the making of EU and Russian foreign policy towards the Middle East peace process. It is argued that Palestinian statehood provides a telling empirical example of how and to what extent the search for global actorness as a matter of international identity informs foreign policy making by global actors. The book then proceeds to discuss why the EU and Russia are so eager to be involved in initiating a peace settlement. Offering a new understanding of foreign policy making by global players in Middle Eastern politics, this book will appeal to students, scholars, and policymakers working in International Relations and European, Russian, and Middle Eastern studies.

Arms Control in the Middle East Emily B. Landau, 2006-08-24. This book focuses on the Middle East arms control process as it unfolded during the years 1992-1995 as part of the multilateral track of the Arab-Israeli peace process initiated in Madrid, October 1991.

Neorealism Versus Strategic Culture John Glenn, 2018-01-18. The debate between Neorealists and Strategic Culturalists centres on whether it is possible to explain/predict state behaviour without taking into account the particular characteristics of the state, such as its historical experiences, geographical context, and cultural constitution. This informative debate is encapsulated in the first section of the book, which considers the theoretical issues raised by both Neorealism and Strategic Culture. These issues are then explored in the second section by assessing their relevance to six country case studies: Australia, Germany, India, Japan, Nigeria, and Russia.
