CHINESE PAINTING Deng Qiaobin, 2019-12-26 Chinese Painting An Intellectual History provides a panorama of Chinese painting from primitive times to the Qing Dynasty But it is not a mere list of various theories paintings and painters in chronological order Much space of the book is devoted to describing the political cultural and economic situations as well as the philosophical literary and academic elements that have influenced Chinese painting In its presentation of painters painting theories schools and genres the book combines general introduction with case studies and in so doing maintains an objective and unbiased stance To controversial topics such as the role of Buddhism and Taoism and the division of Northern School and Southern School in landscape painting the book analyzes political and cultural causes but gives no definite answer thus allowing interpretation by the readers As the title suggests the book is not an exclusive discussion on painting

theories otherwise a more appropriate title would be Chinese Painting Theories or A History of Chinese Painting By intellectual the author meant to include not only systematic painting theories and fragmented commentaries that are written in words but also the implicit and intangible message or thoughts underlying the creation of Chinese painting Therefore reading this book is not only a way of appreciating Chinese painting but also helps in understanding Chinese culture

Harmonious Technology Pak-Hang Wong,Tom Wang,2021-02-25 Technology has become a major subject of philosophical ethical reflection in recent years as the novelty and disruptiveness of technology confront us with new possibilities and unprecedented outcomes as well as fundamental changes to our normal ways of living that demand deep reflection of technology However philosophical and ethical analysis of technology has until recently drawn primarily from the Western philosophical and ethical traditions and philosophers and scholars of technology discuss the potential contribution of non Western approaches only sparingly Given the global nature of technology however there is an urgent need for multiculturalism in philosophy and ethics of technology that include non Western perspectives in our thinking about technology While there is an increased attention to non Western philosophy in the field there are few systematic attempts to articulate different approaches to the ethics of technology based on other philosophical and ethical traditions The present edited volume picks up the task of diversifying the ethics of technology by exploring the possibility of Confucian ethics of technology In the six chapters of this volume the authors examine various ideas concepts and theories in Confucianism and apply them to the ethical challenges of technology in the epilogue the editors review the key ideas articulated throughout the volume to identify possible ways forward for Confucian ethics of technology Harmonious Technology revives Confucianism for philosophical and ethical analysis of technology and presents Confucian ethics of technology as another approach to the ethics of technology It will be essential for philosophers and ethicists of technology who are urged to consider beyond the Western paradigms More broadly the volume will be of interest to students and scholars in the fields of philosophy science and technology studies innovation studies political science and social studies Art in the Encounter of Nations Bert
