*Learning to Teach Geography in the Secondary School* Mary Biddulph, David Lambert, David Balderstone, 2015-05-20

*Learning to Teach Geography in the Secondary School* has become the widely recommended textbook for student and new teachers of geography It helps you acquire a deeper understanding of the role purpose and potential of geography within the secondary curriculum and provides the practical skills needed to design teach and evaluate stimulating and challenging lessons It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching and debate key questions about the nature and purpose of the subject in school Fully revised and updated in light of extensive changes to the curriculum as well as to initial teacher education the new edition considers the current debates around what we mean by geographical knowledge and what is involved in studying at Masters level Key chapters explore the fundamentals of teaching and learning geography Why we teach and what to teach Understanding and planning the curriculum Effective pedagogy Assessment Developing and using resources Fieldwork and outdoor learning Values in school geography Professional development

Intended as a core textbook and written with university and school based initial teacher education in mind *Learning to Teach Geography in the Secondary school* is essential reading for all those who aspire to become effective reflective teachers Praise for previous editions of *Learning to Teach Geography in the Secondary School* This is a practical and visionary book as well as being superbly optimistic It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere Practical activities and ideas are set within a carefully worked out authoritative conceptual framework The Times Educational Supplement This is a modern powerful relevant and comprehensive work a standard reference for many beginning teachers on geography initial teacher training courses Educational Review

*Aspects of Teaching Secondary Geography* Margaret Smith, 2003-09-02 This book provides a practical illustration of the skills knowledge and understanding required to teach in the secondary classroom As well as discussing concepts and ideas the book gives a critical examination of some of the key issues and will encourage the reader to engage with the ideas and consider their views and beliefs It is an invaluable resource for those who are learning to teach or for those teachers who wish to reflect on their teaching practice

*Geography* John Morgan, David Lambert, 2005-06-21

When Geography specialists decide they want to teach it can be a daunting prospect to enter a real classroom no matter how much subject knowledge they already possess *Geography Teaching School Subjects 11-19* puts the subject into perspective and shows new teachers and student teachers how to make Geography accessible and interesting for their pupils Divided into three sections the book examines the theory and practice of teaching geography section one explores how teachers can

frame their own knowledge for classroom practice section two focuses on Geography in the classroom and curriculum development as well as aspects of pedagogy and lesson design evaluation and assessment section three focuses on the teachers themselves and how they can view and work on professional development within their own subject area

**Geography of Education** Colin Brock, 2016-09-22 Geography of Education sets out the scope of this emergent interdisciplinary field It illustrates the essential affinity of geographical and educational studies by emphasising the geographical factors influencing formal education systems and other forms of knowledge transfer Colin Brock begins by arguing the theoretical synergy that exists between the nature of both geography and educational studies as disciplines This is then exemplified by an analysis of the emergence of systems of schooling under the influence of religious political and economic forces The author also considers informal and non formal modes of education and argues that the huge diversity of such provision creates a rich resource for research into geographies of education In the final chapters the author turns his attention to the role of cyberspace which has its own geography in learning and considers education as a form of humanitarian response to issues of environmental sustainability By bringing together a wide range of themes and topics relating to both education and geography Colin Brock argues that the geographical approach should inform the evolution of all types of educational provision around the world *Geographical Education in a Changing World* John Lidstone, Michael Williams, 2006-07-19 This book results from the work of the Commission on Geographical Education of the International Geographical Union Part 1 focuses on the distinctive traditions of school geography Part 2 reviews the state of school geography on a broad continental basis including national case studies by local experts The final chapters extrapolate from the present and point to likely future developments in the subject again with examples drawn from various countries

**Reflective Teaching of Geography 11-18** Graham Butt, 2002-10-11 THIS IS THE SERIES BLURB LIST ALL BOOKS TOGETHER Continuum Studies in Reflective Practice and Research is a new series of textbooks aimed at teaching students As with Andrew Pollard s books they use the idiom of reflective teaching In other words they avoids the two extreme views about learning to teach namely that it is best done simply through acquiring practical tricks of the trade without any theory or that it is best done applying sytematized objective theory The distinctive feature of relective teaching is that it encourages practitioners to develop by continually inter relating theory and research findings to their own practice situation and style These comprehensive textbooks provide an accessible guide to all those who are new to teaching in secondary schools Covering all aspects of job from planning through to teaching and assessment the authors provide constructive accessible and above all practical advice to help subject teachers become more effective in their work **Understanding GCSE Geography** Ann Bowen, John Pallister, 2002 This Foundation book has simplified text covering the same material as the core student book with the same pagination Written to AQA A specification it encourages the development of geographical skills There are activity and test questions and guidance for students on tackling coursework Global Perspectives in the

Geography Curriculum Alex Standish, 2008-10-07 For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians Standish's careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq Iran and Afghanistan on a map Prof Dennis Hayes Oxford Brookes University UK A prescient and critical analysis of the changing face of geography teaching This book deserves to be widely read and debated Alex Standish's book puts current trends in geography teaching in historical and critical context It comprises a forthright and timely defence of geographical education for its own sake Dr Jim Butcher FRSA Department of Sport Science Tourism and Leisure Canterbury Christ Church University Since the early 1990s educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools from a subject which encourages students to explore spatial concepts ideas and skills to a more ethics based subject concerned with the promotion of environmentalism cultural diversity and social justice In this book the new approach is critically examined within a historical and ideological context addressing a number of fundamental questions Should geography be used as a tool for the delivery of citizenship ideals How does this affect the intellectual and moral value of geographical education for young people If the state and teachers are taking more responsibility for the values attitudes and emotional responses of students how will they learn to develop these qualities for themselves If global perspectives shift the focus of education from learning about the outside world to learning about the self what is its vision of social progress and conception of social change This book advocates a return to liberal models of education arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject and the freedom of young people to shape the world in which they live A vital resource for teachers and student teachers alike Global Perspectives in the Geography Curriculum makes a significant contribution to the growing debate about the future direction of the discipline itself The African Book Publishing Record, 2009 **Applied Geography** Michael Pacione, 2002-03-11 Applied Geography offers an invaluable introduction to useful research in physical environmental and human geography and provides a new focus and reference point for investigating and understanding problem orientated research Forty nine leading experts in the field introduce and explore research which crosses the traditional boundary between physical and human geography A wide range of key issues and contemporary debates are within the book's main sections which cover natural and environmental hazards environmental change and management challenges of the human environment techniques of spatial analysis Applied geography is the application of geographic knowledge and skills to identify the nature and causes of social economic and environmental problems and inform policies which lead to their resolution **Learning to Teach History in the Secondary School** Terry Haydn, Alison Stephen, James Arthur, Martin Hunt, 2014-10-10 An excellent companion to Learning to Teach in Secondary School full of good ideas and better advice Mentors will certainly want to use it and so I m

sure will the rest of the history department Make sure they buy one and keep your copy under lock and key Michael Duffy Times Educational Supplement A very well written and readable book Overall this is an excellent book and one which students and teachers outwith England would find a valuable addition to their library Scottish Association of Teachers of History Resources Review This book is without question the standard text for the history PGCE market Dr Ian Davies University of York on the first edition Learning to Teach History in the Secondary School provides an accessible introduction to teaching and learning history at secondary level Underpinned by a theoretical perspective and backed up by the latest research it encourages student teachers to develop a personal approach to teaching history This fourth edition has been thoroughly updated for the new curriculum with a brand new chapter on subject knowledge and a new section on action research to better support those reflecting on and developing their own practice It provides an array of references and materials that give a sound theoretical foundation for the teaching of history including weblinks to further resources while a range of tasks will enable students to put their learning into practice in the classroom Practical advice is combined with reference and access to a wide range of recent and relevant research in the field of history education to support Masters Level research and aid reflective practice Key issues covered include The benefits of learning history Planning The use of language and strategies for teaching Inclusion Technology in history teaching Assessment Continuing professional development Offering comprehensive and accessible support to becoming a history teacher this book remains an invaluable resource for all training and newly qualified history teachers *The Power of Geographical Thinking* Clare Brooks, Graham Butt, Mary Fargher, 2017-03-02 In this book geography educators from around the globe discuss their research into the power of geographical thinking and consider successful strategies to implement improve and advance geography education in research and practice It addresses key topics in geography education such as multicultural competence the role of teachers the geography curriculum spatial thinking geographic information systems geocapabilities and climate change At a global level the contributors and editors bring together the most advanced collection of research and discussion surrounding issues in geography education The book will be of interest to geography education researchers worldwide including academics at university and teachers in schools as well as professional geographers with an interest in education **Environmental and Geographical Education for Sustainability** Zijian Li, Michael Williams, 2006 Geography environment sustainability culture and education standing alone or in any combination provide the ingredients for a variety of stews They are all difficult to define and they generate endless debates for theoreticians and practitioners about their meaning and significance The editors have divided the chapters that follow into two parts in an effort to unit these diverse disciplines Part 1 is concerned with cultural foundations and curriculum issues related to geographical and environmental education for sustainability Part 2 comprises a series of chapters presenting education for sustainability in the contexts of national cultures Conducting Research in Human Geography Rob Kitchin, Nick Tate, 2013-12-02 Reading this book is your first step to becoming a

competent human geography researcher Whether you are a novice needing practical help for your first piece of research or a professional in search of an accessible guide to best practice *Conducting Research in Human Geography* is a unique and indispensable book to have at hand The book provides a broad overview of theoretical underpinnings in contemporary human geography and links these with the main research methodologies currently being used It is designed to guide the user through the complete research process whether it be a one day field study or a large project from the nurturing of ideas and development of a proposal to the design of an enquiry the generation and analysis of data to the drawing of conclusions and the presentation of findings      Geographical Knowledge Construction and Production Archie K. Deen, 2015-09-02

*Geographical Knowledge Construction and Production Teacher and Student Perspectives* is a readable and illuminating account of three high school classrooms in suburban Atlanta Georgia It challenges the narrow focus of the Advanced Placement AP programme as a tool for admission into colleges and universities in the United States The research provides insight into the College Board's AP programme and argues for teaching and learning that is transformative and geared toward equipping students with the skills and knowledge necessary to confront the challenges of the 21st century In particular it advocates for geographic education that is anchored in the structure of the subject teasing wherever possible the contradictions and tensions embedded in the complexities of facts relating to people and places This book is essential reading for professors and students of education teachers and students of AP courses parents administrators and state and federal agencies vested in the AP programme
