## **Power Race And Culture The Evolution Of A Black Anthropologist:**

*Power, Race, and Culture* Janis Faye Hutchinson, 2005 The author examines becoming an anthropologist from the perspective of a black female who grew up in the South during the Civil Rights era It intertwines her childhood experiences and socialization in a segregated South with her academic experiences and training in anthropology to examine race and race relations in the United States She specifically looks at the impact of the concept of race on her professional development and provides a modern outlook on diversity Publisher **The Shadow Side of Fieldwork** Athena McLean, Annette Leiby, 2008-04-15

*The Shadow Side of Fieldwork* draws attention to the typically hidden or unacknowledged aspects of ethnographic fieldwork encounters that nevertheless shape the resulting knowledge and texts Addressing these invisible elusive unspoken or mysterious elements introduces a distinctive rigor and responsibility to ethnographic research Luminaries in anthropology dare to explore the unspeakable and invisible in the ethnographic encounter Considers personal and professional challenges ethical epistemological and political faced by researchers who examine the subjectivities inherent in their ethnographic insights Explores the value and limitations of addressing the personal in ethnographic research Includes a critical discussion of the anthropologist's self in the field Introduces

imaginative rigor to ethnographic research to heighten confidence in anthropological knowledge *The Anthropology of White Supremacy* Aisha M. Beliso-De Jesús, Jemima Pierre, Junaid Rana, 2025-01-28 An anthology of original essays that examine white supremacy around the globe through the lens of anthropology White supremacy an entrenched global system that emerged alongside European colonialism is based on presumed biological and cultural differences racist practices the hypervaluation of whiteness and the devaluation of nonwhites Anthropology has been shaped by and has helped to shape white supremacy yet the discipline also offers powerful tools for understanding this system at a global scale *The Anthropology of White Supremacy* gathers original essays from a diverse international group of anthropologists to explore how this phenomenon works both within anthropology and in cultural and political structures around the world The book features historical and ethnographic analysis about Brazil Iceland Japan Mexico Nigeria Palestine Senegal South Africa and the United States and addresses the ways white supremacy impacts a broad range of issues including finance advertising and media representations militarism police training migration and development *The Anthropology of White Supremacy* demonstrates not only how anthropology can help us to better comprehend white supremacy but also how the discipline can help us begin to dismantle it The contributors include Omolade Adunbi Samar Al Bulushi Aisha M Beliso De Jesus Michael L Blakey Mitzi Uehara Carter Subhadra Mitra Channa Celina de S Vanessa Diaz Britt Halvorson Faye V Harrison Sarah Ihmoud Anthony R Jerry Darryl Li Kristin Loftsdottir Christopher A Loperena Keisha Khan Y Perry Jemima Pierre Jean Muteba Rahier Laurence Ralph Renya K Ramirez Junaid Rana Joshua Reno Rhea Rahman Jonathan Rosa Shalini Shankar Shannon Speed and Maria Dyveke Styve **Black Feminist Anthropology, 25th Anniversary Edition** Irma McClaurin, 2024-11-15 Black

Feminist Anthropology Theory Politics Praxis and Poetics is a groundbreaking collection that centers the imaginative intellectual perspectives voices and experiences of Black American feminist anthropologists Twenty five years ago as the Foreword states this book dared to put three words together in the title Black Feminist Anthropology that have not always kept company with each other and in the minds of many both in and outside of the academy they should remain separate Standing the test of time it is still a bold reimagining of anthropology and all social sciences as inclusive and decolonized while establishing a new Black feminist anthropology canon that decades later is too often taken for granted as normative Black Feminist Anthropology is filled with a message of theoretical possibilities that anyone who enters its pages will find healing life saving and an affirmation that Black women anthropologists have contributed much to the theory politics praxis and poetics of anthropology gender and women s studies masculinity studies queer studies the social sciences generally and any other discipline that seeks transformation from the inside out It is both an archive and a legacy for the next generation

**The Second Generation of African American Pioneers in Anthropology** Ira E. Harrison, Deborah

Johnson-Simon, Erica Lorraine Williams, 2018-11-15 After the pioneers the second generation of African American anthropologists trained in the late 1950s and 1960s Expected to study their own or similar cultures these scholars often focused on the African diaspora but in some cases they also ranged further afield both geographically and intellectually Yet their work remains largely unknown to colleagues and students This volume collects intellectual biographies of fifteen accomplished African American anthropologists of the era The authors explore the scholars diverse backgrounds and interests and look at their groundbreaking methodologies ethnographies and theories They also place their subjects within their tumultuous times when antiracism and anticolonialism transformed the field and the emergence of ideas around racial vindication brought forth new worldviews Scholars profiled George Clement Bond Johnnetta B Cole James Lowell Gibbs Jr Vera Mae Green John Langston Gwaltney Ira E Harrison Delmos Jones Diane K Lewis Claudia Mitchell Kernan Oliver Osborne Anselme Remy William Alfred Shack Audrey Smedley Niara Sudarkasa and Charles Preston Warren II *Black Feminist Anthropology* Irma McClaurin, 2001 In the discipline s early days anthropologists by definition were assumed to be white and male Women and black scholars were relegated to the field s periphery From this marginal place white feminist anthropologists have successfully carved out an acknowledged intellectual space identified as feminist anthropology Unfortunately the works of black and non western feminist anthropologists are rarely cited and they have yet to be respected as significant shapers of the direction and transformation of feminist anthropology In this volume Irma McClaurin has collected for the first time essays that explore the role and contributions of black feminist anthropologists She has asked her contributors to disclose how their experiences as black women have influenced their anthropological practice in Africa the Caribbean and the United States and how anthropology has influenced their development as black feminists Every chapter is a unique journey that enables the reader to see how scholars are made The writers present material from their own fieldwork

to demonstrate how these experiences were shaped by their identities Finally each essay suggests how the author's field experiences have influenced the theoretical and methodological choices she has made throughout her career Not since Diane Wolf's *Feminist Dilemmas in the Field* or Hortense Powdermaker's *Stranger and Friend* have we had such a breadth of women anthropologists discussing the critical and personal issues that emerge when doing ethnographic research

*Anthropology and the Racial Politics of Culture* Lee D. Baker, 2010-03-03 An account of how anthropology has responded to and helped shape ideas about race and culture in the United States and how its ideas have been appropriated to different ends

Race and Racism Carolyn Fluehr-Lobban, 2018-04-12 *Race and Racism* examines the foundations of race in American society from an anthropological perspective The book offers an accessible overview of a variety of perspectives and theories on the biology of race the social context of race ethnicity and ethnocentrism and more The second edition features significant updates throughout including more discussion of critical race theory new biophysical research on human origins new material on media and racism new global examples and additional material on how racism impacts a variety of ethnic groups

**Racial Situations** John Hartigan Jr., 2020-10-06 *Racial Situations* challenges perspectives on race that rely upon oft repeated claims that race is culturally constructed and hence simply false and distorting John Hartigan asserts instead that we need to explain how race is experienced by people as a daily reality His starting point is the lives of white people in Detroit As a distinct minority whites in this city can rarely assume they are racially unmarked and normative privileges generally associated with whiteness Hartigan conveys their attempts to make sense of how race matters in their lives and in Detroit generally Rather than compiling a generic sampling of white views Hartigan develops an ethnographic account of whites in three distinct neighborhoods an inner city underclass area an adjacent debatably gentrifying community and a working class neighborhood bordering one of the city's wealthy suburbs In tracking how racial tensions develop or become defused in each of these sites Hartigan argues that whites do not articulate their racial identity strictly in relation to a symbolic figure of black Otherness He demonstrates instead that intraracial class distinctions are critical in whites' determinations of when and how race matters In each community the author charts a series of names hillbilly gentrifier and racist which whites use to make distinctions among themselves He shows how these terms function in everyday discourses that reflect the racial consciousness of the communities and establish boundaries of status and privilege among whites in these areas

*The Routledge Handbook to the History and Society of the Americas* Olaf Kaltmeier, Josef Raab, Mike Foley, Alice Nash, Stefan Rinke, Mario Rufer, 2019-04-12 The colonial heritage and its renewed aftermaths expressed in the inter American experiences of slavery indigeneity dependence and freedom movements to mention only a few aspects form a common ground of experience in the Western Hemisphere The flow of peoples goods knowledge and finances have promoted interdependence and integration that cut across borders and link the countries of North and South America together The nature of this

transversally related and multiply interconnected region can only be captured through a transnational multidisciplinary and comprehensive approach The Routledge Handbook to the History and Society of the Americas explores the history and society of the Americas placing particular emphasis on collective and intertwined experiences Forty four chapters cover a range of concepts and dynamics in the Americas from the colonial period until the present century The shared histories and dynamics of Inter American relationships are considered through pre Hispanic empires colonization European hegemony migration multiculturalism and political and economic interdependences Key concepts are selected and explored from different geopolitical disciplinary and epistemological perspectives Highlighting the contested character of key concepts that are usually defined in strict disciplinary terms the Handbook provides the basis for a better and deeper understanding of inter American entanglements This multidisciplinary approach will be of interest to a broad array of academic scholars and students in history sociology political science cultural postcolonial gender literary and globalization studies

Feminist Anthropology Ellen Lewin, 2009-02-09 Feminist Anthropology surveys the history of feminist anthropology and offers students and scholars a fascinating collection of both classic and contemporary articles grouped to highlight key themes from the past and present Offers vibrant examples of feminist ethnographic work rather than synthetic overviews of the field Each section is framed by a theoretical and bibliographic essay Includes a thoughtful introduction to the volume that provides context and discusses the intellectual foremothers of the field including Margaret Mead Ruth Landes Phyllis Kaberry and Zora Neale Hurston

Central Sites, Peripheral Visions Richard Handler, 2006-11-08 The terms center and periphery are particularly relevant to anthropologists since traditionally they look outward from institutional centers universities museums government bureaus to learn about people on the peripheries Yet anthropology itself as compared with economics politics or history occupies a space somewhat on the margins of academe Still anthropologists who control esoteric knowledge about the vast range of human variation often find themselves in a theoretically central position able to critique the universal truths promoted by other disciplines Central Sites Peripheral Visions presents five case studies that explore the dilemmas moral as well as political that emerge out of this unique position From David Koester's analysis of how ethnographic descriptions of Iceland marginalized that country's population to Kath Weston's account of an offshore penal colony where officials mixed prison work with ethnographic pursuits from Brad Evans's reflections on the bohemianism of both the Harlem vogue and American anthropology to Arthur J Ray's study of anthropologists who serve as expert witnesses in legal cases the essays in the eleventh volume of the History of Anthropology Series reflect on anthropology's always problematic status as centrally peripheral or peripherally central Finally George W Stocking Jr in a contribution that is almost a book in its own right traces the professional trajectory of American anthropologist Robert Gelston Armstrong who was unceremoniously expelled from his place of privilege because of his communist sympathies in the 1950s By taking up Armstrong's unfinished business decades later Stocking engages in an extended meditation on the relationship between center and periphery and offers a kind of

posthumous reparation a page in the history of the discipline for a distant colleague who might otherwise have remained in the footnotes      **Encyclopedia of African American History, 1896 to the Present** Paul Finkelman, 2009 Alphabetically arranged entries from A to C that explores significant events major persons organizations and political and social movements in African American history from 1896 to the twenty first century      **An American Obsession** Jennifer Terry, 2010-12-15 Drawing on original research from medical texts psychiatric case histories pioneering statistical surveys first person accounts legal cases sensationalist journalism and legislative debates Jennifer Terry has written a nuanced and textured history of how the century old obsession with homosexuality is deeply tied to changing American anxieties about social and sexual order in the modern age Terry s overarching argument is compelling that homosexuality served as a marker of the abnormal against which malleable tenuous and often contradictory concepts of the normal were defined One of the few histories to take into consideration homosexuality in both women and men Terry s work also stands out in its refusal to erase the agency of people classified as abnormal She documents the myriad ways that gays lesbians and other sexual minorities have coauthored resisted and transformed the most powerful and authoritative modern truths about sex Proposing this history as a useable past *An American Obsession* is an indispensable contribution to the study of American cultural history

Encyclopedia of Anthropology H. James Birx, 2006 Focuses on physical social and applied anthropology archaeology linguistics and symbolic communication Topics include hominid evolution primate behaviour genetics ancient civilizations cross cultural studies and social theories      **The Routledge Companion to Contemporary Anthropology** Simon Coleman, Susan B. Hyatt, Ann Kingsolver, 2016-11-25 The Routledge Companion to Contemporary Anthropology is an invaluable guide and major reference source for students and scholars alike introducing its readers to key contemporary perspectives and approaches within the field Written by an experienced international team of contributors with an interdisciplinary range of essays this collection provides a powerful overview of the transformations currently affecting anthropology The volume both addresses the concerns of the discipline and comments on its construction through texts classroom interactions engagements with various publics and changing relations with other academic subjects Persuasively demonstrating that a number of key contemporary issues can be usefully analyzed through an anthropological lens the contributors cover important topics such as globalization law and politics collaborative archaeology economics religion citizenship and community health and the environment The Routledge Companion to Contemporary Anthropology is a fascinating examination of this lively and constantly evolving discipline      *Anthropology Beyond Culture* Richard G. Fox, Barbara J. King, 2020-05-18 Culture is a vexed concept within anthropology From their earliest studies anthropologists have often noted the emotional attachment of people to their customs even in cases where this loyalty can make for problems Do anthropologists now suffer the same kind of disability with respect to their continuing emotional attachment to the concept of culture This book considers the state of the culture concept in anthropology and finds fault with a love it or leave

it attitude Rather than pledging undying allegiance or summarily dismissing it the volume argues that anthropology can continue with or without a concept of culture depending on the research questions being asked and furthermore that when culture is retained no single definition of it is practical or necessary Offering sensible solutions to a topic of hot debate this book will be essential reading for anyone seeking to learn what a concept of culture can offer anthropology and what anthropology can offer the concept of culture      **The British National Bibliography** Arthur James Wells,2009

**Feminist Theory and the Body** Janet Price,Margrit Shildrick,2017-09-25 This Reader provides students with a comprehensive overview of differing feminist approaches to the body Its wide range of contributions locate the important historical developments interdisciplinary perspectives and key discourses that have shaped this dynamic area of feminist theory
