, 2023-04-03 Exploring Practical Knowledge investigates professional practices from a hermeneutic perspective The book presents discusses and applies notions such as practical knowledge practical wisdom tacit knowledge and normativity to the professional lifeworld These contributions focus on both specific practices and more general questions concerning theories and investigations of practice This volume comes as the result of a cooperation of three research centres The two Centres for Practical Knowledge in Bod Norway and in S dert rn Sweden as well as the Research Group Value Oriented Professionalisation at the University of Applied Sciences in Utrecht the Netherlands It offers empirical studies of professionals as well as discussing the underlying theories approaches and methods of exploring practical knowledge including the limits to any articulation of these aspects of professional action In contrast to the objectivist paradigm that otherwise dominates professional studies each chapter presents central perspectives and possibilities drawing from humanistic and interdisciplinary research traditions The book explores professions in a style accessible to scholars and practitioners alike It is interesting for those studying practices within these professions and for vocational studies in education social work health care police work journalism etc **Beginner's Guide to Reflective Practice in Nursing**

Catherine Delves-Yates, 2021-03-24 What is reflective practice and why is it important How do I write my first reflection Learn how to carry out reflective practice quickly and easily with this beginner's guide for nurses Written for nursing students and registered nurses this book helps build confidence in writing reflectively by using clear step by step guidance insightful case studies learning activities and by addressing commonly asked questions from nurses and nursing students The book has three sections the first starts with a simple model to help students practice a first reflection and explains how to use reflection as part of assessed work at university The second section focuses on reflecting in practice and finding the time to do it in busy work situations The final section helps students to think more deeply about models and theories of reflection to develop the skills they will need to pass the final year of their course Essential reading for any nursing student new to reflective practice or registered nurse wanting to improve their reflective writing skills **Knowledge Sharing in Practice**

M.H. Huysman, D.H. de Wit, 2013-03-14 In this volume organizational learning theory is used to analyse various practices of managing and facilitating knowledge sharing within companies Experiences with three types of knowledge sharing namely knowledge acquisition knowledge reuse and knowledge creation at ten large companies are discussed and analyzed This critical analysis leads to the identification of traps and obstacles when managing knowledge sharing when supporting knowledge sharing with IT tools and when organizations try to learn from knowledge sharing practices The identification of

these risks is followed by a discussion of how organizations can avoid them This work will be of interest to researchers and practitioners working in organization science and business administration Also consultants and organizations at large will find the book useful as it will provide them with insights into how other organizations manage and facilitate knowledge sharing and how potential failures can be prevented

Overcoming Knowledge Sharing Barriers through Communities of Practice Raffaele Filieri, 2010-03-08 Managing knowledge for improving the efficiency and effectiveness of processes and for accelerating innovations is widely recognized as a major source of sustained competitive advantage The growing importance of knowledge sharing has fostered the development of a growing body of research in different disciplinary areas and in different sectors The analyses of the barriers that obstruct knowledge flows are paramount for improving organizational performance The researcher has analyzed the literature on this argument and he has found that knowledge sharing barriers can be grouped into three main macro dimensions socio psychological technological and organizational The author has analyzed the predicting power of the barriers that make knowledge sharing ineffective and the subsequent relationship with new product development performance in a big automotive R one of these is the creation of a community of practice for solving the problems previously identified

Knowledge Engineering: Practice and Patterns Philipp Cimiano, H. Sofia Pinto, 2010-11-18 Knowledge Management and Knowledge Engineering is a fascinating eld of re 1 search these days In the beginning of EKAW the modeling and acquisition of knowledge was the privilege of or rather a burden for a few knowledge engineers familiar with knowledge engineering paradigms and knowledge representation formalisms While the aim has always been to model knowledge declaratively and allow for reusability the knowledge models produced in these early days were typically used in single and very specific applications and rarely changed Moreover these models were typically rather complex and they could be understood only by a few expert knowledge engineers This situation has changed radically in the last few years as clearly indicated by the following trends The creation of even formal knowledge is now becoming more and more collaborative Collaborative ontology engineering tools and social software platforms show the potential to leverage the wisdom of the crowds or at least of the many to lead to broader consensus and thus produce shared models which qualify better for reuse A trend can also be observed towards developing and publishing small but 2 3 4 high impact vocabularies e g FOAF DublinCore GoodRelations rather than complex and large knowledge models

Building Teaching Capacities in Higher Education Alenoush Saroyan, Mariane Frenay, 2023-07-03 This book is the culmination of three years work by teams from eight institutions in five different European and North American countries The teams included faculty developers professors and graduate students interested in developing and disseminating a more profound understanding of university level pedagogy The purpose of the project was first to conceptualize what an internationally appropriate formal academic program for faculty development in higher education might look like taking into account differing national contexts from national standards for faculty development U K and Scandinavia almost universal

institutional support North America to virtually no activities France The intention was to create and nurture a community of practice enriched and informed by a range of expertise and different higher education traditions cultures and languages To do so the book begins with a section of five case studies that describe current practice in Belgium Canada Denmark France and Switzerland The second purpose was to define a common curriculum or core course with common foundations for faculty and graduate students based on a distributed learning model The final section of the book presents a concrete concept map used to define the curriculum and to educational developers with useful tool for furthering their work and explains the rationale for redefining faculty development as educational development This book offers practitioners around the world a framework and model of educational development that can serve a number of purposes including professional development monitoring and assessment of effectiveness and research as they seek to meet increasing demands for public accountability For North American readers it offers insight into the vision and aims of the Bologna Process with which they may need to engage to maintain international competitiveness

Experience, Evidence, and Sense Anna Wierzbicka,2010-06-24 This book is based on two ideas first that any language English no less than any other represents a universe of meaning shaped by the history and experience of the men and women who have created it and second that in any language certain culture specific words act as linchpins for whole networks of meanings and that penetrating the meanings of those key words can therefore open our eyes to an entire cultural universe In this book Anna Wierzbicka demonstrates that three uniquely English words evidence experience and sense are exactly such linchpins Using a rigorous plain language approach to meaning analysis she unpacks the dense cultural meanings of these key words disentangles their multiple meanings and traces their origins back to the tradition of British empiricism In so doing she reveals much about cultural attitudes embedded not only in British and American English but also English as a global language An interdisciplinary work Experience Evidence and Sense will be of interest to both scholars and students in linguistics and English as well as historians of ideas sociologists anthropologists literary scholars and scholars of communication

Learning in Landscapes of Practice Etienne Wenger-Trayner,Mark Fenton-O'Creevy,Steven Hutchinson,Chris Kubiak,Beverly Wenger-Trayner,2014-07-25 If the body of knowledge of a profession is a living landscape of practice then our personal experience of learning can be thought of as a journey through this landscape Within Learning in Landscapes of Practice this metaphor is further developed in order to start an important conversation about the nature of

practice knowledge identity and the experience of practitioners and their learning In doing so this book is a pioneering and timely exploration of the future of professional development and higher education The book combines a strong theoretical perspective grounded in social learning theories with stories from a broad range of contributors who occupy different locations in their own landscapes of practice These narratives locate the book within different contemporary concerns such as social media multi agency multi disciplinary and multi national partnerships and the integration of academic study and workplace practice Both scholarly in the sense that it builds on prior research to extend and locate the concept of landscapes of practice and practical because of the way in which it draws on multiple voices from different landscapes Learning in Landscapes of Practice will be of particular relevance to people concerned with the design of professional or vocational learning It will also be a valuable resource for students engaged in higher education courses with work based elements
