Practical Ecocriticism:

Practical Ecocriticism Glen A. Love, 2003 Table of contents **Practical Ecocriticism** Glen A. Love, 2003 Practical Ecocriticism is the first book to ground environmental literature firmly in the life sciences particularly evolutionary biology and to attempt to bridge the ever widening gulf between the Two Cultures Glen Love himself one of the founders of ecocriticism argues that literary studies has been diminished by a general lack of recognition for the vital role the biological foundation of human life plays in cultural imagination Love presents with great clarity and directness an invaluable model for how to incorporate Darwinian ideas the basis for all modern biology and ecology into ecocritical thinking Beginning with an overview of the field of literature and environment and its claim to our attention and arguing for a biologically informed theoretical base for literary studies Love then aims the lens of this critical perspective on the pastoral genre and works by canonical writers such as Willa Cather Ernest Hemingway and William Dean Howells A markedly interdisciplinary and refreshingly accessible work Practical Ecocriticism will interest and challenge the entire ecocritical community as well as humanists social scientists and others concerned with the current rediscovery of human nature **The Future of**

Ecocriticism Serpil Oppermann, Ufuk Özdağ, Nevin Özkan, 2011-05-25 As we enter the second decade of the twenty first century environmental concerns dominate the media headlines from rampant poverty in the developing world to nuclear accidents in industrialized nations How did human civilization arrive at its current predicaments and what can we do to temper our habits of mind and mitigate society's environmentally and socially destructive behaviors The field of ecocriticism also sometimes called environmental criticism attempts to grapple with such issues A branch of literary and cultural studies that essentially began in North America in the 1970s ecocriticism is currently one of the most quickly developing areas of environmental research and teaching The Future of Ecocriticism New Horizons brings together thirty two of the latest articles in the field including work by some of the leading scholars from around the world Although ecocriticism has been particularly active in North America Western Europe and East Asia important studies of traditional environmental thought environmental communication strategies and environmental aesthetics have begun to emerge in every region of this world This new book co edited by three prominent Turkish scholars and a leading American ecocritic offers a special cluster of Turkish ecocriticism with a focus on environmental stories and ideas in this culture that bridges Europe and Asia Another unique feature of The Future of Ecocriticism New Horizons is the concluding dialogue among the four editors about the current state of the field **The Oxford Handbook of Ecocriticism** Greg Garrard, 2014 The Oxford Handbook of

Ecocriticism provides a broad survey of the longstanding relationship between literature and the environment The moment for such an offering is opportune in many respects multiple environmental crises are increasingly inescapable at both transnational and local levels the role of the humanities in addition to technology and politics is increasingly recognized as central for exploring and finding solutions and the subject of ecocriticism has reached a kind of critical mass both within its

Anglo American heartlands and beyond From its origins in the study of American Nature Writing and British Romanticism ecocriticism has developed along numerous theoretical historical cultural and geographical axes the most contemporary and exciting of which will be represented in the Handbook The contributors include eminent founders of the field including Cheryll Glotfelty and Jonathan Bate a number of key second wave ecocritics and the best up and coming scholars Topics covered include Green Shakespeare the Bard s subversive uses of the pastoral John Clare s sacred relationship with the land Thoreau s profound political passion the natural landscape as symbol of postcolonial resistance in works by Lessing Naipaul and Coetzee the relation between feminism and environmentalism language and the concept of biosemiotics and concerns over pollution and toxicity in films like Erin Brockovitch Michael Clayton and Al Gore s An Inconvenient Truth

Ecocriticism and the Idea of Culture Helena Feder, 2016-04-29 Ecocriticism and the Idea of Culture Biology and the Bildungsroman draws on work by Kinji Imanishi Frans de Waal and other biologists to create an interdisciplinary materialist notion of culture for ecocritical analysis In this timely intervention Feder examines the humanist idea of culture by taking a fresh look at the stories it explicitly tells about itself These stories fall into the genre of the Bildungsroman the tale of individual acculturation that participates in the myth of its complete separation from and opposition to nature which Feder argues is culture s own origin story Moving from Voltaire s Candide to Mary Shelley s Frankenstein and from Virginia Woolf s Orlando to Jamaica Kincaid s Lucy the book dramatizes humanism s own awareness of the fallacy of this foundational binary In the final chapters Feder examines the discourse of animality at work in this narrative as a humanist fantasy about empathy one that paradoxically excludes other animals from the ethical community to justify the continued domination of both human and nonhuman others

Mason,2013-09-03 Ornithologies of Desire develops ecocritical reading strategies that engage scientific texts field guides and observation Focusing on poetry about birds and birdwatching this book argues that attending to specific details about the physical world when reading environmentally conscious poetry invites a critical humility in the face of environmental crises and evolutionary history The poetry and poetics of Don McKay provide Ornithologies of Desire with its primary subject matter which is predicated on attention to ornithological knowledge and avian metaphors This focus on birds enables a consideration of more broadly ecological relations and concerns since an awareness of birds in their habitats insists on awareness of plants insects mammals rocks and all else that constitutes place The book s chapters are organized according to apparatus that is science as ecocritical tool flight and song Reading McKay s work alongside ecology and ornithology through flight and birdsong both challenges assumptions regarding humans place in the earth system and celebrates the sheer virtuosity of lyric poetry rich with associative as well as scientific details The resulting chapters interchapter and concordance of birds that appear in McKay s poetry encourage amateurs and specialists birdwatchers and poetry readers to reconsider birds in English literature on the page and in the field **Culture and**

Media Rayson K. Alex,S. Susan Deborah,Sachindev P.S.,2014-06-19 Indian ecocriticism has not yet adequately demonstrated the applicability of ecological deep ecological tinai principles to visual texts Culture and Media Ecocritical Explorations closes this gap at the most opportune moment Though this volume accommodates ecologically oriented interpretations from several cultures across the world it reserves the centre stage for Indian ecocriticism and ecotheory quite appropriately The volume effectively challenges the major documents on ecocriticism and theory published by international presses which have been reluctant to give space to tinai criticism and theory that transcend Dravidian or Tamil boundaries The day is not far when cinema of the world shaped by tinai theory will employ tinai hermeneutics to gain fresh insight which in turn will feed into the processes of creation and production of relevant and great movies *Victorian Writers and the Environment* Laurence W. Literary Ecology Karen E. Waldron, Rob Friedman, 2013-07-29 Scholarship of literature and the environment demonstrates myriad understandings of nature and culture While some work in the field results in approaches that belong in the realm of cultural studies other scholars have expanded the boundaries of ecocriticism to connect the practice more explicitly to disciplines such as the biological sciences human geography or philosophy Even so the field of ecocriticism has yet to clearly articulate its interdisciplinary and transdisciplinary nature In *Toward a Literary Ecology Places and Spaces in American Literature* editors Karen E Waldron and Robert Friedman have assembled a collection of essays that study the interconnections between literature and the environment to theorize literary ecology The disciplinary perspectives in these essays allow readers to comprehend places and environments and to represent express or strive for that comprehension through literature Contributors to this volume explore the works of several authors including Gary Snyder Karen Tei Yamashita Rachel Carson Terry Tempest Williams Chip Ward and Mary Oliver Other essays discuss such topics as urban fiction as a model of literary ecology the geographies of belonging in the work of Native American poets and the literary ecology of place in new nature writing Investigating texts for the complex interconnections they represent *Toward a Literary Ecology* suggests what such texts might teach us about the interconnections of our own world This volume also offers a means of analyzing representations of people in places within the realm of an historical cultural and geographically bounded yet diverse American literature Intended for students of literature and ecology this collection will also appeal to scholars of geography cultural studies philosophy biology history anthropology and other related disciplines

The Nature of Being Human Harold Fromm, 2009-05-04 Essays exploring humanity's connection with the environment Although the physical relationship between the natural world and individuals is quantifiable the psychosocial effect of the former on the latter is often less tangible What for instance is the connection between the environment in which we live and our creativity How is our consciousness bounded and delimited by our materiality And from whence does our idea of self and our belief in free will derive and when do our surroundings challenge these basic assumptions Eco critic Harold Fromm's challenging exploration of these and related questions twines his own physical experiences and observations with insights gathered from both the humanities and the sciences Writing broadly and personally Fromm explores our views of nature and how we write about it He ties together ecology evolutionary psychology and consciousness studies to show that our perceived separation from our surroundings is an illusory construct He argues for a naturalistic vision of creativity free will and the literary arts unimpeded by common academic and professional restraints At each point of this intellectual journey Fromm is honest engaging and unsparing Philosophical critical often personal Fromm's sweeping interdisciplinary and sometimes combative essays will change the way you think about your place in the environment How rare it is that a work of philosophical inquiry is written with the passion of a *cri de coeur* but Harold Fromm's brilliantly conceived *The Nature of Being Human* resonates with such uncanny depths Here is an utterly engrossing first person account of a harrowing pilgrimage into the 21st century and its

disturbing revelations about humankind's truest nature in contrast to the comforting solitudes of a humanist past. If the role of the philosopher is to force us to think, Harold Fromm is a born philosopher. Joyce Carol Oates, Fromm, an erudite prolific author of numerous works ranging from ecocritical commentary to self-reflective discourses, presents a compilation of essays that illuminate his views regarding why most Americans seem oblivious to the destruction of their environment. Choice: Fromm's journey from victim to campaigner to pioneer of eco-criticism that is the study of literature from an ecological viewpoint is documented here alongside challenging analyses of man's place in nature, free will, our relationship with technology, and more. Scholarly but engaging, Fromm is an environmentalist but also a realist. Organic Gardener

Slow Violence in Contemporary American Environmental Literature Erden El, 2020-12-18. It has been approximately nine years since Rob Nixon coined the term slow violence to express the slow but deadly changes in the environment which cause the suffering of the poor. These environmental catastrophes take place so gradually and out of sight that they are often ignored. While Nixon dealt with the issues of slow violence in the Global South, this book argues that slow violence is not limited to this region, showing that poorer parts of America suffer from slow violence. Concentrating on Illinois and the Appalachian region, it reveals how slow violence occurs in these places and discusses the reflections of slow violence in various novels set in these locations.
