Powershift Knowledge Wealth And Violence At The Edge Of The 21st Century:

Powershift Alvin Toffler, 2022-01-04 Alvin Toffler's *Future Shock* and *The Third Wave* are among the most influential books of our time. Now in *Powershift* he brings to a climax the ideas set forth in his previous works to offer a stunning vision of the future that will change your life. In *Powershift* Toffler argues that while headlines focus on shifts of power at the global level, equally significant shifts are taking place in the everyday world we all inhabit: the world of supermarkets and hospitals, banks and business offices, television and telephones, politics and personal life. The very nature of power is changing under our eyes. *Powershift* maps the info wars of tomorrow and outlines a new system of wealth creation based on individualism, innovation, and information. As old political antagonisms fade, Toffler identifies where the next far more important world division will arise: not between East and West or North and South, but between the fast and the slow. In *Powershift*, Alvin Toffler has formulated the deepest, most comprehensive synthesis yet written about the civilization of the twenty-first century. It is one of the most important books you will ever read. Praise for *Powershift*: A sweeping synthesis by placing the accelerated changes of our current information age in the larger perspective of history. Mr. Toffler helps us to face the future with less wariness and more understanding. *The New York Times Book Review*. An insightful guide to a bewildering present and a frightening future, thought provoking on every page. *Newsday*. *Powershift* Alvin Toffler, 1990-01-01 Describes how a new system of wealth creation is transforming power at every level of society. *Powershift* Alvin Toffler, 1991 **Military Intelligence Professional Bulletin**, 2005 Tax Avoidance, Accounting and Financial Reporting. The Knowledge-Creating Company Ikujiro Nonaka, Hirotaka Takeuchi, 1995-05-18 How have Japanese companies become world leaders in the automotive and electronics industries among others What is the secret of their success Two leading Japanese business experts Ikujiro Nonaka and Hirotaka Takeuchi are the first to tie the success of Japanese companies to their ability to create new knowledge and use it to produce successful products and technologies In *The Knowledge Creating Company* Nonaka and Takeuchi provide an inside look at how Japanese companies go about creating this new knowledge organizationally The authors point out that there are two types of knowledge explicit knowledge contained in manuals and procedures and tacit knowledge learned only by experience and communicated only indirectly through metaphor and analogy U S managers focus on explicit knowledge The Japanese on the other hand focus on tacit knowledge And this the authors argue is the key to their success the Japanese have learned how to transform tacit into explicit knowledge To explain how this is done and illuminate Japanese business practices as they do so the authors range from Greek philosophy to Zen Buddhism from classical economists to modern management gurus illustrating the theory of organizational knowledge creation with case studies drawn from such firms as Honda Canon Matsushita NEC Nissan 3M GE and even the U S Marines For instance using Matsushita's development of the Home Bakery the world's first fully automated bread baking machine for home use they show how tacit knowledge can be converted to explicit knowledge when the designers couldn't perfect the dough kneading mechanism a software programmer apprenticed herself with the master baker at Osaka International Hotel gained a tacit understanding of kneading and then conveyed this information to the engineers In addition the authors show that to create knowledge the best management style is neither top down nor bottom up but rather what they call middle up down in which the middle managers form a bridge between the ideals of top management and the chaotic realities of the frontline As we make the turn into the 21st century a new society is emerging Peter Drucker calls it the knowledge society one that is drastically different from the industrial society and one in which acquiring and applying knowledge will become key competitive factors Nonaka and Takeuchi go a step further arguing that creating knowledge will become the key to sustaining a competitive advantage in the future Because the competitive environment and customer preferences changes constantly knowledge perishes quickly With *The Knowledge Creating Company* managers have at their

fingertips years of insight from Japanese firms that reveal how to create knowledge continuously and how to exploit it to make successful new products services and systems

change their confluence was the deciding inspiration for a different epistemology one that has altered the generally accepted meaning and valuation of knowledge
