Powerdown Options And Actions For A Post Carbon World:

Powerdown Richard Heinberg, 2004-09-01 This stark look at prospects for a truly sustainable culture speaks frankly about how it is time to Powerdown or to reduce per capita resource usage in wealthy countries develop alternative energy sources and much more

Powerdown Richard Heinberg, 2004 Resource depletion and population pressures are about to catch up with us and no one is prepared Oil is running out and if the Western world continues with its current policies the next decade will likely be marked by war economic collapse and environmental catastrophe Powerdown speaks frankly to all these dilemmas and is a clarion call to urgent action

Finding Community Diana Leafe Christian, 2007-05-01 Finding community is as critical as obtaining food and shelter since the need to belong is what makes us human The isolation and loneliness of modern life have led many people to search for deeper connection which has resulted in a renewed interest in intentional communities These intentional communities or ecovillages are an appealing choice for like minded people who seek to create a family oriented and ecologically sustainable lifestyle a lifestyle they are unlikely to find anywhere else However the notion of an intentional community can still be a tremendous leap for some deterred perhaps by a misguided vision of eking out a hardscrabble existence with little reward In fact successful ecovillages thrive because of the combined skills and resources of their members Finding Community presents a thorough overview of ecovillages and intentional communities and offers solid advice on how to research thoroughly visit thoughtfully evaluate intelligently and join gracefully Useful considerations include Important questions to ask of members and of yourself Signs of a healthy and not so healthy community Cost of joining and staying Common blunders to avoid Finding Community provides intriguing possibilities to readers who are seeking a more cooperative sustainable and meaningful life Diana Leafe Christian is the author of *Creating a Life Together* and editor of *Communities* magazine She lives at Earthhaven Ecovillage in North Carolina

New Suburbanism: Sustainable Tall Building Development Kheir Al-Kodmany, 2016-04-14 Much of the anticipated future growth in the United States will take place in suburbia The critical challenge is how to accommodate this growth in a sustainable and resilient manner This book explores the role of suburban tall as a viable sustainable alternative to continued suburban sprawl It identifies 10 spatial patterns in which tall buildings have been integrated into the American suburbs The study concludes that the Tall Building and Transit Oriented Development TB TOD model is the most appropriate to promote sustainable suburbanism The findings are based on analyzing over 300 projects in 24 suburban communities within three major metropolitan areas including Washington DC Miami Florida and Chicago Illinois The book furnishes planning strategies that address the social economic and environmental aspects of sustainable tall building development It also discusses sustainable architectural design and site planning strategies and provides case studies of sustainable tall buildings that were successfully integrated into suburban settings

Local Citizenship in the Global Arena Sally Findlow, 2016-11-03 *Local Citizenship in the Global Arena* proposes a reconsideration of both citizenship and citizenship education moving away

equally from prevailing global citizenship and fundamental British values approaches towards a curriculum for education that is essentially about creating cosmopolitan included and inclusive politically engaged citizens of communities local national and global Viewing education as both problem and solution Findlow argues that today's climate of rapid and unpredictable geopolitical and cultural re-scoping requires an approach to citizenship education that both reflects and shapes society paying attention to relationships between the local and global aspects of political voice equality and community Drawing on a range of international examples she explores the importance and possibilities of a form of education that instead of promoting divisive competition educates about citizenship in its various forms and encourages the sorts of open and radical thinking that can help young people cross ideological and physical borders and use their voice in line with their own and others real long term interests Successive chapters develop this argument by critically examining the key elements of citizenship discourses through the interrelated lenses of geopolitical change nationalism the competition fetish critical pedagogy multiculturalism protest politics feminism and ecology and highlighting ways in which the situationally diverse lived realities of citizenship have been mediated by different forms of education The book draws attention to how we think of education's place in a world of combined globalisation localism anti state revolt and xenophobia It will be of key interest to academics researchers and postgraduate students in the fields of education political science philosophy sociology social policy cultural studies and anthropology

Nuclear Roulette Gar Smith, 2012-10-25 Nuclear power is not clean cheap or safe With Three Mile Island Chernobyl and Fukushima the nuclear industry's record of catastrophic failures now averages one major disaster every decade After three US designed plants exploded in Japan many countries moved to abandon reactors for renewables In the United States however powerful corporations and a compliant government still defend nuclear power while promising billion dollar bailouts to operators Each new disaster demonstrates that the nuclear industry and governments lie to avoid panic to preserve the myth of safe clean nuclear power and to sustain government subsidies Tokyo and Washington both covered up Fukushima's radiation risks and when confronted with damning evidence simply raised the levels of acceptable risk to match the greater levels of exposure Nuclear Roulette dismantles the core arguments behind the nuclear industrial complex's Nuclear Renaissance While some critiques are familiar nuclear power is too costly too dangerous and too unstable others are surprising Nuclear Roulette exposes historic links to nuclear weapons impacts on Indigenous lands and lives and the ways in which the Nuclear Regulatory Commission too often takes its lead from industry rewriting rules to keep failing plants in compliance Nuclear Roulette cites NRC records showing how corporations routinely defer maintenance and lists resulting near misses in the US which average more than one per month Nuclear Roulette chronicles the problems of aging reactors uncovers the costly challenge of decommissioning explores the industry's greatest seismic risks not on California's quake prone coast but in the Midwest and Southeast and explains how solar flares could black out power grids causing the world's 400 plus reactors to self destruct This powerful expos concludes with a roundup of

proven and potential energy solutions that can replace nuclear technology with a Renewable Renaissance combined with conservation programs that can cleanse the air and cool the planet

Metropolitan Ruralities Terry Marsden, Kjell Andersson, Stefan Sjöblom, Leo Granberg, Peter Ehrström, 2016-07-29 During modernity metropolitan ruralities have been regarded as land reserves for urban expansion However there is a growing insight that there are limits to the urban expansion into rural areas This volume discusses potential developments in urban and rural policy and planning which need to be considered

Sustainability Planning and Collaboration in Rural Canada Lars K. Hallström, Glen T. Hvenegaard, Karsten Mündel, Mary A. Beckie, 2016-03-10 In step with rural development initiatives across Canada today these fourteen case studies examine the shift toward sustainability based planning as a key element of community development Further they explore the growth of partnerships between communities and post secondary institutions which extend beyond research and education into community development practices capacity building and participatory action research Rural development researchers decision makers and elected officials at all levels of government political scientists and policy analysts and community engagement practitioners will benefit from Sustainability Planning and Collaboration in Rural Canada s ideal rational progression which mirrors the policy process itself from problem identification to engagement solutions and evaluation Contributors Donald Alexander Kirstine N Baccar Michael T Barr Mary A Beckie Moira Jean Calder Meredith Carter Yolande E Chan Sean Connelly Jon M Corbett Anthony Davis Jeff A Dixon David J A Douglas Roger Epp Kelly Green Lars K Hallström Greg Halseth Casey Hamilton Karen L F Houle Glen T Hvenegaard Melaine L Irvine Bernie Jones Robert Keenan Rhonda L P Koster Ryan Lane Sean Markey Shelly McMann L Jane McMillan Morgan E Moffitt Karen E Morrison Karsten Mündel Craig Pollett Kerry Prosper Mark Roseland Laura Ryser Claire E Sanders Jennifer Sumner Kelly Vodden Marc von der Gonna Shayne Wright

Peak Oil Matthew Schneider-Mayerson, 2015-10-14 In recent years the concept of peak oil the moment when global oil production peaks and a train of economic social and political catastrophes accompany its subsequent decline has captured the imagination of a surprisingly large number of Americans ordinary citizens as well as scholars and created a quiet yet intense underground movement In Peak Oil Matthew Schneider Mayerson takes readers deep inside the world of peakists showing how their hopes and fears about the postcarbon future led them to prepare for the social breakdown they foresee all of which are fervently discussed and debated via websites online forums videos and novels By exploring the worldview of peakists and the unexpected way that the fear of peak oil and climate change transformed many members of this left leaning group into survivalists Schneider Mayerson builds a larger analysis of the rise of libertarianism the role of oil in modern life the political impact of digital technologies the racial and gender dynamics of post apocalyptic fantasies and the social organization of environmental denial

The Transition Handbook Rob Hopkins, 2008-02-25 Move from feeling anxious about the oil crisis to developing a positive vision and taking traction action to create a more self reliant existence with this ground breaking book We live in an oil dependent world and have

become reliant in a very short space of time using vast reserves of oil in the process and without planning for when the supply is not so plentiful Most of us avoid thinking about what happens when the oil runs out or becomes prohibitively expensive but the reality may not be as bad as we think The Transition Handbook shows how the inevitable and profound changes ahead could have a positive effect Written by permaculture expert Rob Hopkins he discusses the possibility of a rebirth of local communities which will generate their own fuel food and housing These will encourage the development of local currencies to keep money in the local area and unleash a local skilling up so that people have more control over their lives The growth in interest in the Transition model continues to be exponential There are now more than 35 formal Transition Initiatives in the UK including towns cities islands villages and peninsulas with more joining as the idea takes off With little proactivity at government level communities are taking matters into their own hands and acting locally If your community has not yet become a Transition Initiative this upbeat guide filled with beautiful black and white photographs offers you the tools to get started The Transition Handbook is the perfect manual to guide communities as they begin this energy descent journey

Impeach the President Dennis Loo, Peter Phillips, 2011-01-04 This brilliantly argued and wonderfully written collection by twenty two of the best political analysts in the US analyzes the extraordinary and unprecedented threat the White House and its allies present to civil liberties civil rights the Constitution international law and the future of the planet Impeach the President unearths the stories behind election fraud in 2000 and 2004 the overt lies used to justify pre emptive war on Iraq the extensive ongoing commission of war crimes and torture the tragic failures in the lead up to and aftermath of Hurricane Katrina and lesser known but equally alarming offences of propaganda and disinformation illegal spying environmental destruction and the violation of the separation of church and state Loo and Phillips chillingly reveal the full threat behind the radical right wing force that has taken over the world s most powerful office

Factor Five Ernst Ulrich von Weizsacker, Charlie Hargroves, Michael H. Smith, Cheryl Desha, Peter Stasinopoulos, 2009-12-01 When first published in 1997 Factor Four Doubling Wealth Halving Resource Use by renowned economic and engineering experts Ernst von Weizs acker Amory Lovins and L Hunter Lovins transformed how economists policy makers engineers entrepreneurs and business leaders thought about innovation and wealth creation Through examples from a wide range of industrial sectors the authors demonstrated how technical innovation could cut resource use in half while doubling wealth Now twelve years on with climate change at the top of the world agenda and the new economic giants of China and India needing ever more resources there is a unique historic opportunity to scale up resources productivity and radically transform the global economy And Factor Five is the book set to change all of this Picking up where Factor Four left off this new book examines the past 15 years of innovation in industry technical innovation and policy It shows how and where factor four gains have been made and how we can achieve greater factor five or 80% improvements in resource and energy productivity and how to roll them out on a global scale to retool our economic system massively boost

wealth for billions of people around the world and help solve the climate change crises Spanning dozens of countries including China and India and examining innumerable cases of innovation in design technology and policy the authors leave no engineering and economic stone unturned in their quest for excellence The book tackles sustainable development and climate change by providing in depth Factor 5 resource productivity studies of the following sectors Buildings Industry Agriculture Food and Hospitality and Transportation In its systematic approach to demonstrating how Factor 5 can be achieved the book also provides an overview of energy water nexus and energy materials nexus efficiency opportunities across these sectors Given that these sectors are responsible for virtually all energy usage and greenhouse gas emissions globally this book is designed to guide everyone from individual households businesses industry sector groups to national governments in their efforts to achieve the IPCC recommended target of 80 per cent reductions to greenhouse gas emissions It also looks at innovation in regulation to increase resource productivity pricing carbon trading eco taxation and permits and the role of international institutions and trade The authors also explain exciting new concepts such as bio mimicry and whole system design as hallmarks for a new generation of technologies The last part of the book explores transformative ideas such as a long term trajectory of gently rising energy and resource prices and new concepts of well being in a more equitable world Like its predecessor this book is simply the most important work on the future of innovation business economics and policy and is top drawer reading for leaders across all sectors including business and industry government engineering and design and teaching This book is full colour throughout Published with The Natural Edge Project *Praying and Campaigning with Environmental Christians* Maria Nita, 2016-07-30 This book presents an ethnographic study of environmental Christian networks involved in the climate and transition towns movements Maria Nita examines the ways in which green Christians engage with their communities and networks as well as other activist networks in the broader green movement The book interrogates key categories in the field of religious studies which intersect activist concerns including spirituality community and ritual In this sociological exploration the author uses existing research tools such as discourse analysis and proposes new theoretical models for the investigation of network expansion religious identity and relationality through ritual Nita examines the mechanisms underlying the greening of religion and thus offers an in depth analysis of prayers rituals and religious practices such as praying through painting fasting for the planet and sharing the green Eucharist in or with nature *Transitions* Peter W Newton, 2008-06-27 Formidable challenges confront Australia and its human settlements the mega metro regions major and provincial cities coastal rural and remote towns The key drivers of change and major urban vulnerabilities have been identified and principal among them are resource constraints such as oil water food skilled labour and materials and carbon constraints linked to climate change and a need to transition to renewable energy both of which will strongly shape urban development this century Transitions identifies 21st century challenges to the resilience of Australia s cities and regions that flow from a range of global and local influences and offers a

portfolio of solutions to these critical problems and vulnerabilities The solutions will require fundamental transitions in many instances to our urban infrastructures to our institutions and how they plan for the future and perhaps most of all to ourselves in terms of our lifestyles and consumption patterns With contributions from 92 researchers all leaders in their respective fields this book offers the expertise to chart pathways for a sustainability transition **After the Sands** Gordon Laxer,2015-10-03 After the Sands outlines a vision and a road map to transitioning Canada to a low carbon society Despite its oil abundance with no strategic reserves Canada is woefully unprepared for the next global oil supply crisis There s no good reason for Canadians to use much more oil per capita than people in other sparsely populated northern countries like Norway Finland and Sweden nations that use 27 to 39 percent less oil per person In After the Sands Alberta based political economist Gordon Laxer proposes a bold strategy of deep conservation and a Canada first perspective to ensure that all Canadians have sufficient energy at affordable prices The most achievable way to gain energy security is to supply Canadians with their own oil natural gas and renewable energy And the best way to cut carbon emissions is by phasing out Canada s role as a carbon fuel exporter Canada has all the oil gas and coal needed to transition to a low carbon future Remarkable hydro power resources give Canadians a large base of renewable energy which can be expanded with wind solar geothermal and biomass Few countries have these options in adequate quantities But as Laxer argues Canada will not get there until we overcome the power of vested interests and untangle the trade agreements that block Canadians from secure and fair access to the nation s own energy resources Impeccably researched After the Sands is critical reading for anyone concerned with climate change and the future of Canada **EcoCities** Richard Register,2006-04-01 Most of the world s population now lives in cities So if we are to address the problems of environmental deterioration and peak oil adequately the city has to be a major focus of attention EcoCities is about re building cities and towns based on ecological principles for the long term sustainability cultural vitality and health of the Earth s biosphere Unique in the literature is the book s insight that the form of the city really matters and that it is within our ability to change it and crucial that we do Further that the ecocity within its bioregion is comprehensible and do able and can produce a healthy and potentially happy future EcoCities describes the place of the city in evolution nature and history It pays special attention to the key question of accessibility and transportation and outlines design principles for the ecocity The reader is encouraged to plunge in to its economics and politics the kinds of businesses planning and leadership required The book then outlines the tools by which a gradual transition to the ecocity could be accomplished Throughout this new edition is generously illustrated with the author s own inspired visions of what such rebuilt cities might actually look like **Discourses of Global Climate Change** Jonas Anshelm,Martin Hultman,2014-11-13 This book examines the arguments made by political actors in the creation of antagonistic discourses on climate change Using in depth empirical research from Sweden a country considered by the international political community to be a frontrunner in tackling climate change it draws out lessons that contribute to the worldwide

environmental debate The book identifies and analyses four globally circulated discourses that call for very different action to be taken to achieve sustainability Industrial fatalism Green Keynesianism Eco socialism and Climate scepticism Drawing on risk society and post political theory it elaborates concepts such as industrial modern masculinity and ecomodern utopia exploring how it is possible to reconcile apocalyptic framing to the dominant discourse of political conservatism This highly original and detailed study focuses on opinion leaders and the way discourses are framed in the climate change debate making it valuable reading for students and scholars of environmental communication and media global environmental policy energy research and sustainability

Depletion and Abundance Sharon Astyk, 2008-09-01 Climate change peak oil and economic instability aren't just future social problems they jeopardize our homes and families right now Our once abundant food supply is being threatened by toxic chemical agriculture rising food prices and crop shortages brought on by climate change Funding for education and health care is strained to the limit and safe and affordable housing is disappearing Depletion and Abundance explains how we are living beyond our means with or without a peak oil climate change crisis and that either way we must learn to place our families and local communities at the center of our thinking once again The author presents strategies to create stronger homes better health and a richer family life and to live comfortably with an uncertain energy supply prepare children for a hotter lower energy less secure world survive and thrive in an economy in crisis and maintain a kitchen garden to supply basic food needs Most importantly readers will discover that depletion can lead to abundance and the anxiety of these uncertain times can be turned into a gift of hope and action An unusual family perspective on the topic this book will appeal to all those interested in securing a future for their children and grandchildren

Sustainable Lifestyles and the Quest for Plenitude Juliet B. Schor, Craig J. Thompson, 2014-07-01 Many of today's most troubling environmental and economic issues have come to seem insoluble carbon emissions overshoot inequality joblessness and a dysfunctional food system Can we change direction move away from business as usual and achieve a more sustainable empowering and humane economy Through a fascinating array of illuminating case studies this hope filled book affirms that we can In locations across the United States and around the globe local participants are forging their own versions of small scale low footprint high satisfaction lifestyles and communities From raw milk consumers and members of alternative agricultural initiatives to time bankers artisan producers in the Aude region of France and bicycle mechanics on the South Side of Chicago individuals and small groups are exploring the practice of plenitude Their efforts demonstrate how social and economic transformation happens and suggest new paths toward larger scale change and a richer quality of life for all

The Vertical City K. Al-Kodmany, 2018-06-25 Each century has its own unique approach toward addressing the problem of high density and the 21st century is no exception As cities try to cope with rapid population growth adding 2.5 billion dwellers by 2050 and grapple with destructive sprawl politicians planners and architects have become increasingly interested in the vertical city paradigm Unfortunately cities all over the world are grossly unprepared for integrating tall

buildings as these buildings may aggravate multidimensional sustainability challenges resulting in a vertical sprawl that could have worse consequences than horizontal sprawl. By using extensive data and numerous illustrations, this book provides a comprehensive guide to the successful and sustainable integration of tall buildings into cities. A new crop of skyscrapers that employ passive design strategies, green technologies, energy saving systems, and innovative renewable energy offers significant architectural improvements. At the urban scale, the book argues that planners must integrate tall buildings with efficient mass transit, walkable neighbourhoods, cycling networks, vibrant mixed use activities, iconic transit stations, attractive plazas, well landscaped streets, spacious parks, and engaging public art. Particularly, it proposes the Tall Building and Transit Oriented Development (TB TOD) model as one of the sustainable options for large cities going forward. Building on the work of leaders in the fields of ecological and sustainable design, this book will open readers' eyes to a wider range of possibilities for utilizing green, resilient, smart, and sustainable features in architecture and urban planning projects. The 20 chapters offer comprehensive reading for all those interested in the planning, design, and construction of sustainable cities.
