## **Power Without Force The Political Capacity Of Nation States:**

**Power without Force** Robert W. Jackman, 1993-09-15 Explores the ways states build political capacity discusses how states learn to resolve conflict politically rather than violently

**Power Without Force** Robert W. Jackman, 1993

**State Building in Putin's Russia** Brian D. Taylor, 2011-02-21 This book argues that Putin's strategy for rebuilding the state was fundamentally flawed Taylor demonstrates that a disregard for the way state officials behave toward citizens state quality had a negative impact on what the state could do state capacity Focusing on those organizations that control state coercion what Russians call the power ministries Taylor shows that many of the weaknesses of the Russian state that existed under Boris Yeltsin persisted under Putin Drawing on extensive field research and interviews as well as a wide range of comparative data the book reveals the practices and norms that guide the behavior of Russian power ministry officials the so called siloviki especially law enforcement personnel By examining siloviki behavior from the Kremlin down to the street level

**State Building in Putin's Russia** uncovers the who where and how of Russian state building after communism

Positive Changes in Political Science John H. Aldrich, James E. Alt, 2007 Richard McKelvey's classic papers accompanied by original essays by leading names in the field

**United We Stand?** Aaron Belkin, 2012-02-01 It has long been assumed that leaders engage in international conflict to unify their followers what is often called the rally round the flag hypothesis Despite its intuitive appeal however this hypothesis does not always provide a compelling explanation of the relationship between domestic politics and international conflict In **United We Stand** Aaron Belkin shows that in one important realm civil military relations leaders often prefer divisiveness over cohesion When they feel domestically vulnerable leaders use international conflict in order to create and exacerbate rivalries among their own military forces to lower the risk of a coup and to contribute to the consolidation and stability of the political order Case studies include post Soviet Georgia and Syria

**Central Control and Local Discretion in China** Chae-ho Chŏng, 2000 This book analyses the decollectivization reform in China during the early 1980s in order to gauge the impact of post Mao decentralization on central control and provincial discretion The volume challenges the notion that the decision to decentralize administrative authority ipso facto produces local discretion properly keyed to local conditions In fact outcomes often differ from the intended goals While generally local interests and central local clientilistic networks determine the policy responses of the provinces bureaucratic careerism also plays a crucial role In the case of post Mao decollectivization national level analyses suggest that a majority of provinces adopted household farming neither too quickly nor too slowly since both pioneering and resisting entailed potentially enormous political risks Once Beijing's preference appeared firmly fixed however they all quickly bandwagoned by popularizing the policy as swiftly as possible Three detailed case studies of Anhui as a pioneer Shandong as a bandwagoner and Heilongjiang as a resister further highlight the evolutionary process in which provincial variations came to be replaced by uniform compliance imposed by Beijing Theoretically this study contends that the overall scope of local discretion is

circumscribed by the dominant norms and incentive relations embedded in the implementation dynamics Methodologically the book employs a combination of aggregate analyses and comparative case studies Empirically on the basis of newly available materials including classified documents and interviews it challenges the peasant power school which has somehow allowed local governments to evaporate in its descriptions of post Mao decollectivization **Tax Evasion, Trust and State**

**Capacities** Simon Hug, 2007 Many recently democratized countries in Central and Eastern Europe having escaped from communist rule and planned economies face pressing problems related to the notions of tax evasion trust and state capacities Tax morale in changing political and economic contexts is of crucial importance This raises a series of questions What are the conditions under which people agree to pay taxes Why do people avoid taxes To what extent do the reasons for tax evasion vary from one region to another The authors of this volume address these questions and try to assess the progress which has been made in Central and Eastern Europe with regard to improving tax morale through tax reforms and strengthening of extractive state capacities A main insight is the complex causal relationship between the quality of fiscal institutions and tax morale In addition huge differences between countries of the former Soviet Union and central European countries which are now members of the EU can be observed not only at the level of democratic governance of state capacities and the structures of trust but also with regard to tax morale **The Evolution of the Asian Developmental State** J. J. Woo, 2018-09-03

Many East Asian states have undergone profound economic transformations over the last two decades Singapore and Hong Kong especially have adapted to shifting economic and technological conditions by transforming themselves into smart developmental states In these cities the proliferation of digital technologies has given rise to new growth sectors and opened up new areas of political contestation within these early proponents of the developmental state model Providing a theoretical and empirical discussion of the Asian developmental state model the book assesses the evolution of the developmental state model considers recent developments in the field and evaluates the development state s continued relevance as a conceptual framework for understanding the politics of economic development Focusing on digital and technology enabled economic activities in Hong Kong and Singapore the author explores the various policies that allow developmental states to stimulate economic growth ensure organizational coherence and engage businesses and other stakeholders This book will be of interest to scholars and researchers of political economy and economic development in Asia as well as business professionals and other practitioners The Democracy Disadvantage Brian K. Grodsky, 2024-02-02

Populists are conventionally maligned as impediments to effective policymaking They tend to undermine state institutions exercise personalistic rule and offer simplistic solutions to complex societal problems But is populism always a hindrance to good governance In this book Brian Grodsky argues that the interplay between populism and regime type can upend expected levels of political responsiveness based on regime considerations alone The result can be a reversal of the so called democratic advantage according to which public accountability in democratic regimes drives action beyond what is typically expected under authoritarianism Grodsky

explores the government policy response to the COVID 19 pandemic in three populist states the United States a democracy China a non democracy and Russia a hybrid regime This insightful exploratory analysis is essential reading for students and scholars of comparative politics populism and disaster management

**Democracy and Economic Openness in an Interconnected System** Quan Li,Rafael Reuveny,2009-07-31 In this book Quan Li and Rafael Reuveny combine the social scientific approach with a broad interdisciplinary scope to address some of the most intriguing and important political economic and environmental issues of our times Their book employs formal and statistical methods to study the interactions of economic globalization democratic governance income inequality economic development military violence and environmental degradation In doing so Li and Reuveny cross multiple disciplinary boundaries engage various academic debates bring the insights from compartmentalized bodies of literature into direct dialogue and uncover policy tradeoffs in a growingly interconnected political economic environmental system They show that growing interconnectedness in the global system increases the demands on national leaders and their advisors academicians and policy makers will need to cross disciplinary boundaries if they seek to better understand and address the policy tradeoffs of even more complex processes than the ones investigated here

The Transformation of Central Asia Pauline Jones Luong,2004 With the fall of the Soviet Union in 1991 former Communist Party leaders in Central Asia were faced with the daunting task of building states where they previously had not existed Experts on Central Asia here examine the emerging relationship between state actors and social forces in the region

Economic Development, Inequality and War E. Nafziger,J. Auvinen,2003-09-15 Economic Development Inequality and War shows how economic decline income inequality pervasive rent seeking by ruling elites political authoritarianism military centrality and competition for mineral exports contribute to war and humanitarian emergencies Economic regress and political decay bring about relative deprivation perception by social groups of injustice arising from a growing discrepancy between what they expect and get Nafziger and Auvinen indicate that both economic greed and social grievances drive contemporary civil wars Finally the authors also identify policies for preventing humanitarian emergencies

**Democracies at War** Dan Reiter,Allan C. Stam,2010-07-01 Why do democracies win wars This is a critical question in the study of international relations as a traditional view expressed most famously by Alexis de Tocqueville has been that democracies are inferior in crafting foreign policy and fighting wars In Democracies at War the first major study of its kind Dan Reiter and Allan Stam come to a very different conclusion Democracies tend to win the wars they fight specifically about eighty percent of the time Complementing their wide ranging case study analysis the authors apply innovative statistical tests and new hypotheses In unusually clear prose they pinpoint two reasons for democracies success at war First as elected leaders understand that losing a war can spell domestic political backlash democracies start only those wars they are likely to win Secondly the emphasis on individuality within democratic societies means that their soldiers fight with greater initiative and superior leadership Surprisingly Reiter and Stam find that it is neither economic

muscle nor bandwagoning between democratic powers that enables democracies to win wars They also show that given societal consent democracies are willing to initiate wars of empire or genocide On the whole they find democracies dependence on public consent makes for more rather than less effective foreign policy Taking a fresh approach to a question that has long merited such a study this book yields crucial insights on security policy the causes of war and the interplay between domestic politics and international relations Public Administration, Sixth Edition, A Comparative Perspective. Ferrel Heady, 2001-02-13 Continuing in the standard of excellence set by previous editions this sixth edition assesses the bureaucracies and development of governments around the world providing helpful and revealing analyses of the relationships between bureaucracies and political regimes With over 1000 literature references tables and drawings the book has been updated to reflect changes in the political systems of the former Soviet Union Eastern Europe and the developing world The editor clearly articulates recent developments in the shifting global political landscape and discusses how conditions in development administration and comparative public policy affect nation states **Rebellion and Reform in Indonesia** Michelle Ann Miller, 2008-10-22 This book examines the policies of successive governments in Jakarta to contain regional separatist forces focusing in particular on the response towards the armed separatist movement in Aceh **Ivory Towers and Nationalist Minds** Mark R. Nemec, 2006 The impact of American universities on the establishment of the American state **The Politics of Everyday Crime in Africa** Danielle C. Kushner, 2018-12-12 This book offers distinct insights into the sources of state legitimacy in Africa by incorporating an analysis of non state actors role in service delivery The author examines how citizens reliance on non governmental security actors such as street committees neighborhood watches and community police forums shape their attitudes toward the state and their political participation Broadly this project contributes to our understanding of citizens everyday experiences of crime and violence at the local level and why they matter politically **Democracy in Turkey** Ali Resul Usul, 2010-09-13 This book examines the impact of European political conditionality on the process of democratization in Turkey over a twenty year period Employing theoretical and conceptual approaches to the issue of EU conditionality the author compares the case of Turkey to that of other European nations Arguing that Turkey became vulnerable to the European conditionality when it applied for membership in 1987 he shows how the political reforms demanded of Turkey were not fully carried out as the EU had not in essence accepted Turkey as an official candidate during this period The EU has started to exert real active leverage since Turkey was declared an official candidate in 1999 and the author explores how these conditions have exerted a positive influence on democratic consolidation in Turkey However its effectiveness in this regard has diminished to a significant extent due to a number of problems that have continued to remain central in EU Turkey relations This comprehensive analysis of Turkey EU political relations and democratization places the case of Turkey within an international context As such it will be of interest not only to those studying Turkish politics government and democracy but anyone working in the area of international relations and

the EU      **Globalization, Security, and the Nation State** Ersel Aydinli, James N. Rosenau, 2012-02-01 This volume studies the links among the concepts of globalization security and the authority of the nation state drawing attention to why and how these three concepts are interrelated and why they should be studied together Contributors explore the connections between security and global transformations and the corresponding or resulting changes in state structures that emerge Probing and extending existing paradigms the book offers three regional cases studies the periphery states of the Middle East and North Africa the second world states of the Russian Federation and the core states of the European Union It concludes with three chapters that synthesize the above themes to identify corresponding changes in the patterns of international politics

**International Law and International Politics** Alexander Orakhelashvili, 2020-12-25 This illuminating book explores a multitude of areas in which law and politics intersect on the international plane providing a comprehensive analysis of the foundations on which both international law and politics rest The book examines both disciplines mutual interaction in more specific areas such as public authority global space and peace
