Power Transition in Asia David Walton, Emilian Kavalski, 2016-08-12 Current preoccupations with the rise of Asia attest to the nascent contestation of the very idea of what the pattern of international politics should look like and how it should be practiced In this respect the growing reference to a shift to the East in global politics has become a popular shorthand for the nascent power transition in world affairs This volume offers a detailed conceptual and empirical investigation of the dynamics of power transition in Asia and details the accommodation strategies and coping mechanisms of different small and middle powers in Asia and importantly China's responses to these approaches

Regions of War and Peace Douglas Lemke, 2002-01-21 In this contribution to the literature on the causes of war Douglas Lemke asks whether the same factors affect minor powers as affect major ones He investigates whether power parity and dissatisfaction with the status quo have an impact within Africa the Far East the Middle East and South America

Lemke argues that there are similarities across these regions and levels of power and that parity and dissatisfaction are correlates of war around the world. The extent to which they increase the risk of war varies across regions however and the book looks at the possible sources of this cross regional variation concluding that differential progress toward development is the likely cause. This book will interest students and scholars of international relations and peace studies as well as comparative politics and area studies.

Good-Bye Hegemony! Simon Reich, Richard Ned Lebow, 2014-03-23 Many policymakers, journalists and scholars insist that U S hegemony is essential for warding off global chaos. Good Bye Hegemony argues that hegemony is a fiction propagated to support a large defense establishment, justify American claims to world leadership and buttress the self esteem of voters. It is also contrary to American interests and the global order. Simon Reich and Richard Ned Lebow argue that hegemony should instead find expression in agenda setting, economic custodianship and the sponsorship of global initiatives. Today these functions are diffused through the system with European countries, China and lesser powers making important contributions. In contrast the United States has often been a source of political and economic instability. Rejecting the focus on power common to American realists and liberals, the authors offer a novel analysis of influence. In the process they differentiate influence from power and power from material resources. Their analysis shows why the United States, the greatest power the world has ever seen, is increasingly incapable of translating its power into influence. Reich and Lebow use their analysis to formulate a more realistic place for America in world affairs.

Mapping BRICS Media Kaarle Nordenstreng, Daya Kishan Thussu, 2015-03-27 Mapping BRICS Media is the first comprehensive and comparative study of the emerging media landscape in the world's most dynamic and fastest growing markets. This pioneering collection focuses on one of the key topics in contemporary international relations: the emergence of BRICS (Brazil, Russia, India, China and South Africa), a grouping that includes some of the world's largest populations and fastest growing economies. The volume brings together leading scholars, mainly from the BRICS nations, to examine how the emergence of the BRICS media will impact on global media and communication. Contextualizing the rise of the BRICS nations within the broader shifts in global power relations, the chapters investigate the unprecedented growth of the BRICS media within a multi polar world, evaluating the media landscapes in the individual BRICS countries, their histories and their journalism practices, as well as analyzing emerging inter BRICS media relationships. Accessible and comprehensive, the book provides a critical guide to the complex debates about the impact of the rise of the rest on the media globe and how far this poses a challenge to the Western dominated world order and its media systems.

The War Puzzle John A. Vasquez,1993-05-06 This book constructs a new scientific explanation of the onset and expansion of war and the conditions of peace The author describes systematically those factors common to wars between equal states to see if there is a pattern that suggests why war occurs and how it might be avoided or mitigated delineating the typical path by which relatively equal states have become embroiled in wars with one another in the modern global system Emphasis is placed on the issues that give rise to war and how the practices of power politics lead to a series of steps that produce war rather than peace The book differs from others in that it employs the large number of empirical findings generated in the last twenty five years as the basis of its theorizing and integrates these research findings so as to advance dramatically the scientific knowledge of war and peace

The Geriatric Peace Haas,2023-08 This chapter explores the causes of population aging diminishing fertility levels and rising life expectancies and why it is inevitable in most countries It then discusses the book s four main hypotheses Advanced stages of population aging will significantly reduce states capacity or military capabilities to war while increasing leaders and

citizens preferences for peace Hypothesis 1 Because of aging s impact on capabilities and preferences demographically old countries will be less likely to initiate wars than will younger ones Hypothesis 2 If an aged country does initiate war the effects of aging will create major barriers to military success Hypothesis 3 Finally the effects of population aging will help prevent a power transition between the United States and China Hypothesis 4 Although the United States confronts major challenges created by its aging population it is significantly better shape in this area than is China Population aging as a result will be a potent force for the continuation of US relative power dominance The chapter concludes with analyses of the book s contributions to the literature counterarguments and their problems operationalization of variables and case selection criteria Provided by publisher

Awkward Powers: Escaping Traditional Great and Middle Power Theory Gabriele Abbondanza,Thomas Stow Wilkins,2021-10-04 This book introduces the editors new concept of Awkward Powers By undertaking a critical re examination of the state of International Relations theorising on the changing nature of the global power hierarchy it draws attention to a number of countries that fit awkwardly into existing but outdated categories such as great power and middle power It argues that conceptual categories pertaining to the apex of the international hierarchy have become increasingly unsatisfactory and that new approaches focusing on such Awkward Powers can both rectify shortcomings on power theorising whilst shining a much needed theoretical spotlight on significant but understudied states The book s contributors examine a broad range of empirical case studies including both established and rising powers across a global scale to illustrate our conceptual claims Through such a novel process we argue that a better appreciation of the de facto international power hierarchy in the 21st century can be achieved
