This book integrates the alternatives and provides guidance on understanding the extent to which non-GAAP reports particularly from US companies may be biased. Understanding financial statements is an essential skill for business professionals and investors. Most books on the subject proceed from the questionable premise that companies' objective is to present a true picture of their financial condition. Financial Statement Analysis teaches readers the tricks that companies use to mislead so readers can more clearly interpret statements. Learn how to read and understand financial statements prepared according to GAAP and non-GAAP standards. Compare CFROI, EVA, Valens and other non-GAAP methodologies to determine how accurate companies' reports are.
