*The Long View* Richard Fisher,2023-03-30 A wide ranging and thought provoking exploration of the importance of long term thinking Humans are unique in our ability to understand time able to comprehend the past and future like no other species Yet modern day technology and capitalism have supercharged our short termist tendencies and trapped us in the present at the mercy of reactive politics quarterly business targets and 24 hour news cycles It wasn t always so In medieval times craftsmen worked on cathedrals that would be unfinished in their lifetime Indigenous leaders fostered intergenerational reciprocity And in the early twentieth century writers dreamed of worlds thousands of years hence Now as we face long term

challenges on an unprecedented scale how do we recapture that far sighted vision Richard Fisher takes us from the boardrooms of Japan home to some of the world s oldest businesses to European laboratories where scientists work as custodians on centuries long experiments He examines the psychological biases that discourage the long view and talks to the growing number of people from the worlds of philosophy technology science and the arts who are exploring smart ways to overcome them How can we learn to widen our perception of time and honour our obligations to the lives of those not yet born

**Longer Views** Samuel R. Delany,2016-03-15 Six essays from the critic and award winning author exploring topics such as theater LGBTQ scholarship cyborgs metaphors and Star Wars Reading is a many layered process like writing observes Samuel R Delany a Nebula and Hugo Award winning author and a major commentator on American literature and culture In this collection of six extended essays Delany challenges what

he calls the hard edged boundaries of meaning by going beyond the customary limits of the genre in which he's writing. By radically reworking the essay form, Delany can explore and express the many layers of his thinking about the nature of art, the workings of language and the injustices and ironies of social, political and sexual marginalization. Thus, Delany connects in sometimes unexpected ways topics as diverse as the origins of modern theater, the context of lesbian and gay scholarship, the theories of cyborgs, how metaphors mean and the narrative structures in the Star Wars trilogy. Over the course of his career, Kenneth James writes in his extensive introduction, Delany has again and again thrown into question the world models that all too many of us unknowingly live by. Indeed, Delany challenges an impressive list of world models here, including High and Low Art, sanity and madness, mathematical logic and the mechanics of mythmaking, the distribution of wealth in our society and the limitations of our sexual vocabulary. Also included are two essays that illustrate Delany's unique chrestomathic technique: the grouping of textual fragments whose associative interrelationships a reader must actively trace to read them as a resonant argument. Whether writing about Wagner or Hart Crane, Foucault or Robert Mapplethorpe, Delany combines a fierce and often piercing vision with a powerful honesty that beckons us to share in the perspective of these Longer Views. An intellectually adventurous book, every page of every essay here rewards a second reading and a third. Delany has a fearsomely stocked intellect and a wider range of experience than most writers can even imagine. He is brilliant, driven, prolific. The Nation: One of science fiction's grand masters, Delany's elegant command of language and deep insight into other authors' works are delightful to behold. Booklist: Rare personal frankness and stunning erudition. Recommended for readers who enjoy the challenge of being led into remote regions of a gifted mind. Library Journal. *The Space Between* Heidi L. Maibom, 2022. When Barack Obama nominated Sonia Sotomayor to the US Supreme Court, his comments that a judge should have the heart, the empathy to recognize what it's like to be a young teenage mom, the empathy to understand what it's like to be poor or African American or gay, disabled or old, caused a furor. Objective, reasoned and impartial judgment were to be replaced by partiality, sentiment and bias, critics feared. This concern about empathy has since been voiced not just by conservative critics but by academics and public figures. In *The Space Between*, Heidi Maibom combines results from philosophy, psychology and neuroscience to argue that rather than making us more biased or partial, empathy makes us more impartial and more objective. The problem is that we don't see the world objectively in the first place, Maibom explains. We see it in terms of how we are placed in it, as an extension of our interests, capabilities and relationships. This is a perspective and it determines what we pay attention to, how we interpret events and what matters to us individually. It is not private, however. By means of the imagination, Maibom contends, we can place ourselves in another person's web of interests, capabilities and relationships and, viewing the world from there, experience a new way of interpreting and valuing what happens. This broadens and deepens our understanding of others and the world around us. It also helps us understand the greater reality of who we are ourselves. Maibom's book weaves together results from philosophy, psychology and neuroscience to provide a
