Marmolejo,2021-10-04 Based on twenty case studies of universities worldwide and on a survey administered to leaders in 101 universities this open access book shows that amidst the significant challenges caused by the COVID 19 pandemic universities found ways to engage with schools to support them in sustaining educational opportunity In doing so they generated considerable innovation which reinforced the integration of the research and outreach functions of the university The evidence suggests that universities are indeed open systems in interaction with their environment able to discover changes that can influence them and to change in response to those changes They are also able in the success of their efforts to mitigate the educational impact of the pandemic to create better futures as the result of the innovations they can generate This challenges the view of universities as ivory towers being isolated from the
